Contents

Variation of the Structural Dynamic Characteristics of the Great Pyramid with the Limestone Properties. ................. 1
Mohamed Darwish

Structural Dynamic Characteristics of an Ancient Egyptian Obelisk. ......................................................... 12
Mohamed Rashwan and Mohamed Darwish

Seismic Performance of Masonry Arches and Vaults. ......................... 23
Mohd Aamir Khan and D.K. Paul

Analytically Derived Fragility Curves and Damage Assessment of Masonrybuildings ........................................ 42
Mustapha Remki and Fouad Kehila

Assessment of Response Modification Factor of Reinforced Concrete Table Top Frames Structures Subjected to Seismic Loads .............. 55
Yasser S. Salem, Giuseppe Lomiento, and Jawwad Khan

μ-Synthesis Control of a Seismic Excited Building ......................... 72
Karima Chaker, Abdelkrim Moussaoui, and Badreddine Sbartai

Design and Structural Dynamic Characteristics of an Irregular Staircase Under Earthquake Loading ....................................................... 83
John Magdy, Zeyad Khalil, Mohamed Ashraf, and Mohamed Darwish

Egyptian Code Seismic Load Design Provisions for Moment Resisting Frames ......................................................... 94
Ahmed Hossameldin Hanafy, Mohammed Darwish, and Moustafa Baraka

Magnetorheological Damper for Performance Enhancement Against Seismic Forces ......................................................... 104
C. Daniel, G. Hemalatha, Ajita Magdalene, D. Tensing, and S. Sundar Manoharan
I-495 in Wilmington, Delaware USA – The Leaning Towers; Lateral Squeeze Effects on Pile Supported Bridge Piers Due to Mudwave; Emergency Response and Retrofit ................................................. 281
Paul H. Moffitt, Bruce A. Shelly, Hany Fekry, and Karen Armfield

Mitigation of Exterior Beam Rotation in Bridge Construction Through Experimental Investigation of Different Bracing Systems .... 293
Md. Ashiquzzaman, Li Hui, Ahmed Ibrahim, Will Lindquist, and Riyadh Hindi

Seismic Assessment of Algerian Bridge ........................................ 307
Kehila Fouad, Remki Mustapha, and Kibboura Abderrahmane

Non-linear Soil-Structure Interaction Analysis of Multi-storey Shear Wall Buildings with Site Specific Ground Response ............ 318
B.R. Jayalekshmi and H.K. Chinmayi

Statistical Prediction Equations for RC Deep Beam Without Stirrups ................................................................. 329
Ahmed I. Ramadan and Aly G. Aly Abd-Elshafy

A Time-Stepping DRBEM for 3D Anisotropic Functionally Graded Piezoelectric Structures Under the Influence of Gravitational Waves .......................................................... 350
Mohamed Abdelsaobour Fahmy

Nonlinear Transient Vibration Analysis of Arbitrary Thin Plates Using Superparametric Element ..................................... 366
Saleema Panda and Manoranjan Barik

Experimental Investigation on Shell Footing Models Employing High-Performance Concrete .............................................. 373
R. Rinaldi, M. Abdel-Rahman, and A. Hanna

Automated Data Collection for Progress Tracking Purposes: A Review of Related Techniques ........................................... 391
Tarek Omar and Moncef L. Nehdi

Health Monitoring of Civil Infrastructures Designed with Pre-stressing Steel .......................................................... 406
Md. Shahidul Islam

Fatigue Analysis of FRP Strengthened RC Slabs Reinforced with Plain Bars Under Moving Load ............................................. 419
Ahmed Attia M. Drar and Takashi Matsumoto

Strength and Ductility of Steel Cold-Formed Section Beam to Column Bolted Connections ........................................... 431
Ehab H.A.H. Aly, Maged T. Hanna, and Ghada M. El-Mahdy
Experimental Investigation on Link Column Frame System for Reinforced Concrete Structures .............................. 446
J. Joel Shelton, G. Hemalatha, and R. Venkatesh

Dynamic Impedance Functions of a Square Foundation Estimated with an Equivalent Linear Approach ............................ 460
Badreddine Sbartai

Experience of Using Total Station and GNSS Technologies for Tall Building Construction Monitoring ........................ 471
Irineu da Silva, Wernher Ibañez, and Guilherme Poleszuk

An Analytical Study of Improving Beam-Column Joints Behavior Under Earthquakes ........................................... 487
Mohamed I.S. Elmasry, Ahmed M. Abdelkader, and Essam A. Elkordy

Author Index .......................................................... 501
Facing the Challenges in Structural Engineering
Proceedings of the 1st GeoMEast International
Congress and Exhibition, Egypt 2017 on Sustainable
Civil Infrastructures
Rodrigues, H.; Elnashai, A.; Calvi, G.M. (Eds.)
2018, X, 502 p. 393 illus., Softcover
