Contents

Part I  Airplane Aerodynamics/Propulsion Integration

Numerical Investigation of Slot and Configuration Impact on the Efficiency of Tangential Blowing at a Vertical Tailplane with Infinite Span ............................................ 3
Anna Gebhardt and Jochen Kirz

Steady and Unsteady Numerical Simulation of a Bent Intake Geometry ............................................. 15
Thomas Kächele, Tim Schneider and Reinhard Niehuis

Numerical and Experimental Investigation of a Helicopter Engine Side Intake .................................................. 27
Florian Knoth and Christian Breitsamter

Simulations of Streamwise Vortices on a High-Lift Wing with UHBR-Engine ........................................... 39
Tim Landa, Rolf Radespiel and Sebastian Ritter

Aerodynamic Assessment of Pylon-Mounted Over-the-Wing Engine Installations on a STOL Commercial Aircraft Concept .................... 51
Luciana Savoni and Ralf Rudnik

Unsteady Simulation of the Separated Wake of a Transport Aircraft by Detached Eddy Simulation ........................... 61
Andreas Waldmann, Thorsten Lutz and Ewald Krämer

Part II  Turbulence Research and Turbulence Modeling

Revisiting the Higher-Order Statistical Moments in Turbulent Pipe Flow Using Direct Numerical Simulations .......................... 75
Christian Bauer, Daniel Feldmann and Claus Wagner
A New Experiment of a Turbulent Boundary Layer Flow at Adverse Pressure Gradient for Validation and Improvement of RANS Turbulence Models .................................................. 85
Tobias Knopp, Matteo Novara, Daniel Schanz, Erich Schülein, Andreas Schröder, Nico Reuther and Christian J. Kähler

Optical Skin Friction Measurements in a Turbulent Boundary Layer with Pressure Gradient .................................. 95
Erich Schülein, Nico Reuther and Tobias Knopp

Characterization of Turbulence Generated by an Active Grid with Individually Controllable Paddles ....................... 105
T. Skeledzic, J. Krauss, H. Lienhart, Ö. Ertunc and J. Jovanovic

Part III Hypersonic Aerodynamics

Stagnation Point Probes in Hypersonic Flow ............................. 117
Syed Raza Christopher Ali, Rafael Zárate Cárdenas, Rolf Radespiel, Thomas Schilden and Wolfgang Schröder

PIV Measurements of Shock/Cooling-Film Interaction at Varying Shock Impingement Position .......................... 129
Pascal Marquardt, Michael Klaas and Wolfgang Schröder

Calibration of Fast-Response Temperature Sensitive Paints for Their Application in Hypersonic High Enthalpy Flows ............ 141
Jan Martinez Schramm, Frank Edzards and Klaus Hannemann

Part IV Laminar Flow Control and Transition

Redesigned Swept Flat-Plate Experiment for Crossflow-Induced Transition Studies ........................................... 155
Hans Peter Barth, Stefan Hein and Henning Rosemann

Experimental and Numerical Investigation on Delta-Wing Post-stall Flow Control ........................................ 167
Andrei Buzica and Christian Breitsamter

Extension of the PSE Code NOLOT for Transition Analysis in Rotating Reference Frames ............................ 179
Xavier Dechamps and Stefan Hein

Numerical Simulations of the High-Enthalpy Boundary Layer on a Generic Capsule Geometry with Roughness ............ 189
Antonio Di Giovanni and Christian Stemmer

One-Equation Transition Model for Airfoil and Wing Aerodynamics ................................................................. 199
M. Fehrs
Experimental Investigation of a Dynamically Forced Impinging Jet Array .......................................... 209
Frank Haucke and Arne Berthold

Linear and Nonlinear Growth of Secondary Instabilities of Stationary Crossflow Vortices Studied by Parabolized Stability Equations ........................................... 219
Stefan Hein

Flow Manipulation by Standing Acoustic Waves and Visualization with Background Oriented Schlieren (BOS) .......... 229
Christian Kiefer, Dara Feili, Karin Bauer and Helmut Seidel

Air Outlet Design for a Passively Driven Hybrid Laminar Flow Control System ........................................ 239
Udo Krause, Peter Kreuzer and Hubert Stuke

Determination of the Critical Cross Flow N-factor for the Low-Speed Wind Tunnel Braunschweig (DNW-NWB) .......... 251
Martin Kruse, Albert Küpper, Rouven Petzold and Federico Munoz

Experimental Studies on the Receptivity of Stationary Crossflow Modes to Pneumatic Actuation .......................... 263
J. Lohse, A. Berthold and W. Nitsche

Direct TS-Wave Simulation on a Laminar Wing-Profile with Forward-Facing Step ..................................... 275
Heinrich Lüdeke and Kai Backhaus

