

Contents

Part I Graphene and Nanocarbon Materials

The Synthesis and the Catalytic Properties of Graphene-Based Composite Materials	3
Baojiang Jiang and Chaoyang Li	
Optical Characterization of Graphene and Its Derivatives: An Experimentalist's Perspective	27
Dinh-Tuan Nguyen, Ya-Ping Hsieh, and Mario Hofmann	
Submerged Liquid Plasma for the Formation of Nanostructured Carbon	61
Masahiro Yoshimura and Jaganathan Senthilnathan	
Lab-on-a-Graphene: Functionalized Graphene Transistors and Their Application for Biosensing	79
Takao Ono, Yasushi Kanai, Yasuhide Ohno, Kenzo Maehashi, Koichi Inoue, and Kazuhiko Matsumoto	
Production of Single- and Few-Layer Graphene from Graphite	91
Shinya Yamanaka, Mai Takase, and Yoshikazu Kuga	
Graphene-Based Coatings for Dental Implant Surface Modification	103
Alina Pruna, Daniele Pullini, and Andrada Soanca	

Part II Carbon Composites and Thin Films

Effect of CNT on the Mechanical Properties of Composite Materials and Structures	119
N. Naveh, Y. Seri, Y. Portnoy, D. Levin, and B. Muravin	
Energy Absorption Capability of Hybrid Fibers Reinforced Composite Tubes	145
Yuqiu Yang, Yan Ma, Jing Xu, and Hiroyuki Hamada	

Graphene-Rubber Nanocomposites: Preparation, Structure, and Properties	175
Jian Wang, Kaiye Zhang, Qiang Bu, Marino Lavorgna, and Hesheng Xia	
Effects of Graphene and Graphite on Properties of Highly Filled Polybenzoxazine Bipolar Plate for Proton Exchange Membrane Fuel Cell: A Comparative Study	211
Manunya Okhawilai, Anucha Pengdam, Ratcha Plengudomkit, and Sarawut Rimdusit	
Electrical Properties of Amorphous Carbon Nitride Thin Films for Pressure Sensor Applications	261
Masami Aono and Naoyuki Tamura	
Part III Organic Synthesis and Physical Chemistry	
Combination of Cross-Coupling and Metal Carbene Transformations for the Development of New Multicomponent Reactions	279
Lisa Moni, Andrea Basso, and Renata Riva	
Synthetic Molecular Springs: Stretched and Contracted Helices with Their Interconversions of Monosubstituted Polyacetylenes Prepared with a Rhodium Complex Catalyst	305
Yasuteru Mawatari and Masayoshi Tabata	
The Spin Coupling in the Polyaromatic Hydrocarbons and Carbon-Based Materials	327
Marilena Ferbinteanu, Cristina Buta, Ana Maria Toader, and Fanica Cimpoesu	
Electrocatalytic Hydrogen Production Properties of Polyaniline Doped with Metal-Organic Frameworks	373
Kabelo E. Ramohlola, Milua Masikini, Siyabonga B. Mdluli, Gobeng R. Monama, Mpitloane J. Hato, Kerileng M. Molapo, Emmanuel I. Iwuoha, and Kwena D. Modibane	
Plasma Bonding of Plastic Films and Applications	391
Kenichi Uehara, Lakshmi Reddy, Hiroaki Nishikawa, Satoru Kaneko, Yoshinobu Nakamura, Kazuhiro Endo, Paolo Mele, David Hui, Rieko Sudo, and Tamio Endo	
Part IV Characterization Tools	
Atomic Force Microscopy for Characterizing Nanocomposites	421
Yu Liu, Chao Bao, Heng-yong Nie, David Hui, Jun Mei, and Woon-ming Lau	
Editorial Note	443
Index	445

Carbon-related Materials in Recognition of Nobel
Lectures by Prof. Akira Suzuki in ICCE
Kaneko, S.; Mele, P.; Endo, T.; Tsuchiya, T.; Tanaka, K.;
Yoshimura, M.; Hui, D. (Eds.)
2017, XVII, 457 p. 330 illus., 217 illus. in color.,
Hardcover
ISBN: 978-3-319-61650-6
