# Contents

1 Wireless Technology for Vehicles ........................................... 1  
  1.1 Wireless Local Area Networks ........................................... 2  
  1.2 Expanding the Mobility Domain of WLANs .......................... 4  
    1.2.1 Vehicular Communications .................................... 5  
    1.2.2 V2V and R2V Communications .................................. 5  
  1.3 Autonomous and Connected Vehicles Vision ......................... 7  
  1.4 Wireless Technologies for Vehicles .................................... 9  
    1.4.1 Cellular Networks and D2D Communication ................. 10  
    1.4.2 802.1x Technologies ........................................... 12  
    1.4.3 Cognitive Radio ................................................ 13  
  1.5 802.11-Based VC: Challenges ......................................... 13  
    1.5.1 Disruption Tolerance ........................................... 13  
    1.5.2 Handover Latency .............................................. 15  
    1.5.3 Security Issues .................................................. 16  
  1.6 Summary ................................................................ 16  

2 Basics of Vehicular Communication ....................................... 19  
  2.1 Disruption Tolerant Networking ......................................... 20  
    2.1.1 Systems and Architectures ..................................... 20  
    2.1.2 New and Modified Protocols .................................. 23  
    2.1.3 Prediction-Based Techniques .................................. 25  
  2.2 Handover Latency in Wireless Networks .............................. 27  
    2.2.1 Detection, Search, and Probing Delay ......................... 28  
    2.2.2 Authentication and Address Allocation Delay ............... 30  
  2.3 Handovers in Vehicular Communication .............................. 31  
    2.3.1 Mobility Management and Heterogeneity .................... 34  
  2.4 IEEE Standards for Vehicular Communication ....................... 35  
    2.4.1 Wireless Access in Vehicular Environments: 802.11p ...... 36  
    2.4.2 Fast Transition: 802.11r ........................................ 37  
    2.4.3 High Throughput: 802.11n ..................................... 38
6 Inter ISP Roaming for Vehicular Communications

6.1 Intra- and Inter ISP Roaming
6.2 Wireless Internet Service Provider Roaming
   6.2.1 WISPr Architecture
6.3 Wireless Roaming for Data Offloading
6.4 Modifications in HMM
   6.4.1 Effectiveness of WISPr
6.5 Summary

7 Handover Latency in Vehicular Communication

7.1 Handovers in WLANs
7.2 Experiments and Observations
   7.2.1 Measurement Setup
   7.2.2 Observations in Vehicular Environments
7.3 Latency Analysis
   7.3.1 DHCP Delay
   7.3.2 EAP Delay
   7.3.3 Scanning Delay
   7.3.4 Delays Due to Background Applications
7.4 Reducing Scanning Phase Delay
   7.4.1 Scanning Orthogonal Channels
   7.4.2 AP Performance on Orthogonal Channels
7.5 Summary

8 Cellular Technology-Based Vehicular Communication

8.1 Vehicular D2D Communication
   8.1.1 Quality of Service Issues
   8.1.2 Contextual Awareness
8.2 D2D Support in LTE-A Networks
8.3 Resource Allocation
   8.3.1 Vehicular Perspective
   8.3.2 Moving Personal Cells
   8.3.3 State of the Art: Resource Allocation
8.4 Device Discovery
   8.4.1 Dedicated Discovery Resources
   8.4.2 Existing Discovery Mechanisms
8.5 Summary

9 Epilogue

9.1 Future of ITS
9.2 Disruption Tolerance
9.3 Handover Latency
9.4 D2D-based Vehicular Communication
9.5 Data Handling in Vehicular Sensor Networks
9.6 Location Invariant Models
