

Contents

Part I Energy

Decarbonising the Finnish Transport Sector by 2050—Electricity or Biofuels?	3
Klaus Skytte and Rasmus Bramstoft Pedersen	
Modelling Electricity Generation from Sugarcane Production System Using Systems Dynamics	23
Mutanga Shingirirai Savious and Marne De Vries	
Techno-Economic Viability of Husk Powered Systems for Rural Electrification in Uganda: Part I: Sustainability and Power Potential Aspects	37
Yonah K. Turinayo and Mackay A.E. Okure	
Techno-Economic Viability of Husk Powered Systems for Rural Electrification in Uganda: Part II: Economic and Policy Aspects	53
Mackay A.E. Okure, Yonah K. Turinayo and Samuel B. Kucel	
Stand-Alone Wind or Photovoltaic Power System: A Holistic Approach for System Design and Selection.	75
Yatindra Kumar Ramgolam and Roobesh Thumiah	
Energie Hill Neu Wulmstorf—Reuse of a Former Landfill Site for Energy Production from Renewable Energy.	93
Stefan Lübben and Tilmann Wolfsteller	
Assessing Energy Potential from Waste Tyres in Mauritius by Direct Combustion, Pyrolysis and Gasification.	113
Akshaye Rekhaye and Pratima Jeetah	
A Review of Thermochemical Technologies for the Conversion of Waste Biomass to Biofuel and Energy in Developing Countries	127
Y.P. Rago, R. Mohee and D. Surroop	

An Energy Balance Analysis of Municipal Solid Wastes (MSW) for Power Production in Fiji	145
Shirleen Swapna and Anirudh Singh	
Potential of Small-Scale Power Generation from the MSW Incineration Techniques in Fiji	157
Arvind Kumar and Anirudh Singh	
Replacing Fossil Fuel with PV Systems Through Technical Capacity Building in Kenya	171
Izael Da Silva, Ronoh Geoffrey, Teddy Nalubega and Mwaura Njogu	
Design Technology for Bioenergy Conversion of Organic Fraction of Municipal Solid Waste	181
Anthony Njuguna Matheri, Charles Mbohwa, Mohamed Belaid and Jane Catherine Ngila	
Part II Environment	
<i>Zymomonas mobilis</i>—Towards Bacterial Biofuel	205
Kim G. Clarke, Thapelo Mokomele, Linda H. Callanan and Jeanne Groenewald	
Co-digestion of Lawn Grass with Cow Dung and Pig Manure Under Anaerobic Condition	221
Suraya Singh, Anthony Njuguna Matheri, Mohamed Belaid and Edison Muzenda	
Application of Different Pre-treatment Techniques for Enhanced Biogas Production from Lawn Grass: A Review	245
N.T. Sibiyi, H. Tesfagiorgis and E. Muzenda	
Design and Operation of a Single-Stage Plug-Flow Digester Using Organic Wastes Generated from University of Mauritius Cafeteria	257
Geeta Somaroo, Santaram Venkannah, Anuksha Boojhawon, Sanjana Gunasee, Romeela Mohee and Hemraj Ramnarain	
Possible Absorbent Regeneration in Biogas Purification and Upgrading: A Review	273
O.I. Maile, H. Tesfagiorgis and E. Muzenda	
Wastewater Biorefineries: Integrating Water Treatment and Value Recovery	289
Robert Pott, Madelyn Johnstone-Robertson, Bernelle Verster, Shilpa Rumjeet, Lefa Nkadimeng, Tayana Raper, Sharon Rademeyer and Susan T.L. Harrison	

Part III Climate Change

Small is Beautiful: Why a Club Approach is the Way to Go in Climate Change Mitigation. 305
 Rafael Leal-Arcas

Contextualizing of Organized Labour Position on Carbon Tax in South Africa Using a Qualitative System Dynamics Model 319
 Martin Kaggwa

A Step-by-Step Calculation of the Combined Margin Grid Emission Factor of the National Electricity System of Mauritius 331
 Prakash N.K. Deenapanray and Sanjay Sookhraz

Greenhouse Gas Emission Reductions from Solid Waste Management: Prognosis of Related Issues. 347
 Sunjaya Leelah and Ackmez Mudhoo

Assessing the Implementation of Eco-Driving in Mauritius—A Climate Change Mitigation Measure 367
 Joanna Doorghen-Gorden, Manta Devi Nowbuth and Virendra Proag

The Nexus Energy, Environment and Climate Change: Future Trends 383
 Walter Leal Filho

<http://www.springer.com/978-3-319-63611-5>

The Nexus: Energy, Environment and Climate Change

Leal Filho, W.; Surroop, D. (Eds.)

2018, X, 388 p. 130 illus., 76 illus. in color., Hardcover

ISBN: 978-3-319-63611-5
