## Contents

**Synthesis of Mechanisms and Robots**

**Synthesis of Precision Flexible Mechanisms Using Screw Theory with a Finite Elements Validation** ........................................ 3
Martín A. Pucheta and Alejandro G. Gallardo

**Enumeration of Kinematic Chains with Zero Variety for Epicyclic Gear Trains with One and Two Degrees of Freedom** ............... 15
Marina Baldissera de Souza, Rodrigo de Souza Vieira, and Daniel Martins

**Mechanism Design and Kinematics Analysis of a Bat Robot** ............ 25
Deming Kong, Jing-Shan Zhao, and Yaser Saffer Tollori

**Vector Analysis of the Cable Tension Conditions** .......................... 39
T. Muraro, D. Martins, and L.K. Sacht

**Actuated Degree-of-Control: A New Approach for Mechanisms Design** .................................................. 49
Estevan Hideki Murai, Roberto Simoni, and Daniel Martins

**Analysis of Self-aligning Mechanisms by Means of Matroid Theory** ... 61
Andrea Piga Carboni, Henrique Simas, and Daniel Martins

**Review and Classification of Workpiece Toggle Clamping Devices** ..... 74
Mateus Viana de Oliveira e Costa, Estevan Hideki Murai, Fabiola da Silva Rosa, and Daniel Martins

**Supporting the Laminated Ferromagnetic Pole Pieces in a Magnetic Gear: A Structure Behaviour Analysis from a Multibody Model** ..... 85
M. Desvaux, B. Multon, H. Ben Ahmed, and S. Sire
Kinematic Analysis

Kinematic Analysis for a Planar Redundant Serial Manipulator 97
Zijia Li, Mathias Brandstötter, and Michael Hofbaur

Workspace Analysis of a Parallel Manipulator Using Multi-objective Optimization and Bio-inspired Methods 107
R.S. Gonçalves, J.C.M. Carvalho, and F.S. Lobato

Modeling of a Four-Legged Robot with Variable Center of Mass as a Cooperative Multirobot System 116
Cristiane P. Tonetto, Antônio Bento Filho, and Altamir Dias

Assembly Sequence Planning for Shape Heterogeneous Modular Robot Systems 128
Anelíze Zomkowski Salvi, Roberto Simoni, and Henrique Simas

Static Analysis

Kinetostatics and Optimal Design of a 2PRPU Shoenflies-Motion Generator 141
H. Simas and R. Di Gregorio

Influence of the Working Mode on the Maximum Isotropic Force Capability Maps for a 3RRR Planar Parallel Manipulator 151
L. Mejia, D. Ponce, J.C. Herrera, H. Simas, and D. Martins

Maximum Isotropic Force Capability Maps in Planar Cooperative Systems: A Practical Case Study 160
Juan Camilo Herrera Pineda, Leonardo Mejia Rincon, Roberto Simoni, and Henrique Simas

Balancing Conditions of the RSS’R, Spatial Mechanism 171
Mario Acevedo

Dynamic Analysis

Elastodynamic Performance of a Planar Parallel Mechanism Under Uncertainties 183
Fabian Andres Lara-Molina, Edson Hideki Koroishi, and Thamiris Lima Costa

Complex Modelling and Dynamical Analysis of Parallel Cable Mechanisms 193
Radek Bulín, Michal Hajžman, and Pavel Polach

A New Methodology for the Balancing of Mechanisms Using the Davies’ Method 203
Julio Cesar Frantz, Leonardo Mejia Rincon, Henrique Simas, and Daniel Martins
The Dynamic Synthesis of an Energy-Efficient Watt-II-Mechanism . . . 213
F. Schwarzfischer, M. Hüsing, and B. Corves

Multibody Dynamic Analysis of a High-Altitude Long-Endurance Aircraft Concept ........................................... 223
L.M. Nitardi, B.A. Roccia, S. Preidikman, and F.G. Flores

Control of Mechatronic Systems

High-Order Sliding Mode Control for Solar Tracker Manipulator . . . 235
I. Gutierrez, E. Hernandez-Martinez, A. Oropeza, and Sajjad Keshtkar

