Contents

1 Illusions Are Fun ................................................................. 1
   How Does It Work? ......................................................... 3
   Is Everything Just an Illusion? ....................................... 4
   How Are Illusions Discovered? ....................................... 6
   Classifications ............................................................. 10
   The Case of Brightness .................................................. 12
   Geometrical Illusions and Illusions of Ambiguity ................. 14

2 Programming Is Fun .......................................................... 19
   Python® ......................................................................... 20
   Setting Up ...................................................................... 21
   Introduction to Programming ......................................... 22
   Lists and Strings ............................................................ 25
   Python As a Pocket Calculator ....................................... 28
   Controlling the Flow ....................................................... 30
   Indentations .................................................................. 33

3 PsychoPy Is Fun ................................................................. 37
   Writing a Script in the Coder Editor ............................... 39
   Creating a Python Object (a Window) .............................. 41
   Our Canvas ..................................................................... 43
   Creating a Python Object (a Clock) ................................. 44
   A Setup for All Our Illusions ......................................... 45
   Different Types of Functions ......................................... 47

4 Kanizsa Square ................................................................. 49
   The Kanizsa.py Program ............................................... 52
   Extra Programming Challenge for Extra Fun .................... 62

5 Ponzo Illusion ................................................................. 63
   The Ponzo.py Program ................................................... 65
   Extra Programming Challenge for Extra Fun .................... 71
