# Contents

<b>1</b>	<b>General Chemical Concepts</b> .....	<b>1</b>
	Introduction.....	1
	Periodic Table and Element Groups.....	1
	Chemical Bonding.....	1
	Chemical Reactions, Stoichiometry, and Kinetics.....	3
	Equilibrium, Steady-State, and Residence Time.....	4
	General Concepts of Organic Chemistry.....	4
	Aqueous Solubility and Polarity.....	5
	Diffusion and Osmotic Potential.....	6
	Freezing Exclusion and Concentration of Solutes.....	6
	Defining Dissolved and Particulate Phases.....	6
	SI Units and Concentrations.....	7
	Ionic Charge Balance.....	7
	Stable Isotope Chemistry.....	7
<b>2</b>	<b>Soil Biogeochemistry</b> .....	<b>11</b>
	Introduction.....	11
	Soil Formation and Pedogenesis.....	11
	Soil Classification.....	13
	Soil Texture and Coarse Fragments.....	13
	Soil Moisture.....	15
	Mineralogy.....	16
	Physical-Chemical Features of Clays and Other Soil Colloids.....	17
	Clay Colloids.....	17
	Humic Colloids.....	18
	Chemical Processes in Soils.....	18
	Ion Exchange and Adsorption in Soils.....	18
	Soil Ion Exchange Chemistry and Base Saturation.....	20
	Acidification.....	21
	Complexation.....	22
	Leaching.....	23
	Dissolution and Precipitation Reactions.....	23
	Comparative Analysis of Soil Chemical Properties.....	24
	Soil Exchange Chemistry.....	24
	Soil Distributions of Aluminum.....	25
	Vertical Distributions of Organic Carbon, Nitrogen, and Phosphorus in Soils.....	25
	Forms of Organic Nitrogen in Soils.....	27
	Patterns of Soil Solution Chemistry.....	27
	Integrated Processes of Nutrient Supply and Storage in Soils.....	29

<b>3</b>	<b>Microbial Biogeochemistry</b> .....	<b>31</b>
	Introduction .....	31
	Redox Conditions .....	31
	Microbial Nitrogen Transformations .....	32
	Nitrogen Fixation .....	32
	Mineralization or Ammonification .....	34
	Nitrogen Immobilization .....	34
	Nitrification .....	35
	Denitrification .....	36
	Dissimilatory Nitrate Reduction to Ammonium (DNRA) .....	37
	Assimilatory Nitrate Reduction .....	37
	Microbial Sulfur Transformations .....	37
	Mineralization of Organic Sulfur .....	37
	Anaerobic Dissimilatory Sulfate Reduction .....	38
	Assimilatory Sulfate Reduction .....	38
	Microbial Carbon Transformations .....	38
	Fermentation .....	38
	Methane Production .....	39
	Organic Acid Synthesis by Microbes .....	39
	Microbial Processes that Contribute to Bioremediation or Metal Transformations .....	40
<b>4</b>	<b>Plant Biogeochemistry</b> .....	<b>41</b>
	Introduction .....	41
	General Plant Chemistry .....	41
	Plant Functional Morphology and Growth Allocation .....	43
	Aboveground Structure and Function .....	43
	Belowground Structure and Function of the Root System .....	45
	Growth Allocation and Root:Shoot Relationships .....	45
	Carbon Fixation, Metabolism, and Plant Production .....	46
	Photosynthesis and Nutrients .....	46
	Photosynthesis and Water .....	48
	Respiration and Metabolism .....	49
	Exchange of Carbon Dioxide in a Forest Ecosystem .....	51
	Energy Budgets and Primary Production .....	51
	Whole-Plant Carbon Cycling and Allocation .....	52
	Metabolic Allocation to Plant Defense .....	52
	Plant Nutrient Cycling .....	54
	Plant Nutrient Absorption .....	54
	Implications of Nutrient Uptake for Acid-Base Chemistry .....	55
	Plant Transport or Translocation of Nutrients .....	56
	Plant Nutrient Resorption .....	56
	Detrital Cycling of Plant Nutrients .....	57
	Plant Canopy Processes Affecting Element Cycling .....	57
	NUE as an Index of Plant Nutrition and Nutrient Cycling .....	58
	Nutrient Limitation .....	58
	Effects of Chemical Stress on Plants .....	58
	Effects of Acidic Deposition on Plant Membrane-Bound Calcium .....	59
	Aluminum Antagonism and Toxicity Stress .....	59
	Plant Responses to Ozone Stress .....	59
<b>5</b>	<b>Cycling of Organic Matter</b> .....	<b>61</b>
	Introduction .....	61
	Ecosystem Perspective .....	61
	Storage of Organic Matter in Forest Soils, Biomass, and Woody Debris .....	61

