Contents

Applying MAPP Algorithm for Cooperative Path Finding in Urban Environments ............................................. 1
   Anton Andreychuk and Konstantin Yakovlev

Real-Time Removing of Outliers and Noise in 3D Point Clouds Applied in Robotic Applications .............................. 11
   Gerasimos Arvanitis, Aris S. Lalos, Konstantinos Moustakas, and Nikos Fakotakis

Emotion Recognition System for Human-Robot Interface: Comparison of Two Approaches ................................... 20
   Anatoly Bobe, Dmitry Konyshev, and Sergey Vorotnikov

Comparsion of Feature Extraction Methods for Finding Similar Images ...................................................... 29
   Lukáš Bureš, Filip Berka, and Luděk Müller

Empowerment as a Generic Utility Function for Agents in a Simple Team Sport Simulation .................................. 37
   Marcus Clements and Daniel Polani

Survey of Modular Robots and Developed Embedded Devices for Constructive and Computing Components ............. 50
   Vladimir Dashevskiy, Viktor Budkov, and Andrey Ronzhin

Context-Awared Models in Time-Continuous Multidimensional Affect Recognition ........................................ 59
   Dmitrii Fedotov, Maxim Sidorov, and Wolfgang Minker

Facing Face Recognition with ResNet: Round One ...................................................................................... 67
   Ivan Gruber, Miroslav Hlaváč, Miloš Železný, and Alexey Karpov

Footstep Planner Algorithm for a Lower Limb Exoskeleton Climbing Stairs ...................................................... 75
   Sergey Jatsun, Sergei Savin, and Andrey Yatsun

Synthesis of the Behavior Plan for Group of Robots with Sign Based World Model ........................................... 83
   Gleb A. Kiselev and Aleksandr I. Panov

Using Augmentative and Alternative Communication for Human-Robot Interaction During Maintaining Habitability of a Lunar Base ........................................................ 95
   Boris Kryuchkov, Leonid Syrkin, Vitaliy Usov, Denis Ivanko, and Dmitriy Ivanko
An Application of Computer Vision Systems to Unmanned Aerial Vehicle Autolanding .......................................................... 105
Alexey Y. Aksenov, Sergey V. Kuleshov, and Alexandra A. Zaytseva

About Approach of the Transactions Flow to Poisson One in Robot Control Systems .......................................................... 113
Eugene Larkin, Alexey Bogomolov, Dmitriy Gorbachev, and Alexander Privalov

Modified Spline-Based Navigation: Guaranteed Safety for Obstacle Avoidance .......................................................... 123
Roman Lavrenov, Fumitoshi Matuno, and Evgeni Magid

Integration of Corporate Electronic Services into a Smart Space Using Temporal Logic of Actions .......................................................... 134
Dmitriy Levonevskiy, Irina Vatamaniuk, and Anton Saveliev

Improving Dependability of Reconfigurable Robotic Control System .......................................................... 144
Eduard Melnik, Iakov Korovin, and Anna Klimenko

Recognition of Indoors Activity Sounds for Robot-Based Home Monitoring in Assisted Living Environments .......................................................... 153
Prasitthichai Naronglerdrit and Iosif Mporas

Stationary Device for Drone Detection in Urban Areas .......................................................... 162
Petr Neduchal, Filip Berka, and Miloš Železný

Detecting Distracted Driving with Deep Learning .......................................................... 170
Ofonime Dominic Okon and Li Meng

An Advanced Human-Robot Interaction Interface for Teaching Collaborative Robots New Assembly Tasks .......................................................... 180
Christos Papadopoulos, Ioannis Mariolis, Angeliki Topalidou-Kyniazopoulou, Grigoris Piperagkas, Dimosthenis Ioannidis, and Dimitrios Tzovaras

Mobile VR Headset Usability Evaluation of 2D and 3D Panoramic Views Captured with Different Cameras .......................................................... 191
Alessio Regalbuto, Salvatore Livatino, Kieran Edwards, and Iosif Mporas

Crossover of Affective Artificial Intelligence Between Robotics Simulator and Games .......................................................... 201
Hooman Samani and Doros Polydorou
