## Part I Stein Manifolds

<b>1 Preliminaries</b> . . . . .	3
1.1 Complex Manifolds and Holomorphic Maps . . . . .	3
1.2 Examples of Complex Manifolds . . . . .	7
1.3 Subvarieties and Complex Spaces . . . . .	10
1.4 Holomorphic Fibre Bundles . . . . .	13
1.5 Holomorphic Vector Bundles . . . . .	16
1.6 The Tangent Bundle . . . . .	21
1.7 The Cotangent Bundle and Differential Forms . . . . .	24
1.8 Plurisubharmonic Functions and the Levi Form . . . . .	27
1.9 Vector Fields, Flows and Foliations . . . . .	32
1.10 What is the H-Principle? . . . . .	39
<b>2 Stein Manifolds</b> . . . . .	45
2.1 Domains of Holomorphy . . . . .	45
2.2 Stein Manifolds and Stein Spaces . . . . .	49
2.3 Holomorphic Convexity and the Oka-Weil Theorem . . . . .	50
2.4 Embedding Stein Manifolds into Euclidean Spaces . . . . .	51
2.5 Characterization by Plurisubharmonic Functions . . . . .	52
2.6 Cartan-Serre Theorems A & B . . . . .	54
2.7 The $\bar{\partial}$ -Problem . . . . .	58
2.8 Cartan-Oka-Weil Theorem with Parameters . . . . .	59
<b>3 Stein Neighborhoods and Approximation</b> . . . . .	65
3.1 $Q$ -Complete Neighborhoods . . . . .	65
3.2 Stein Neighborhoods of Stein Subvarieties . . . . .	70
3.3 Holomorphic Retractions onto Stein Submanifolds . . . . .	73
3.4 A Semiglobal Holomorphic Extension Theorem . . . . .	75
3.5 Approximation on Totally Real Submanifolds . . . . .	79
3.6 Stein Neighborhoods of Laminated Sets . . . . .	82
3.7 Stein Compacts with Totally Real Handles . . . . .	86

3.8	A Mergelyan Approximation Theorem . . . . .	88
3.9	Strongly Pseudoconvex Handlebodies . . . . .	90
3.10	Morse Critical Points of $q$ -Convex Functions . . . . .	94
3.11	Critical Levels of a $q$ -Convex Function . . . . .	98
3.12	Topological Structure of a Stein Space . . . . .	102
<b>4</b>	<b>Automorphisms of Complex Euclidean Spaces . . . . .</b>	<b>107</b>
4.1	Shears . . . . .	107
4.2	Automorphisms of $\mathbb{C}^2$ . . . . .	112
4.3	Attracting Basins and Fatou-Bieberbach Domains . . . . .	115
4.4	Random Iterations and the Push-Out Method . . . . .	123
4.5	Mittag-Leffler Theorem for Entire Maps . . . . .	126
4.6	Tame Discrete Sets in $\mathbb{C}^n$ . . . . .	127
4.7	Unavoidable and Rigid Discrete Sets . . . . .	130
4.8	Algorithms for Computing Flows . . . . .	133
4.9	The Andersén-Lempert Theory . . . . .	135
4.10	The Density Property . . . . .	141
4.11	Automorphisms Fixing a Subvariety . . . . .	151
4.12	Moving Polynomially Convex Sets . . . . .	157
4.13	Moving Totally Real Submanifolds . . . . .	161
4.14	Carleman Approximation by Automorphisms . . . . .	164
4.15	Automorphisms with Given Jets . . . . .	169
4.16	Mittag-Leffler Theorem for Automorphisms of $\mathbb{C}^n$ . . . . .	175
4.17	Interpolation by Fatou-Bieberbach Maps . . . . .	181
4.18	Twisted Holomorphic Embeddings into $\mathbb{C}^n$ . . . . .	185
4.19	Nonlinearizable Periodic Automorphisms of $\mathbb{C}^n$ . . . . .	189
4.20	A Non-Runge Fatou-Bieberbach Domain . . . . .	195
4.21	A Long $\mathbb{C}^2$ Without Holomorphic Functions . . . . .	197
<b>Part II Oka Theory</b>		
<b>5</b>	<b>Oka Manifolds . . . . .</b>	<b>207</b>
5.1	A Historical Introduction to the Oka Principle . . . . .	207
5.2	Cousin Problems and Oka's Theorem . . . . .	209
5.3	The Oka-Grauert Principle . . . . .	212
5.4	What is an Oka Manifold? . . . . .	215
5.5	Basic Properties of Oka manifolds . . . . .	219
5.6	Examples of Oka Manifolds . . . . .	223
5.7	Cartan Pairs . . . . .	234
5.8	A Splitting Lemma . . . . .	235
5.9	Gluing Holomorphic Sprays . . . . .	239
5.10	Noncritical Strongly Pseudoconvex Extensions . . . . .	242
5.11	Proof of Theorem 5.4.4: The Basic Case . . . . .	245
5.12	Proof of Theorem 5.4.4: Stratified Fibre Bundles . . . . .	247
5.13	Proof of Theorem 5.4.4: The Parametric Case . . . . .	252
5.14	Existence Theorems for Holomorphic Sections . . . . .	256
5.15	Equivalences Between Oka Properties . . . . .	258

