## Preface

## 1 Preliminaries

1.1 Inverse Limits ........................................ 2
1.2 Profinite Spaces ....................................... 3
1.3 Profinite Groups ....................................... 4
    Pseudovarieties $\mathcal{C}$ .......................... 5
    Generators ........................................... 6
    $G$-Spaces and Continuous Sections ................. 6
    Order of a Profinite Group and Sylow Subgroups .... 7
1.4 Pro-$\mathcal{C}$ Topologies in Abstract Groups ......... 8
1.5 Free Groups .......................................... 9
1.6 Free and Amalgamated Products of Groups .......... 10
1.7 Profinite Rings and Modules ......................... 11
    Exact Sequences .................................... 13
    The Functors $\text{Hom}(-,-)$ ........................ 13
    Projective and Injective Modules .................... 14
1.8 The Complete Group Algebra .......................... 15
    $G$-Modules ......................................... 15
    Complete Tensor Products ............................ 16
1.9 The Functors $\text{Ext}_A^n(-,-)$ and $\text{Tor}_n^A(-,-)$ 17
    The Functors $\text{Ext}_A^n(-,-)$ ........................ 17
    The Functors $\text{Tor}_n^A(-,-)$ ........................ 19
1.10 Homology and Cohomology of Profinite Groups ....... 20
    Cohomology of Profinite Groups ..................... 20
    Special Maps in Cohomology ........................ 23
    Homology of Profinite Groups ....................... 24
    Duality Homology-Cohomology ....................... 24
    (Co)induced Modules and Shapiro’s Lemma .......... 25
1.11 (Co)homological Dimension .......................... 25
## Part I Basic Theory

### 2 Profinite Graphs

- 2.1 First Notions and Examples .................................................. 29
- 2.2 Groups Acting on Profinite Graphs ....................................... 41
- 2.3 The Chain Complex of a Graph ........................................... 45
- 2.4 $\pi$-Trees and $C$-Trees .................................................. 48
- 2.5 Cayley Graphs and $C$-Trees .............................................. 57

### 3 The Fundamental Group of a Profinite Graph

- 3.1 Galois Coverings ............................................................ 63
- 3.2 $G(\Gamma|\Delta)$ as a Subgroup of $\text{Aut}(\Gamma)$ ..................... 72
- 3.3 Universal Galois Coverings and Fundamental Groups ............... 74
- 3.4 0-Transversals and 0-Sections .......................................... 77
- 3.5 Existence of Universal Coverings ....................................... 82
- 3.6 Subgroups of Fundamental Groups of Graphs ......................... 89
- 3.7 Universal Coverings and Simple Connectivity ......................... 91
- 3.8 Fundamental Groups and Projective Groups .......................... 95
- 3.9 Fundamental Groups of Quotient Graphs .............................. 96
- 3.10 $\pi$-Trees and Simple Connectivity .................................. 100
- 3.11 Free Pro-$C$ Groups and Cayley Graphs .............................. 105
- 3.12 Change of Pseudovariety ................................................. 107

### 4 Profinite Groups Acting on $C$-Trees

- 4.1 Fixed Points ........................................................................ 111
- 4.2 Faithful and Irreducible Actions ......................................... 119

### 5 Free Products of Pro-$C$ Groups

- 5.1 Free Pro-$C$ Products: The External Viewpoint .................... 137
- 5.2 Subgroups Continuously Indexed by a Space ......................... 145
- 5.3 Free Pro-$C$ Products: The Internal Viewpoint ..................... 148
- 5.4 Profinite $G$-Spaces vs the Weight $w(G)$ of $G$ .................... 153
- 5.5 Basic Properties of Free Pro-$C$ Products ............................. 157
- 5.6 Free Products and Change of Pseudovariety ......................... 164
- 5.7 Constant and Pseudoconstant Sheaves ................................ 167

### 6 Graphs of Pro-$C$ Groups

- 6.1 Graphs of Pro-$C$ Groups and Specializations ....................... 177
- 6.2 The Fundamental Group of a Graph of Pro-$C$ Groups .............. 180
- 6.3 The Standard Graph of a Graph of Pro-$C$ Groups ................. 193
- 6.4 Injective Graphs of Pro-$C$ Groups ...................................... 205
- 6.5 Abstract vs Profinite Graphs of Groups ............................... 207
- 6.6 Action of a Pro-$C$ Group on a Profinite Graph with Finite Quotient ................................................................. 213
- 6.7 Notes, Comments and Further Reading: Part I ..................... 216

