Contents

Invited Talk

Proving Absence of Starvation by Means of Abstract Interpretation and Model Checking .................................................. 3

Helmut Seidl and Ralf Vogler

Program Analysis

Precise Null Pointer Analysis Through Global Value Numbering .......... 25

Ankush Das and Akash Lal

May-Happen-in-Parallel Analysis with Returned Futures .................... 42

Elvira Albert, Samir Genaim, and Pablo Gordillo

JTDec: A Tool for Tree Decompositions in Soot ............................... 59

Krishnendu Chatterjee, Amir Kafshdar Goharshady, and Andreas Pavlogiannis

Fixing the State Budget: Approximation of Regular Languages with Small DFAs ............................................... 67

Graeme Gange, Pierre Ganty, and Peter J. Stuckey

An Equivalence Checking Framework for Array-Intensive Programs ....... 84

Kunal Banerjee, Chittaranjan Mandal, and Dipankar Sarkar

Loop Quasi-Invariant Chunk Detection ......................................... 91

Jean-Yves Moyen, Thomas Rubiano, and Thomas Seiller

SamaTulyata: An Efficient Path Based Equivalence Checking Tool ........ 109

Soumyadip Bandyopadhyay, Santonu Sarkar, Dipankar Sarkar, and Chittaranjan Mandal

Model Checking and Temporal Logics

Tests and Refutation ................................................................. 119

Mohammad Torabi Dashti and David Basin

The Density of Linear-Time Properties ....................................... 139

Bernd Finkbeiner and Hazem Torfah
HyLeak: Hybrid Analysis Tool for Information Leakage .......................... 156
   Fabrizio Biondi, Yusuke Kawamoto, Axel Legay,
   and Louis-Marie Traonouez

Compositional Safety Refutation Techniques ................................. 164
   Kumar Madhukar, Peter Schrammel, and Mandayam Srivas

Gradient-Based Variable Ordering of Decision Diagrams for Systems
with Structural Units ................................................................. 184
   Elvio Gilberto Amparore, Marco Beccuti, and Susanna Donatelli

Model Checking of C and C++ with DIVINE 4 .............................. 201
   Zuzana Baranová, Jiří Barnat, Katarína Kejstová, Tadeáš Kučera,
   Henrich Lauko, Jan Mrázek, Petr Ročkai, and Vladimír Štill

Dealing with Priorities and Locks for Concurrent Programs ............... 208
   Marcio Diaz and Tayssir Touili

Knowledge Transfer and Information Leakage in Protocols ................. 225
   Abdullah Abdul Khadir, Madhavan Mukund, and S.P. Suresh

Concurrent Program Verification
with Invariant-Guided Underapproximation .................................... 241
   Sumanth Prabhu, Peter Schrammel, Mandayam Srivas,
   Michael Tautschnig, and Anand Yeolekar

Neural Networks

Maximum Resilience of Artificial Neural Networks ........................ 251
   Chih-Hong Cheng, Georg Nührenberg, and Harald Ruess

Formal Verification of Piece-Wise Linear Feed-Forward Neural Networks . 269
   Rüdiger Ehlers

Learning and Invariant Synthesis

Liquid Types for Array Invariant Synthesis ................................ 289
   Manuel Montenegro, Susana Nieva, Ricardo Peña, and Clara Segura

Lifting CDCL to Template-Based Abstract Domains
for Program Verification .............................................................. 307
   Rajdeep Mukherjee, Peter Schrammel, Leopold Haller,
   Daniel Kroening, and Tom Melham

Synthesizing Invariants by Solving Solvable Loops .......................... 327
   Steven de Oliveira, Saddek Bensalem, and Virgile Prevosto
