1	Introduction	1
1.1	Introduction	1
	References.	9
2	Chiral EW Lagrangian	15
2.1	Equivalence Theorem	16
2.2	The Chiral Lagrangian and Its Parameterizations	18
2.2.1	WBGB Scattering	22
2.2.2	Coupling with $\gamma\gamma$	24
2.2.3	Coupling with $t\bar{t}$	25
	References.	27
3	Scattering Amplitudes	31
3.1	Generic form of the WBGB Scattering Amplitude and the Isospin Basis	31
3.1.1	Decomposition of Elastic Scattering $\omega\omega \rightarrow \omega\omega$	34
3.1.2	Higgs–Higgs Cross-Channel: $\omega\omega \rightarrow hh$ and $hh \rightarrow hh$ Amplitudes	37
3.1.3	Other Channels: $\omega^\pm z \rightarrow \omega^\pm z$	38
3.2	LO and NLO Computation of Invariant Scattering Amplitudes	39
3.2.1	$\omega\omega$ Scattering	39
3.2.2	$\gamma\gamma$ Scattering.	45
3.2.3	$t\bar{t}$ in the Final State.	51
3.2.4	$t\bar{t} \rightarrow t\bar{t}$ Scattering Amplitude	56
3.3	Partial Wave Decomposition.	56
3.3.1	$\omega\omega$ Scattering	58
3.3.2	$\gamma\gamma$ Scattering Into and Out of the EWSBS	63
3.3.3	$t\bar{t}$ in the Final State.	64
3.3.4	Validity Range of the Approximations	66
	References.	68

4 Analytical Properties and Unitarization	71
4.1 Unitarity Condition for Partial Waves	71
4.2 Poles on the Analytical Continuation	76
4.2.1 Spurious Resonances	78
4.2.2 Numerical Search for Poles on the s -plane	78
4.3 Unitarization Procedures for $\omega\omega$ Scattering	82
4.3.1 Dispersion Relations	84
4.3.2 Inverse Amplitude Method	88
4.3.3 N/D Method	92
4.3.4 K-matrix and Improved K-matrix	102
4.3.5 Summary of the Unitarization Methods and Their Range of Applicability	104
4.4 Extensions of the $\omega\omega$ Unitarization	105
4.4.1 $\gamma\gamma$ Scattering Without hh Channel ($a^2 = b$), $J = 0$	106
4.4.2 $\gamma\gamma$ Scattering with hh Channel, $J = 0$	107
4.4.3 $\gamma\gamma$ Scattering Without hh Channel ($a^2 = b$), $J = 2$	110
4.4.4 $\gamma\gamma$ Scattering with hh Channel, $J = 2$	111
4.4.5 $t\bar{t}$ in the Final State Without hh Channel ($a^2 = b$), $J = 0$	112
4.4.6 $t\bar{t}$ in the Final State with hh Channel, $J = 0$	113
