## Contents

1 **Introduction: Smart Homes and Their Users** .......................... 1  
   1.1 The Smart Home Promise ........................................ 1  
   1.2 What About the Users of Smart Home Technologies? .......... 3  
   1.3 Purpose and Overview of This Book ............................ 6  
   1.4 New Data and Analysis ....................................... 7  
   References .................................................. 12

2 **Analytical Framework for Research on Smart Homes**  
   and Their Users ............................................... 15  
   2.1 Introduction and Key Questions ............................... 15  
   2.2 Research Themes ......................................... 16  
   2.3 Views of the Smart Home .................................... 18  
   2.4 Users and the Use of Smart Homes ........................... 21  
   2.5 User-Centred Challenges for Realising the Smart Home .... 24  
   2.6 Analytical Framework for Research on Smart Homes  
       and Their Users ........................................ 27  
   2.7 Suggested Further Reading .................................. 30  
   References .................................................. 30

3 **Perceived Benefits and Risks of Smart Home Technologies** ...... 35  
   3.1 Introduction and Key Questions ............................... 35  
   3.2 Method and Data ........................................... 36  
   3.3 Results: Prospective Users’ Perceptions of Benefits  
       and Risks .................................................. 41  
   3.4 Results: Distinctive Perceptions and Characteristics  
       of Early Adopters ......................................... 44  
   3.5 Results: Alignment of Industry Marketing  
       with User Perceptions ....................................... 47
3.6 Synthesis .......................................... 49
3.7 Suggested Further Reading ............................. 52
References ............................................. 53

4 Routines and Energy Intensity of Activities in the Smart Home ...................................... 55
L. Stankovic, V. Stankovic, J. Liao and Charlie Wilson
4.1 Introduction and Key Questions ......................... 55
4.2 Method ........................................... 56
4.3 Data ............................................. 61
4.4 Results: Time Profile of Activity-Based Electricity Demand ...... 63
4.5 Results: Energy Intensity of Domestic Activities .............. 64
4.6 Results: Routines and Rhythms in Domestic Activities .......... 67
4.7 Results: Activities in Households with Similar Composition ... 69
4.8 Synthesis .......................................... 71
4.9 Suggested Further Reading ................................ 72
References ............................................. 72

5 Domestication of Smart Home Technologies ................................................................. 75
5.1 Introduction and Key Question .......................... 75
5.2 Method and Data .................................... 77
5.3 Results: Patterns of Use ................................ 78
5.4 Results: Household Dynamics ........................... 81
5.5 Results: Learning .................................... 82
5.6 Results: Domestication Pathways ........................ 84
5.7 Synthesis .......................................... 87
5.8 Suggested Further Reading ............................. 89
References ............................................. 89

6 Control of Smart Home Technologies ................................................................. 91
6.1 Introduction and Key Question .......................... 91
6.2 Method and Data .................................... 94
6.3 Results: Artefactual Control ............................ 95
6.4 Results: Perceptual Control ............................. 97
6.5 Results: Relational Control ............................. 99
6.6 Synthesis .......................................... 101
6.7 Suggested Further Reading ............................. 103
References ............................................. 104

7 Conclusions and Implications for Industry, Policy and Research ........................................ 107
7.1 Summary of Key Insights .............................. 107
7.2 The Importance of Cross-Cutting, Integrative Research on Smart Homes and Their Users 110
