## Contents

Degree Associated Reconstruction Number of Biregular Bipartite Graphs Whose Degrees Differ by at Least Two ........................................... 1  
A. Anu and S. Monikandan

1-Normal DRA for Insertion Languages ........................................... 10  
Abhisek Midya, Lakshmanan Kuppusamy, V.S. Sumitha, and Alok Kumar Pani

Formal Language Representation and Modelling Structures Underlying RNA Folding Process ........................................... 20  
Anand Mahendran and Lakshmanan Kuppusamy

Homometric Number of a Graph and Some Related Concepts ............. 30  
Anu V. and Aparna Lakshmanan S.

Forbidden Subgraphs of Bigraphs of Ferrers Dimension 2 ................. 38  
Ashok Kumar Das and Ritapa Chakraborty

Global Secure Domination in Graphs ........................................... 50  
S.V. Divya Rashmi, S. Arumugam, and A. Somasundaram

A Novel Reversible Data Hiding Method in Teleradiology to Maximize Data Capacity in Medical Images ........................................... 55  
S. Fepslin Athish Mon, K. Suthendran, K. Arjun, and S. Arumugam

Indicated Coloring of Cartesian Product of Graphs .......................... 63  
P. Francis and S. Francis Raj

A Bi-level Security Mechanism for Efficient Protection on Graphs in Online Social Network ........................................... 69  
D. Franklin Vinod and V. Vasudevan

On Nearly Distance Magic Graphs ........................................... 76  
Aloysius Godinho, T. Singh, and S. Arumugam

Evenly Partite Directed Bigraph Factorization of Wreath Product of Graphs .... 83  
P. Hemalatha

Minimum Layout of Circulant Graphs into Certain Height Balanced Trees .... 90  
Jessie Abraham and Micheal Arockiaraj

Dissecting Power of Certain Matrix Languages ................................ 98  
J. Julie, J. Baskar Babupee, and V. Masilamani
Degree Associated Reconstruction Number of Split Graphs
with Regular Independent Set ........................................ 106
   N. Kalai Mathi and S. Monikandan

Distance Antimagic Labelings of Graphs .......................... 113
   N. Kamatchi, G.R. Vijayakumar, A. Ramalakshmi, S. Nilavarasi, and S. Arumugam

Probabilistic Conjunctive Grammar .............................. 119
   K. Kanchan Devi and S. Arumugam

(1, 2)-Domination in Graphs ...................................... 128
   K. Kayathri and S. Vallirani

New Construction on SD-Prime Cordial Labeling ................. 134
   A. Lourdusamy and F. Patrick

Dominator Coloring of Generalized Petersen Graphs ................ 144
   J. Maria Jeyaseeli, Nazanin Movarraei, and S. Arumugam

Super Edge-Antimagic Gracefulness of Disconnected Graphs ........ 152
   G. Marimuthu and P. Krishnaveni

Mixed Noise Elimination and Data Hiding for Secure Data Transmission .... 156
   P. Mohanakrishnan, K. Suthendran, S. Arumugam, and T. Panneerselvam

Analysis of Particle Swarm Optimization Based 2D FIR Filter
for Reduction of Additive and Multiplicative Noise in Images ........ 165
   V. Muneeswaran and M. Pallikonda Rajasekaran

Irregularity Strength of Corona of Two Graphs .................... 175
   K. Muthu Guru Packiam, T. Manimaran, and A. Thuraiswamy

l-Distant Irregularity Strength of Graphs ......................... 182
   K. Muthu Guru Packiam, T. Manimaran, and A. Thuraiswamy

Cloud Data Security Based on Data Partitions and Multiple Encryptions .... 191
   B. Muthulakshmi and M. Venkatesulu

Upper Majority Domination Number of a Graph ..................... 197
   A. Muthuselvi and S. Arumugam

Super (a, 3)-edge Antimagic Total Labeling for Union of Two Stars ........ 203
   M. Nalliah and S. Arumugam