Towards a Servovision Based Control for a Planar Parallel Manipulator ................................................................. 244
Fernanda Thais Colombo and Maíra Martins da Silva

Multibody Model of the VVER 1000 Nuclear Reactor Control Assembly and Simulation of Its Moving Parts Drop ............... 254
P. Polach and M. Hajžman

Single-State Friction Model for Control Purposes ...................... 264
Fernando J. Villegas, Rogelio L. Hecker, and Gustavo M. Flores

Design of a Robotic Speech-to-Sign Language Transliterating System . . 274
E. López-Zapata, M. Campos-Trinidad, R. Salazar-Arévalo, and J. Acostupa-Del Carpio

Modelling and Simulation

Robust Critical Inverse Condition Number for a 3RRR Robot Using Failure Maps .......................................................... 285
Hiparco Lins Vieira, João Vitor de Carvalho Fontes, Andre Teófilo Beck, and Maíra Martins da Silva

Simulation of a Serial Robot Calibration Through Screw Theory ...... 295

Comparative Study of Autonomous Aerial Navigation Methods Oriented to Environmental Monitoring ............................ 305
J. López, A. Mauricio, A. Rojas, E. Dianderas, J. Vargas-Machuca, and R. Rodríguez

Simulation and Experimental Verification of a Global Redundancy Resolution for a 3PRRR Prototype .............................. 315
João Vitor de Carvalho Fontes and Maíra Martins da Silva

A Computational Aeroelastic Framework for Studying Non-conventional Aeronautical Systems ...................................... 325
S. Preidikman, B.A. Roccia, M.L. Verstraete, L.R. Ceballos, and B. Balachandran
ILQG Planner Applied to Dynamic Systems with Intermittent Contact ..................................... 335
Henrique B. Garcia, Leonardo S. Luna, Gustavo Jose Giardini Lahr, and Glauco A.P. Caurin

Cost Effective Provisioning of Electricity in Smart Nano-grid Using GA and Optimized Heuristic Algorithm ............................................ 344
Nabila Ahmad, Rabiya Bibi, and Shoab Ahmed Khan

Prototypes and Experimental Validations
Mathematical Modeling and Prototype Development of a Pneumatically-Actuated Bench for Sloping Terrain Simulation . . . 357

An Experimental Characterization of Roll Hemming Process ........... 367
Eduardo Esquivel, Giuseppe Carbone, Marco Ceccarelli, and Carlos Jáuregui

Experimental Characterization of a Feedforward Control for the Replication of Moving Resistances on a Chassis Dynamometer ............. 379
E. Bertoti, J.J. Eckert, R.Y. Yamashita, L.C.A. Silva, and F.G. Dedini

Experimental Setup of a Novel 4 DoF Parallel Manipulator ............. 389
Marina Valles, Pedro Araujo-Gomez, Vicente Mata, Angel Valera, Miguel Diaz-Rodriguez, Alvaro Page, and Nidal M. Farhat

Behaviour Comparison Between Mechanical Epicyclic Gears and Magnetic Gears .................................................. 401
M. Desvaux, B. Multon, H. Ben Ahmed, and S. Sire

Mechatronic Systems for Assistive Technology
Design Optimization of a Cable-Driven Parallel Robot in Upper Arm Training-Rehabilitation Processes ........................................ 413
Eusebio Hernandez, S. Ivvan Valdez, Giuseppe Carbone, and Marco Ceccarelli

Kinematic Analysis of an Exoskeleton-Based Robot for Elbow and Wrist Rehabilitation .................................................. 424
N. Plitea, B. Gherman, G. Carbone, M. Ceccarelli, C. Vaida, A. Banica, D. Pisla, and A. Pisla

Experimental Evaluation of Artificial Human Ribs ........................ 434
L.A. Aguilar, M. Ceccarelli, Ch.R. Torres-San-Miguel, G. Urriolagoitia-Sosa, and G. Urriolagoitia-Calderón