**6 Elliptic Complex Geometry and Oka Theory** . . . . . 263

6.1 Fibre Sprays and Elliptic Submersions . . . . . 264

6.2 The Oka Principle for Sections of Stratified Subelliptic Submersions . . . . . 265

6.3 Composed and Iterated Sprays . . . . . 267

6.4 Examples of Subelliptic Manifolds and Submersions . . . . . 271

6.5 Lifting Homotopies to Spray Bundles . . . . . 280

6.6 Runge Theorem for Sections of Subelliptic Submersions . . . . . 283

6.7 Gluing Holomorphic Sections on  $\mathcal{C}$ -Pairs . . . . . 287

6.8 Complexes of Holomorphic Sections . . . . . 290

6.9  $\mathcal{C}$ -Strings . . . . . 293

6.10 Construction of the Initial Holomorphic Complex . . . . . 295

6.11 The Main Modification Lemma . . . . . 297

6.12 Proof of Theorems 6.2.2 and 6.6.6 . . . . . 303

6.13 Relative Oka Principle on 1-Convex Manifolds . . . . . 306

6.14 The Oka Principle for Sections of Branched Maps . . . . . 307

6.15 Approximation by Algebraic Maps . . . . . 312

**7 Flexibility Properties of Complex Manifolds and Holomorphic Maps** 319

7.1 Hierarchy of Holomorphic Flexibility Properties . . . . . 320

7.2 Stratified Oka Manifolds and Kummer Surfaces . . . . . 325

7.3 Oka Properties of Compact Complex Surfaces . . . . . 328

7.4 Oka Maps . . . . . 332

7.5 A Homotopy-Theoretic Viewpoint on Oka Theory . . . . . 336

7.6 Miscellanea and Open Problems . . . . . 342

**Part III Applications**

**8 Applications of Oka Theory and Its Methods** . . . . . 353

8.1 Principal Fibre Bundles . . . . . 353

8.2 The Oka-Grauert Principle for  $G$ -Bundles . . . . . 356

8.3 Homomorphisms and Generators of Vector Bundles . . . . . 360

8.4 Generators of Coherent Analytic Sheaves . . . . . 366

8.5 The Number of Equations Defining a Subvariety . . . . . 369

8.6 Elimination of Intersections . . . . . 373

8.7 Holomorphic Vaserstein Problem . . . . . 375

8.8 Transversality Theorems for Holomorphic Maps . . . . . 378

8.9 Singularities of Holomorphic Maps . . . . . 386

8.10 Local Sprays of Class  $\mathcal{A}(D)$  . . . . . 388

8.11 Stein Neighborhoods of  $\mathcal{A}(D)$ -Graphs . . . . . 393

8.12 Oka Principle on Strongly Pseudoconvex Domains . . . . . 398

8.13 Banach Manifolds of Holomorphic Mappings . . . . . 400

**9 Embeddings, Immersions and Submersions** . . . . . 403

9.1 The H-Principle for Totally Real Immersions and for Complex Submersions . . . . . 404

9.2 (Almost) Proper Maps to Euclidean Spaces . . . . . 411

9.3 Embedding and Immersing Stein Manifolds into Euclidean Spaces of Minimal Dimension . . . . . 415

9.4 Proof of the Relative Embedding Theorem . . . . . 420

9.5 Weakly Regular Embeddings and Interpolation . . . . . 426

9.6 The Oka Principle for Holomorphic Immersions . . . . . 429

9.7 A Splitting Lemma for Biholomorphic Maps . . . . . 431

9.8 The Oka Principle for Proper Holomorphic Maps . . . . . 436

9.9 Exposing Points of Bordered Riemann Surfaces . . . . . 441

9.10 Embedding Bordered Riemann Surfaces in  $\mathbb{C}^2$  . . . . . 446

9.11 Infinitely Connected Complex Curves in  $\mathbb{C}^2$  . . . . . 450

9.12 Approximation of Holomorphic Submersions . . . . . 457

9.13 Noncritical Holomorphic Functions . . . . . 461

9.14 The Oka Principle for Holomorphic Submersions . . . . . 469

9.15 Closed Holomorphic 1-Forms Without Zeros . . . . . 470

9.16 Holomorphic Foliations on Stein Manifolds . . . . . 472

**10 Topological Methods in Stein Geometry . . . . . 477**

10.1 Real Surfaces in Complex Surfaces . . . . . 478

10.2 Invariants of Smooth 4-Manifolds . . . . . 482

10.3 Lai Indexes and Index Formulas . . . . . 484

10.4 Cancelling Pairs of Complex Points . . . . . 488

10.5 Applications of the Cancellation Theorem . . . . . 492

10.6 The Adjunction Inequality in Kähler Surfaces . . . . . 498

10.7 The Adjunction Inequality in Stein Surfaces . . . . . 505

10.8 Well Attached Handles . . . . . 509

10.9 Stein Structures and the Soft Oka Principle . . . . . 517

10.10 The Case  $\dim_{\mathbb{R}} X \neq 4$  . . . . . 520

10.11 Exotic Stein Structures on Smooth 4-Manifolds . . . . . 523

**References . . . . . 533**

**Index . . . . . 557**