On Determinant of Laplacian Matrix and Signless Laplacian Matrix
of a Simple Graph .................................................. 212
   Olayiwola Babarinsa and Hailiza Kamarulhaili
On the Complexity of Minimum Cardinality Maximal Uniquely Restricted Matching in Graphs .................................................. 218  
B.S. Panda and Arti Pandey

Partial Grundy Coloring in Some Subclasses of Bipartite Graphs and Chordal Graphs .................................................. 228  
B.S. Panda and Shaily Verma

On Prime Distance Labeling of Graphs ........................................ 238  
A. Parthiban and N. Gnanamalar David

Dominator Colorings of Products of Graphs .................................. 242  
P. Paulraja and K. Raja Chandrasekar

Efficient Hybrid Approach for Compression of Multi Modal Medical Images ................................................................. 251  
B. Perumal, M. Pallikkonda Rajasekaran, and T. Arun Prasath

The Median Problem on Symmetric Bipartite Graphs ....................... 262  
K. Pravas and A. Vijayakumar

Intuitionistic Fuzzy Automaton with Unique Membership and Unique Nonmembership Transitions .................................. 271  
K. Jency Priya and T. Rajaretnam

Independent 2-Point Set Domination in Graphs ............................... 281  
Purnima Gupta and Deepti Jain

On Graphs Whose Graphoidal Length Is Half of Its Size ................. 289  
Purnima Gupta and Rajesh Singh

Point-Set Domination in Graphs. VIII: Perfect and Efficient PSD Sets ............................................................... 300  
Purnima Gupta, Alka, and Rajesh Singh

Graphoidal Length and Graphoidal Covering Number of a Graph .......... 305  
Purnima Gupta, Rajesh Singh, and S. Arumugam

An Overview of the MapReduce Model ........................................ 312  
S. Rajeswari, K. Suthendran, K. Rajakumar, and S. Arumugam

Identification of Salinity Stress Tolerant Proteins in Sorghum Bicolor Computational Approach ........................................... 318  
S. Rajeswari, M. Indhumathy, A. Somasundaram, Neeru Sood, and S. Arumugam

On Total Roman Domination in Graphs ....................................... 326  
P. Roushini Leely Pushpam and S. Padmapriya
Restrained Differential of a Graph. P. Roushini Leely Pushpam and D. Yokesh 332
The Distinguishing Number of Kronecker Product of Two Graphs Saeid Alikhani and Samaneh Soltani 341
3-Simple 2-Fold 5-Cycle Systems R. Sangeetha and A. Muthusamy 357
ANN-Based Bias Correction Algorithm for Precipitation in the Yarra River Basin, Australia P. Saravanan, C. Sivapragasam, M. Nitin, S. Balamurali, R.K. Ragul, S. Sundar Prakash, G. Selva Ganesan, and V. Vel Murugan 362
Some Diameter Notions of the Generalized Mycielskian of a Graph K.S. Savitha, M.R. Chithra, and A. Vijayakumar 371
Statistical Approach to Trace the Source of Attack Based on the Variability in Data Flows T. Subburaj, K. Suthendran, and S. Arumugam 392
Independent Resolving Number of Convex Polytopes B. Suganya and S. Arumugam 401
Signed Cycle Domination in Planar Graphs M. Sundarakannan and S. Arumugam 409
An Optimization Algorithm for Task Scheduling in Cloud Computing Based on Multi-Purpose Cuckoo Seek Algorithm R. Sundarrajan and V. Vasudevan 415
$P_3$-Factorization of Triangulated Cartesian Product of Complete Graph of Odd Order A. Tamil Elakkiya and A. Muthusamy 425
Further Progress on the Heredity of the Game Domination Number Tijo James, Paul Dorbec, and Ambat Vijayakumar 435
Modeling of Dissolved Oxygen Using Genetic Programming Approach  
  S. Vanitha, C. Sivapragasam, and N.V.N. Nampoothiri  

A Stream Cipher for Real Time Applications  
  M. Venkatesulu and M. Ravi  

Erratum to: On Total Roman Domination in Graphs  
  P. Roushini Leely Pushpam and S. Padmapriya
