# Contents

1. **Utility of Endoscopy in the Diagnosis of Hiatus Hernia and Correlation with GERD** ........................................ 1  
   Francesca M. Dimou, Candace Gonzalez, and Vic Velanovich

2. **The Role of MRI in GERD** ........................................ 17  
   Christiane Kulinna-Cosentini

3. **Utility of Ambulatory Esophageal pH and High-Resolution Manometry in the Diagnosis of Gastro-Esophageal Reflux Disease and Hiatal Hernia** ........................................ 29  
   Daphne Ang and Mark Fox

4. **Preoperative Diagnostic Workup for GERD and Hiatal Hernia: An Evidence and Experience-Based Approach** ....................... 51  
   Geoffrey P. Kohn

5. **Indications and Procedures for Surgical Therapy of GERD with Hiatal Hernia** ........................................ 73  
   Monica T. Young and Brant K. Oelschlager

6. **Anterior Versus Posterior Fundoplication, Are They Equal?** ........ 93  
   Courtney Olmsted and Peter Nau

7. **Novel Endoscopic Antireflux Procedures: Do They Have a Role in Patients with Hiatus Hernia?** ....................... 105  
   George Triadafilopoulos

8. **Magnetic Sphincter Augmentation for Symptomatic Small Hiatus Hernia** ........................................ 123  
   Luigi Bonavina, Andrea Sironi, and Emanuele Asti

9. **Laparoscopic Repair of Paraesophageal Hiatus Hernia: Suture Cruroplasty or Prosthetic Repair** ....................... 131  
   Manjunath Siddaih-Subramanya, Breda Memon, and Muhammed Ashraf Memon
10 Lower Esophageal Sphincter Efficacy Following Laparoscopic Antireflux Surgery with Hiatal Repair: Role of Fluoroscopy, High-Resolution Impedance Manometry and FLIP in Detecting Recurrence of GERD and Hiatal Hernia. ........................................ 153
Vivien Wong, Barry McMahon, and Hans Gregersen

11 Adverse Outcome and Failure Following Laparoscopic Anti-reflux Surgery for Hiatal Hernia: Is One Fundoplication Better than Other? ................................................................. 169
Ciro Andolfi and Marco P. Fisichella

12 Post-operative HRIM and FLIP for Dysphagia Following Antireflux Procedures ........................................ 179
John Pandolfino and Dustin Carlson

13 Preoperative Assessment of Failed Fundoplication with Recurrent Hiatal Hernia ........................................ 197
Kenan Ulualp, Kathleen Simon, and Jon C. Gould

14 Recurrent GERD After a Fundoplication: Failure or Wrong Procedure ......................................................... 209
S. Mittal

15 Management of Recurrent Paraesophageal Hernia .......... 223
John H. Rodriguez and Jeffrey Ponsky

16 Revision Strategies for Recurrent Paraesophageal Hiatal Hernia ................................................................. 233
Jeffrey R. Watkins and Ralph W. Aye

17 Long-Term Results After Laparoscopic Reoperation for Failed Antireflux Procedure ........................................ 255
Giusppe Quero, Alfonso Lapergola, Ludovica Guerriero, and Bernard Dallemagne

18 Utility of the Robot in Revisional Paraesophageal Hiatus Hernia ............................................................. 269
Maamoun Harmouch, Erik B. Wilson, Peter A. Walker, and Shinil K. Shah

19 Quality of Life Following Laparoscopic Antireflux Surgery for Primary and Recurrent Gastroesophageal Reflux Disease ................................................................. 281
Ilmo Kellokumpu and Eero Sihvo

Index ................................................................. 303
Hiatal Hernia Surgery
An Evidence Based Approach
Memon, M.A. (Ed.)
2018, X, 309 p. 122 illus., 87 illus. in color., Hardcover
ISBN: 978-3-319-64002-0