Reattaching Flow Behind a Forward-Backward Facing Step Investigated with Temperature-Sensitive Paint ........... 285
J. Lemarechal, E. Mäteling, C. Klein, D.K. Puckert and U. Rist

Transition Downstream of an Isolated Cylindrical Roughness Element on a Flat Plate Boundary Layer ..................... 295
Dominik K. Puckert and Ulrich Rist

Experimental Investigation of Mach Number and Pressure Gradient Effects on Boundary Layer Transition in Two-Dimensional Flow ........................................ 305
Steffen Risius, Marco Costantini, Stefan Hein, Stefan Koch and Christian Klein

Separation Control with Lobe Mixers in the Wake of an Axisymmetric Space-Launcher Model .......................... 315
Anne-Marie Schreyer and Gonca Taskin

Shape Optimization of Active and Passive Drag-Reducing Devices on a D-shaped Bluff Body .............................. 327
Richard Semaan
Active Flow Control on a Non-steady Operated Compressor
Stator Cascade by Means of Fluidic Devices ....................... 337
M. Staats and W. Nitsche

Study About Boundary-Layer Suction at a Juncture
for Sustained Laminar Flow ........................................... 349
Johannes Zahn and Ulrich Rist

Part V High-Agility Configuration

Study of Total Pressure Losses at the Engine Face of a Submerged
Inlet with an Ingested Vortex ........................................... 361
Stefan Koch, Markus Rütten and Martin Rein

Part VI Rotorcraft Aerodynamics

Towards Density Reconstruction of Helicopter Blade Tip Vortices
from High-Speed Background-Oriented Schlieren Data .......... 375
J.N. Braukmann, A. Bauknecht, C.C. Wolf and M. Raffel

Unsteady Boundary Layer Transition Detection by Automated
Analysis of Hot Film Data .............................................. 387
A. Goerttler, A.D. Gardner and K. Richter

Wind Turbine Wake Vortex Influence on Helicopter Rotor Trim . . . 397
B.G. van der Wall and P.H. Lehmann

Part VII Aeroelasticity and Structural Dynamics

Experimental Investigation of Flutter Mechanisms Depending
on Sweep Under Subsonic Flow and Low Reynolds Numbers ....... 411
Marc Braune and Stefan Wiggen

Numerical Investigations of an Elasto-Flexible Membrane
Airfoil Compared to Experiments ...................................... 421
Julie Piquee, Mehran Saeedi, Christian Breitsamter, Roland Wüchner
and Kai-Uwe Bletzinger

Coupling of Recurrent and Static Neural Network Approaches
for Improved Multi-step Ahead Time Series Prediction .......... 433
Maximilian Winter and Christian Breitsamter

Part VIII Numerical Simulation/Aerodynamics

Direct Numerical Simulation of Convective Channel Flow
with Temperature and Concentration Gradients .................... 445
Philipp Bahavar and Claus Wagner

Prediction of Airfoil Trailing Edge Noise Reduction by Application of Complex Porous Material ................................. 647
Lennart Rossian, Roland Ewert and Jan W. Delfs

Towards the Prediction of Flow and Acoustic Fields of a Jet-Wing-Flap Configuration ........................................ 659
Daniel Schütz and Holger Foysi

Lewin Stein, Julius Reiss and Jörn Sesterhenn

Part XI Vehicle Aerodynamics

Wall Shear Stress Measurements on a Double-Decker Train ........ 685
Johannes Haff, Erich Schülein, Arne Henning, Steve Cochard and Sigfried Loose
Aerodynamic Investigations of the Effects of Virtual Coupling on Two Next Generation Trains ........................................ 695
Henning Wilhelmi, Thomas Thieme, Arne Henning and Claus Wagner

Part XII Wind Energy

Hybrid RANS/LES Simulations of the Three-Dimensional Flow at Root Region of a 10 MW Wind Turbine Rotor .............. 707
Galih Bangga, Pascal Weiheing, Thorsten Lutz and Ewald Krämer

Numerical Investigation of a Model Wind Turbine ................. 717
Annette Fischer, Amélie Flamm, Eva Jost, Thorsten Lutz
and Ewald Krämer

RANS Simulation of the New MEXICO Rotor Experiment Including Laminar-Turbulent Transition ....................... 729
C.C. Heister

CFD Study of Trailing Edge Flaps for Load Control on Wind Turbines ................................................................. 741
Eva Jost, Mário Firnhaber Beckers, Thorsten Lutz and Ewald Krämer

Aerodynamic Response of Wind Turbines in Complex Terrain to Atmospheric Boundary Layer Flows .................. 753
Christoph Schulz, Thorsten Lutz and Ewald Krämer

Author Index ................................................................. 765
New Results in Numerical and Experimental Fluid Mechanics XI
Contributions to the 20th STAB/DGLR Symposium
Braunschweig, Germany, 2016
