

Contents

1	Introduction and Outline	1
	1.1 Outline	2
	References.	3
2	Confined Electromagnetic Waves—Cavities	7
	2.1 Electromagnetic Radiation	7
	2.1.1 Mode Expansion in Free Space.	7
	2.1.2 Modes Inside a Cavity	8
	2.2 Single Cavity Modes—Harmonic Oscillators	10
	2.2.1 Canonical Variables of the Electromagnetic Field.	10
	2.2.2 Drive and Dissipation of a Classical Oscillator.	11
	2.2.3 Quantum Harmonic Oscillator.	13
	2.3 Electrical Oscillators—“From Classical to Quantum”.	15
	2.3.1 Quantization of a LC Oscillator	15
	2.3.2 Drive and Dissipation in a Classical <i>LC</i> Oscillator	17
	2.3.3 Quantum Mechanical Description of a Real LC Cavity	20
	References.	23
3	Spins in the Cavity—Cavity QED	25
	3.1 Single Spin in the Cavity	25
	3.1.1 Cavity Spin Interaction	26
	3.1.2 The Jaynes Cummings Model.	28
	3.1.3 Dressed States/Polariton Modes.	30
	3.2 Ensembles of Spins in the Cavity.	33
	3.2.1 Three Spins in the Cavity	33
	3.2.2 <i>N</i> Spins in the Cavity	38
	3.2.3 The Dicke Model	40
	3.2.4 Low Excitation Limit	43
	3.3 Coupling to Inhomogeneous Spectral Broadened Spin Ensembles.	44

3.3.1	Equidistant Discretized Spin Ensembles	45
3.3.2	Non-equidistant Discretized Spin Ensembles.	47
	References.	48
4	Experimental Implementation—Solid-State Hybrid Quantum System	51
4.1	Micro-Wave Cavities	51
4.1.1	Distributed Electrical Resonators.	51
4.1.2	Lumped Electrical Resonators.	55
4.2	Nitrogen Vacancy Center Spin Ensembles	57
4.2.1	Nitrogen Vacancy Center Level Structure	58
4.2.2	Thermal Polarization and Spin-Spin Interactions.	59
4.3	Experimental Setup.	61
4.4	Measurement Scheme	63
4.4.1	Up and Down Conversion.	64
4.4.2	Signal Averaging.	65
	References.	67
5	Collective Spin States Coupled to a Single Mode Cavity—Strong Coupling	71
5.1	Strong Coupling	71
5.1.1	“Vacuum” Rabi Splitting.	72
5.1.2	Dispersive Measurements	74
5.2	Rabi Oscillations.	76
5.2.1	Linear Rabi Oscillations	76
5.2.2	Non-linear Rabi Oscillations	78
5.3	Conclusion	79
	References.	80
6	Spin Ensembles and Decoherence in the Strong-Coupling Regime—Cavity Protection	83
6.1	Introduction	83
6.2	The Principle of Cavity Protection	84
6.3	Experimental Verification	87
6.4	Conclusion	91
	References.	91
7	Engineering of Long-Lived Collective DarkStates—Spectral Hole Burning	93
7.1	Introduction	93
7.1.1	The Principle of Spectral Hole Burning	94
7.1.2	Collective Spin Dark States.	95
7.2	Experimental Implementation of Spectral Hole Burning.	96
7.2.1	Spectral Hole Burning.	96
7.2.2	Dark State Spectroscopy	97

7.2.3	Dark State Dynamics	99
7.3	Conclusion	101
	References.	101
8	Amplitude Bistability with Inhomogeneous Spin Broadening—Driven Tavis-Cummings.	103
8.1	Introduction	103
8.2	The Principle of Bistability.	104
8.3	Experiential Observation of Amplitude Bistability	107
8.4	Conclusion	109
	References.	110
9	Spin Echo Spectroscopy—Spin Refocusing	113
9.1	Introduction	113
9.2	Experimental Implementation	114
9.2.1	Car-Purcell-Meiboom-Gill Echo Train.	114
9.2.2	Stimulated Spin Echo	115
9.3	Conclusion	117
	References.	117
10	Conclusion and Outlook	119
	References.	122
	Curriculum Vitae	123