Abstract Graph of Finite Groups $(\mathcal{G}, \Gamma')$ over an Infinite Graph $\Gamma'$ 218
## Part II  Applications to Profinite Groups

### 7  Subgroups of Fundamental Groups of Graphs of Groups  
7.1 Subgroups  
7.2 Normal Subgroups  
7.3 The Kurosh Theorem for Free Pro-$C$ Products

### 8  Minimal Subtrees
8.1 Minimal Subtrees: The Abstract Case  
8.2 Minimal Subtrees: Abstract vs Profinite Trees  
8.3 Graphs of Residually Finite Groups and the Tits Line  
8.4 Graph of a Free Product of Groups and the Tits Line

### 9  Homology and Graphs of Pro-$C$ Groups
9.1 Direct Sums of Modules and Homology  
9.2 Corestriction and Continuously Indexed Families of Subgroups  
9.3 The Homology Sequence of the Action on a Tree  
9.4 Mayer–Vietoris Sequences  
9.5 Homological Characterization of Free Pro-$p$ Products  
9.6 Pro-$p$ Groups Acting on $C$-Trees and the Kurosh Theorem

### 10  The Virtual Cohomological Dimension of Profinite Groups
10.1 Tensor Product of Complexes  
10.2 Tensor Product Induction for a Complex  
10.3 The Torsion-Free Case  
10.4 Groups Virtually of Finite Cohomological Dimension: Periodicity  
10.5 The Torsion Case  
10.6 Pro-$p$ Groups with a Free Subgroup of Index $p$  
10.7 Counter Kurosh  
10.8 Fixed Points of Automorphisms of Free Pro-$p$ Groups  
10.9 Notes, Comments and Further Reading: Part II

M. Hall Pro-$p$ Groups

## Part III  Applications to Abstract Groups

### 11  Separability Conditions in Free and Polycyclic Groups
11.1 Separability Conditions in Abstract Groups  
11.2 Subgroup Separability in Free-by-Finite Groups  
11.3 Products of Subgroups in Free Abstract Groups  
11.4 Separability Properties of Polycyclic Groups
12 Algorithms in Abstract Free Groups and Monoids ......... 349
  12.1 Algorithms for Subgroups of Finite Index .............. 349
  12.2 Closure of Finitely Generated Subgroups in Abstract Free
       Groups ........................................... 353
  12.3 Algorithms for Monoids ................................ 359
       The Kernel of a Finite Monoid ................. 364
       The Mal’cev Product of Pseudovarieties of Monoids .... 366
13 Abstract Groups vs Their Profinite Completions .......... 369
  13.1 Free-by-Finite Groups vs Their Profinite Completions .... 369
  13.2 Polycyclic-by-Finite Groups vs Their Profinite Completions 379
14 Conjugacy in Free Products and in Free-by-Finite Groups ... 383
  14.1 Conjugacy Separability in Free-by-Finite Groups ....... 383
  14.2 Conjugacy Subgroup Separability in Free-by-Finite Groups 386
  14.3 Conjugacy Distinguishedness in Free-by-Finite Groups ... 389
15 Conjugacy Separability in Amalgamated Products ......... 391
  15.1 Abstract Free Products with Cyclic Amalgamation ....... 392
  15.2 Normalizers in Amalgamated Products of Groups ....... 396
  15.3 Conjugacy Separability of Amalgamated Products ....... 399
  15.4 Amalgamated Products, Quasi-potency and Subgroup
       Separability ..................................... 405
  15.5 Amalgamated Products and Products of Cyclic Subgroups ... 407
  15.6 Amalgamated Products and Normalizers of Cyclic Subgroups 411
  15.7 Amalgamated Products and Intersections of Cyclic Subgroups 412
  15.8 Amalgamated Products and Conjugacy Distinguishedness .... 415
  15.9 Conjugacy Separability of Certain Iterated Amalgamated
       Products ........................................... 418
  15.10 Examples of Conjugacy Separable Groups .............. 418
  15.11 Notes, Comments and Further Reading: Part III ........ 422
       Subgroup Separability and Free Products ............ 423
       Conjugacy Separability, Subgroups and Extensions .... 427
       Conjugacy Distinguished Subgroups ................. 427
Appendix A Abstract Graphs ............................. 429
  A.1 The Fundamental Group of an Abstract Graph .......... 429
       The Star of a Vertex ............................. 430
       Paths ........................................... 430
  A.2 Coverings of Abstract Graphs .......................... 435
  A.3 Foldings ........................................ 441
  A.4 Algorithms ...................................... 442
       Intersection of Finitely Generated Subgroups ....... 443
  A.5 Notes, Comments and Further Reading .................. 445
