

Contents

1	Introduction to Plasma	1
1.1	What Is Plasma?	1
1.2	Space Plasma Environments	4
1.3	A Brief History of Space Research	8
1.3.1	From the Structure of Matter to the Solar System	9
1.3.2	Post-World War-II Period	12
1.4	Plasma Parameters and Characteristics	15
	References	19
2	Basic Electromagnetic Theory	21
2.1	Electric Field	21
2.2	Electric Potential Energy	23
2.3	Magnetic Field	24
2.4	Electromagnetic Field	26
2.5	Electric Currents	27
2.6	An Overview of Maxwell Equations of Electromagnetic Field in Vacuum	28
2.7	Electromagnetic Energy Flow: Poynting Flux	29
2.8	Electromagnetic Spectrum and Photons	30
2.9	Single Particle Motion in Electromagnetic Fields	33
2.10	Concept of Phase Space—Collection of Particles	36
2.11	Collisions	37
2.12	A Useful Mathematical Note: Summation and Product Notations	39
2.13	Concluding Remarks	40
	References	40
3	Transport Processes in Plasma	41
3.1	Introduction	42
3.2	Boltzmann Equation	43

3.3	Moments of Distribution Functions	45
3.4	Transport Equations	48
3.5	Maxwellian Distribution	50
3.6	Ion Diffusion	51
	3.6.1 Major Ion Diffusion	51
	3.6.2 Minor Ion Diffusion	53
3.7	Electric Conductivities and Currents	53
	3.7.1 Equation of Plasma Motion	54
	3.7.2 Unmagnetized Plasma	54
	3.7.3 Magnetized Plasma	55
3.8	Partial and Convective Derivatives	58
3.9	Stress Tensor	60
3.10	Navier-Stokes Equations	61
3.11	Introduction to Magnetohydrodynamics (MHD)	63
3.12	Basic MHD Equations	64
3.13	Summary of Transport Properties	65
	References	66
4	Planetary Ionospheres	67
4.1	Introduction to the Ionosphere	68
4.2	Diffusive Equilibrium	69
4.3	The Terrestrial Magnetic Field	71
4.4	Magnetic Coordinates	74
4.5	Chemical Processes	76
	4.5.1 Electronic Structure of Elements	76
	4.5.2 Chemical Kinetics	78
	4.5.3 Reaction Rates	80
	4.5.4 Chemical Continuity Equation	83
4.6	Ionization Processes and Solar Radiation	84
4.7	Chapman Layers	85
4.8	Earth's Ionosphere	88
	4.8.1 D Region	93
	4.8.2 E Region	93
	4.8.3 F Region	94
	4.8.4 Dynamo Layer	94
4.9	Mars Ionosphere	95
	4.9.1 General Characteristics	95
	4.9.2 Formation of the Ionosphere	96
4.10	Space Weather	98
4.11	A Summary of the Key Properties of Planetary Ionospheres	99
	References	100

5 Dynamics of the Atmosphere-Ionosphere System 103

5.1 Introduction 104

5.2 Modeling Planetary Upper Atmospheres and Ionospheres 106

5.2.1 General Circulation Modeling
of the Atmosphere-Ionosphere System 106

5.2.2 Complexity 109

5.2.3 Dynamics 110

5.2.4 Energetics 113

5.3 Meteorological Influences on the Upper Atmosphere 115

5.4 Thermospheric Vertical Winds and Coupling
to the Ionosphere-Magnetosphere 121

5.5 Space Weather Effects 121

5.6 Geomagnetic Storm Effects on the Upper Atmosphere 123

5.7 Concluding Remarks 127
