Contents

Communications, Networks and Architectures

On the Impact of Using Public Network Communication Infrastructure for Voltage Control Coordination in Smart Grid Scenario. 3
  Kamal Shahid, Lennart Petersen, Florin Iov, and Rasmus L. Olsen

Energy Management Using a Situational Awareness-Centric Ad-Hoc Network in a Home Environment 15
  Tannaz Monajemi, Ardavan Rahimian, and Kamyar Mehran

Interference Assessment for the Spectrum Sharing Between IMT-2020 and Inter-satellite Service 25
  Bo Li, Zhaojun Qian, Shuaijun Liu, Chaowei Wang, Yinghai Zhang, and Weidong Wang

A Novel Transmission Line Safety Monitoring System for Smart Grid 35

Smart Control and Operation

Operation Optimisation Towards Generation Efficiency Improvement in Saudi Arabia, Using Mathematical Programming and Simulation 49
  Mohammad Althaqafi and Qingping Yang

Scheduling Domestic Shiftable Loads in Smart Grids: A Learning Automata-Based Scheme 58
  Rajan Thapa, Lei Jiao, B. John Oommen, and Anis Yazidi

An Explicit Battery Discharging Model to Enable Vehicle to Grid Services 69
  Sandford Bessler

Grid and Components

Intelligent Signal Processing for the Use in Device Identification Using Smart Sockets 81
  Al-Azhar Lalani, Emilio Mistretta, and Johann Siau

Design of a Seismic Hazard Risk Assessment Model for EHV Transmission Grid 87
  Ching-Ya Tseng, Chien-Hao Wang, Xiang-Yao Zheng, Huan-Chieh Chiu, and Joe-Air Jiang
   Chao Liu, Eng Tseng Lau, Kok Keong Chai, and Yue Chen

Data Management and Grid Analytics

Demand Profiling and Demand Forecast Using the Active-Aware-Based Ensemble Kalman Filter ................................. 111
   Eng Tseng Lau, Kok Keong Chai, and Yue Chen

A New Approach to the Analysis of Network Observability in Medium and Low Voltage Electrical Grids ......................... 122
   Guosong Lin, Sascha Eichstädt, Dirk Turschner, and Hans-Peter Beck

Deep Learning Based Consumer Classification for Smart Grid .................. 132
   Kálmán Tornai, András Oláh, Rajmund Drenyovszki, Lóránt Kovács, István Pintér, and János Levendovszky

Grid Resilience Governance of the Future: Analyzing the Role of Associations in Experimental Smart Grid Projects in The Netherlands .......... 142
   Imke Lammers and Alexandr Vasenev

Invited Papers

Analyzing Cyber Requirements for the Smart Grid Applications ............ 151
   Anurag K. Srivastava

Low-Disruptive and Timely Dynamic Software Updating of Smart Grid Components .......................................................... 155
   Martin Alexander Neumann, Christoph Tobias Bach, Yong Ding, Till Riedel, and Michael Beigl

Performance Evaluation of the Contention-Based Random Access of LTE Under Smart Grid Traffic ................................. 172
   Charalampos Kalalas, Francisco Vazquez-Gallego, and Jesus Alonso-Zarate

Mobile Secure Communications in Smart Grid Control ......................... 182
   Giovanna Dondossola and Roberta Terruggia

Congestion Probability Balanced Electric Vehicle Charging Strategy in Smart Grid ....................................................... 192
   Qiang Tang, Kun Yang, Yuan-sheng Luo, and Yu-yan Liu
IRENE Workshop

A Tool for Evolutionary Threat Analysis of Smart Grids
Tommaso Zoppi, Andrea Ceccarelli, and Marco Mori

A Tool that Uses Demand Side Management for Planning the Grid Response to Outages
Sandford Bessler, Daniel Hovie, and Oliver Jung

An Overall Grid Modelling Tool for Modelling Smart Grids
Eng Tseng Lau, Kok Keong Chai, and Yue Chen

A Modeling Framework to Support Resilient Evolution Planning of Smart Grids
Tommaso Zoppi, Sandford Bessler, Andrea Ceccarelli, Edward Lambert, Eng Tseng Lau, and Alexandr Vasenev

Outlining an ‘Evaluation Continuum’: Structuring Evaluation Methodologies for Infrastructure-Related Decision Making Tools
Alexandr Vasenev, Lorena Montoya, and Dan Ionita

WCSG Workshop

Optical Fibre-Based Environmental Sensors Utilizing Wireless Smart Grid Platform
Minglong Zhang, Kin Kee Chow, and Peter Han Joo Chong

Scalable Cloud-Based Data Storage Platform for Smart Grid
Hnin Yu Shwe, Soong Boon Hee, and Peter Han Joo Chong

Author Index

Contents XI
Smart Grid Inspired Future Technologies
2017, XI, 268 p. 99 illus., Softcover
ISBN: 978-3-319-61812-8
