Contents

1 RNA-seq Analysis in Plant–Fungus Interactions .............................. 1
   Ho Chai-Ling and Wai-Yan Yee

2 Study of Oil Palm Photosynthesis Using Omics Technologies ........... 27
   Bee Keat Neoh, Huey Fang Teh, Yick Ching Wong,
   Tony Eng Keong Ooi, See Siang Cheah, and David R. Appleton

3 Molecular Marker Technology for Genetic Improvement
   of Underutilised Crops .................................................... 47
   Acga Cheng, Hui Hui Chai, Wai Kuan Ho,
   Aliyu Siise Abdullah Bamba, Aryo Feldman, Presidor Kendabie,
   Razlin Azman Halim, Alberto Tanzi, Sean Mayes,
   and Festo Massawe

4 Transcription Factors Associated with Abiotic
   Stress and Fruit Development in Oil Palm ............................ 71
   Siti Nor Akmar Abdullah, Azzreena Mohamad Azzeme,
   Mortaza Ebrahimi, Engku Ahmad Khairi Engku Ariff,
   and Farah Hanan Abu Hanifiah

5 Sensing Crop Diseases ....................................................... 101
   Thangavel Lakshmipriya, Subash C.B. Gopinath, and Uda Hashim

6 Development of Genomic Resources and Assessing
   Their Potential for Accelerated Acacia Breeding ....................... 117
   Wikneswari Ratnam, Chee Yen Choong, and Muhammad Asif Javed

7 Engineering of Secondary Metabolites in Tissue and Cell Culture
   of Medicinal Plants: An Alternative to Produce Beneficial
   Compounds Using Bioreactor Technologies ............................ 137
   Mortaza Ebrahimi and Arash Mokhtari