Soil Organic Matter and Soil Carbon Storage . . . . .	62
Forest Floor Storage . . . . .	63
Turnover Rates and Age of Soil Organic Matter Reservoirs. . . . .	63
Influence of Land Management and Disturbance on SOM . . . . .	63
Aboveground and Belowground Biomass . . . . .	64
Coarse Woody Debris . . . . .	64
Transfers of Organic Matter in Detritus and Solution . . . . .	64
Aboveground Litterfall . . . . .	64
Belowground Detrital Inputs From Root Mortality and Turnover . . . . .	65
Solution Transfers of DOM . . . . .	66
Decomposition of Organic Matter . . . . .	67
General Processes of Decomposition . . . . .	67
Wood Decay Processes . . . . .	67
Decomposition Rates and Decay Constants . . . . .	68
Element Cycling Patterns in Decaying Organic Matter . . . . .	69
Substrate Controls on Decomposition . . . . .	70
Environmental Controls on Decomposition . . . . .	71
Biological Influences on Decomposition . . . . .	72
Transfers of CO <sub>2</sub> in the Organic Matter Budget of a Forest Ecosystem . . . . .	72
<b>6 Atmospheric Deposition . . . . .</b>	<b>73</b>
Introduction. . . . .	73
Atmospheric Chemistry . . . . .	73
Deposition Processes and Patterns . . . . .	74
Atmospheric Emissions and Deposition of Sulfur and Nitrogen . . . . .	76
Measurement and Analysis of Atmospheric Deposition. . . . .	77
Wet Deposition . . . . .	77
Dry Deposition . . . . .	77
Analysis of Precipitation Chemistry. . . . .	78
Environmental Patterns of Precipitation Chemistry and Atmospheric Deposition. . . . .	79
Daily Patterns . . . . .	80
Monthly Patterns. . . . .	80
Multi-year Trends in Precipitation Chemistry . . . . .	80
Long-Term Historical Trends in Atmospheric Deposition of Mercury . . . . .	81
Spatial Patterns: Deposition in North America. . . . .	81
Spatial Patterns: Influence of Vegetation and Canopy Structure on Atmospheric Deposition. . . . .	81
Spatial Patterns: Comparison of Atmospheric Deposition at Different Forest Sites . . . . .	83
Modeling Atmospheric Deposition Patterns . . . . .	84
A Case Study of Deposition Inputs to a Forest Ecosystem . . . . .	85
<b>7 Mineral Weathering . . . . .</b>	<b>87</b>
Introduction. . . . .	87
Ecosystem Context . . . . .	87
Mineral Weathering Processes . . . . .	87
Heterogeneous Mineral Weathering at Different Scales. . . . .	88
Controls on Mineral Weathering Rates. . . . .	89
Mineralogical Controls . . . . .	90
Influence of Acidity and Complexing Ligands on Weathering Rates . . . . .	90
Experimental Effects of Acidity on Weathering Rates . . . . .	92
Physical Influences on Weathering Rates . . . . .	92
Biotic Influences on Mineral Weathering Rates . . . . .	93

