# Contents

An Information Retrieval Approach for Finding Dependent Subspaces of Multiple Views.................................................. 1  
*Ziyuan Lin and Jaakko Peltonen*

Predicting Target Events in Industrial Domains............................. 17  
*Julio Borges, Martin A. Neumann, Christian Bauer, Yong Ding,  
Till Riedel, and Michael Beigl*

Importance of Recommendation Policy Space in Addressing Click Sparsity in Personalized Advertisement Display................................ 32  
*Sougata Chaudhuri, Georgios Theocharous,  
and Mohammad Ghavamzadeh*

Global Flow and Temporal-Shape Descriptors for Human Action Recognition from 3D Reconstruction Data............................. 47  
*Georgios Th. Papadopoulos and Petros Daras*

Reverse Engineering Gene Regulatory Networks Using Sampling and Boosting Techniques................................................. 63  
*Turki Turki and Jason T.L. Wang*

Detecting Large Concept Extensions for Conceptual Analysis............. 78  
*Louis Chartrand, Jackie C.K. Cheung,  
and Mohamed Bouguessa*

Qualitative and Descriptive Topic Extraction from Movie Reviews Using LDA............................................................... 91  
*Christophe Dupuy, Francis Bach, and Christophe Diot*

Towards an Efficient Method of Modeling “Next Best Action” for Digital Buyer’s Journey in B2B.............................................. 107  
*Anit Bhandari, Kiran Rama, Nandini Seth, Nishant Niranjan,  
Parag Chitalia, and Stig Berg*

Detecting Relative Anomaly..................................................... 117  
*Richard Neuberg and Yixin Shi*

Optimization for Large-Scale Machine Learning with Distributed Features and Observations.............................................. 132  
*Alexandros Nathan and Diego Klabjan*
CCPM: A Scalable and Noise-Resistant Closed Contiguous Sequential Patterns Mining Algorithm ........................................ 147
Yacine Abboud, Anne Boyer, and Armelle Brun

Sparse Dynamic Time Warping ........................................ 163
Youngha Hwang and Saul B. Gelfand

Improving a Bayesian Decision Model for Supporting Diagnosis of Alzheimer’s Disease and Related Disorders ........ 176
Carolina Medeiros Carvalho, Flávio Luiz Seixas, Aura Conci, Débora Christina Muchaluat-Saade, and Jerson Laks

Over-Fitting in Model Selection with Gaussian Process Regression .............. 192
Rekar O. Mohammed and Gavin C. Cawley

Machine Learning-as-a-Service and Its Application to Medical Informatics . . 206
Ahmad P. Tafti, Eric LaRose, Jonathan C. Badger, Ross Kleiman, and Peggy Peissig

Anomaly Detection from Kepler Satellite Time-Series Data ....................... 220
Nathaniel Grabaskas and Dong Si

Prediction of Insurance Claim Severity Loss Using Regression Models .......... 233
Ruth M. Ogunnaike and Dong Si

A Spectral Clustering Method for Large-Scale Geostatistical Datasets .......... 248
Francky Fouedjio

Vulnerability of Deep Reinforcement Learning to Policy Induction Attacks .................. 262
Vahid Behzadan and Arslan Munir

Mobile Robot Localization via Machine Learning ................................... 276
Alexander Kuleshov, Alexander Bernstein, and Evgeny Burnaev

An Analysis of the Application of Simplified Silhouette to the Evaluation of $k$-means Clustering Validity ........................................... 291
Fei Wang, Hector-Hugo Franco-Penya, John D. Kelleher, John Pugh, and Robert Ross

Summarization-Guided Greedy Optimization of Machine Learning Model .................. 306
Dymitr Ruta, Ling Cen, and Ernesto Damiani

Clustering Aided Support Vector Machines ........................................... 322
Goce Ristanoski, Rahul Soni, Sutharshan Rajasegarar, James Bailey, and Christopher Leckie
