Part I Background on POD and MAPOD Approach	
1 Recommendation Documents on Statistical Methodology Dedicated to POD Analysis	3
2 Documentation and Recent Initiatives on the Use of Simulation in the Context of POD	5
Part II Advantages and Limitations of the Simulation	
3 Advantages of Simulation	9
4 Difficulties, Limitations	11
Human Factors	11
Lack of Knowledge on Influential Parameters, Epistemic and Aleatory Uncertainties	12
Identification of Aleatory Parameters.	13
Knowledge of Statistical Distributions of Aleatory Parameters	13
Availability of Suitable and Validated Models	14
5 Possible Ways of Using Simulation in the Context of POD Curve Estimation	15
Part III Prerequisites for the Use of Simulation	
6 Validation of the Software Tools	19
7 Training/Expertise of the Operators	21

Part IV Methodology and Guidance

8 Basics of Statistics for POD 25

POD Curves 25

Hit/Miss Analysis 27

Signal Response (or \hat{a} vs. a) 28

Noise and Probability of False Alarms (PFA) 30

Min(POD) > 0 and/or Max(POD) < 1. 31

Variation of Sensitivity in the Inspected Zone. 32

9 Best Practices Principles and Guidance for POD Curves

Estimation Using Simulation 33

Step 1: Input of Nominal Values of Parameters 35

Step 2: Description of Aleatory Uncertainties (Variability of Influential Parameters). 36

Step 3: Simulations 38

Step 4: Analysis of the Results and Computation of the POD Curve. 39

Step 5: Evaluation of the Reliability of a Simulated POD Curve 40

Step 6: Report. 43

10 Best Practice Principles and Guidance for the Exploitation of Simulated POD Data in Relation with Experimental Data 45

Complement an Experimental Data Set for Estimation of a POD Curve 45

Comparison Between Experimental POD Curves and POD Curves Estimated by Simulation 46

Optimization of the Design of Experiments in a POD Study 47

Quantification of the Impact of an Additional Parameter. 47

Quantification of the Influence of a Change in the Inspection Procedure 48

Modify the Procedure to Bring Back a POD Curve to an Acceptable Value 49

Conclusion 51

Appendix: Specificities of AUT Systems Using Zonal Discrimination Method. 53