Influence of Mineral Dissolution on the Solution Chemistry of Natural Waters . . . . .	93
Genesis and Weathering of Clays . . . . .	94
Methods of Estimating Weathering Contributions to Ecosystem Element Budgets. . .	95
Mass Balance Estimation . . . . .	95
Element Tracers as Indicators of Weathering Rates . . . . .	96
Weathering Estimation with Mineral Depletion Techniques . . . . .	97
Comparison of Weathering Estimates. . . . .	98
Comparison of Weathering in Different Ecosystems . . . . .	98
<b>8 Watershed Hydrology . . . . .</b>	<b>101</b>
Ecosystem and Landscape Perspectives . . . . .	101
Influence of Geology and Soils on Storage and Movement of Water. . . . .	101
Soil Hydrologic Properties . . . . .	104
Water Movement and Streamflow Generation in a Watershed . . . . .	105
Inferring Stream Hydrology from Stream Chemistry in Small Watersheds. . . . .	107
Water Balance of a Watershed Ecosystem . . . . .	108
Measurement Techniques for Ecosystem Water Budgets. . . . .	109
Components of a Water Budget: Precipitation Inputs. . . . .	111
Components of a Water Budget: Evapotranspiration (ET). . . . .	111
Components of a Water Budget: Hydrologic Storage. . . . .	114
Components of a Water Budget: Stream Runoff. . . . .	115
Integrated Analysis of a Water Budget . . . . .	117
<b>9 Aqueous Chemistry. . . . .</b>	<b>119</b>
Introduction. . . . .	119
An Example of Soil Solution Chemistry: Analysis and Interpretation. . . . .	119
General Concepts of Aqueous Chemistry. . . . .	121
Sample Collection and Analysis. . . . .	121
Selection of Analytical Parameters. . . . .	121
Alkalinity or Acid Neutralizing Capacity (ANC). . . . .	121
Acidity and pH . . . . .	122
Conductivity . . . . .	122
Ionic Strength and Ion Activity. . . . .	122
Influence of Temperature on Solution Equilibria . . . . .	123
Hydrolysis and Chemical Speciation as a Function of pH. . . . .	123
Rate-Limited Versus Equilibrium Conditions. . . . .	124
Differential Anion Mobility . . . . .	124
Effects of Ecosystem Processes on Solution Chemistry. . . . .	125
Case Studies: Analysis and Interpretation of Aqueous Chemistry in Natural Waters. . . . .	125
Controls on the Chemistry of Forest Floor Leachates . . . . .	125
Comparison of Stream Chemistry Along a Hydrologic Flow Gradient . . . . .	126
Changes in Solution Chemistry and ANC Generation Along a Watershed Drainage Gradient . . . . .	126
Effects of Land Use on Watershed Exports of Nutrients in Stream Runoff . . . . .	128
<b>10 Integrated Element Cycling. . . . .</b>	<b>131</b>
Introduction. . . . .	131
General Concepts of Element Cycling . . . . .	131
Terminology . . . . .	131
Comparison of Element Cycles in Terrestrial Ecosystems. . . . .	132
Nitrogen Cycle . . . . .	133
Calcium Cycle. . . . .	134
Aluminum Cycle. . . . .	134

---

Nutrient Cycling in Relation to Ecosystem Succession . . . . .	135
Chemical Input-Output Budgets for Watershed Ecosystems . . . . .	136
Element Cycling at the Landscape Scale: Exports of N and P from Large Watersheds . . . . .	137
Element Cycling at the Global Scale . . . . .	137
Global Nitrogen Cycle . . . . .	137
Global Carbon Cycle . . . . .	138
<b>11 Biogeochemical Models . . . . .</b>	<b>141</b>
Introduction . . . . .	141
Considerations in the Development of a Biogeochemical Model . . . . .	141
Steps in Building a Biogeochemical Model . . . . .	142
An Introductory Model of Watershed Nitrogen Cycling . . . . .	144
Applications of Biogeochemical Models . . . . .	146
TREGRO: A Model to Simulate Plant Responses to Interacting Stresses . . . . .	147
TEM: A Global Model of Net Primary Productivity . . . . .	147
The CENTURY Soil Organic Matter Model . . . . .	148
PnET-BGC: An Integrated Biogeochemical Model . . . . .	149
Watershed Acidification Models . . . . .	149
Nutrient Cycling Models . . . . .	150
Models in Watershed Hydrology . . . . .	150
<b>12 Ecosystem Disturbance and Stress . . . . .</b>	<b>151</b>
Introduction . . . . .	151
Disturbance and Recovery in the Context of Ecological Succession . . . . .	151
Effects of Forest Harvesting on Watershed Ecosystems . . . . .	152
Twenty Years of Recovery Following Harvesting at Hubbard Brook Forest, NH . . . . .	154
Effects of Wildfire and Prescribed Burning . . . . .	154
Wildfires . . . . .	154
Prescribed Burning as a Management Practice . . . . .	154
Effects of Forest Fire Smoke on Radiative Forcing . . . . .	155
Disturbance and Stress Resulting from Chronic N Inputs to Forest Ecosystems . . . . .	155
Biogeochemical Implications of Rising Atmospheric CO <sub>2</sub> and Climate Change . . . . .	158
Building a Conceptual Framework . . . . .	158
The Rest of the Journey . . . . .	159
<b>Biographical Sketch . . . . .</b>	<b>161</b>
<b>Epilogue . . . . .</b>	<b>163</b>
<b>Problem Sets . . . . .</b>	<b>165</b>
<b>Problem Answers . . . . .</b>	<b>169</b>
<b>Glossary . . . . .</b>	<b>177</b>
<b>References . . . . .</b>	<b>187</b>
<b>Index . . . . .</b>	<b>199</b>

Ecosystem Biogeochemistry

Element Cycling in the Forest Landscape

Cronan, C.S.

2018, XIII, 203 p. 181 illus., 35 illus. in color., Hardcover

ISBN: 978-3-319-66443-9
