Contents – Part I

Information Hiding

Print-Scan Resilient Binary Map Watermarking Based on Extended Additive Noise Model and Scrambling ...................................................... 3
   Fei Peng, Shuai-ping Wang, Gang Luo, and Min Long

A New Universal Quantum Gates and Its Simulation on GPGPU .......... 16
   Huimin Luo, Jiabin Yuan, and Wenjing Dai

Data Hiding-Based Video Error Concealment Method
Using Compressed Sensing .............................................................. 28
   Yanli Chen, Hongxia Wang, and Hanzhou Wu

A Novel Robust Reversible Watermarking Scheme Based on IWT ....... 39
   Shuang Yu, Jian Li, and Jinwei Wang

An Improved Reversible Information Hiding Scheme Based on AMBTC Compressed Images ................................................................. 49
   Yi Puyang, Xiaoxia Yin, Guorui Feng, and Andrew K. Abel

An Efficient Copy-Move Detection Algorithm Based on Superpixel Segmentation and Harris Key-Points .................................................. 61
   Yong Liu, Hong-Xia Wang, Han-Zhou Wu, and Yi Chen

Improved CMD Adaptive Image Steganography Method .................. 74
   Yingbo Yu and Xin Liao

Quantum Computer Simulation on GPU Cluster Incorporating Data Locality ................................................................. 85
   Zhen Li and Jiabin Yuan

Tampering Detection in Oral History Video Using Watermarking ........ 98
   Jianfeng Lu, Peng Gao, Shanqing Zhang, Li Li, Wenqiang Yuan, and Qili Zhou

Steganalysis with CNN Using Multi-channels Filtered Residuals ........ 110
   Yafei Yuan, Wei Lu, Bingwen Feng, and Jian Weng

Coverless Text Information Hiding Method Using the Frequent Words Distance ................................................................. 121
   Jianjun Zhang, Yicheng Xie, Luai Wang, and Haijun Lin
Improved STDM Watermarking Using Semantic Information-Based JND Model .................................................. 133
Chunxing Wang, Teng Zhang, Wenbo Wan, Jiande Sun, Jing Li, and Meiling Xu

The Categories of Quantum Information Hiding Protocol .................. 143
Shujiang Xu, Lianhai Wang, Guangqi Liu, Xiaohui Han, Dawei Zhao, and Lijuan Xu

Coverless Information Hiding Technology Research Based on News Aggregation .................. 153
Conghua Liu, Gang Luo, and Zuwei Tian

Cloud Computing

SIEM Based on Big Data Analysis ............................................................. 167
Tianmu Li and Leiming Yan

Workload-Aware VM Consolidation in Cloud Based on Max-Min Ant System ............................................................. 176
Hongjie Zhang, Guansheng Shu, Shasha Liao, Xi Fu, and Jing Li

Parallel Service Selection Method Based on Adaptive Cloud Model for Mobile Application ............................................................. 189
Longchang Zhang, Yanhong Yang, and Decai Sun

A Hybrid Artificial Bee Colony Algorithm to Solve Multi-objective Hybrid Flowshop in Cloud Computing Systems ............................................................. 201
Jun-qing Li, Yu-yan Han, and Cun-gang Wang

A Group-Based Replica Consistency Schema for Cloud Storage .................. 214
Guoping Du, Wenbin Yao, Dongbin Wang, and Xiaole Wen

A Multi-objective Optimization Scheduling Method Based on the Improved Differential Evolution Algorithm in Cloud Computing ............................................................. 226
Zhe Zheng, Kun Xie, Shiming He, and Jun Deng

A Network Calculus Analysis for the Baseband Processing Capacity in Cloud Radio Access Network ............................................................. 239
Muzhou Xiong, Haixin Liu, and Deze Zeng

Live Migration Among Cloud Based on MOOSE Address .................. 251
Yubing Mao and Zhengyou Xia

Achieving Proof of Shared Ownership for the Shared File in Collaborative Cloud Applications ............................................................. 262
Yuanyuan Zhang, Jinbo Xiong, Mingwei Lin, Lili Wang, and Xuan Li
Design and Test of the Intelligent Rubber Tapping Technology Evaluation Equipment Based on Cloud Model .......................................................... 275

Jieren Cheng, Kuanqi Cai, Boyi Liu, and Xiangyan Tang

Kyle Morton, Yanzhen Qu, and Marilyn Carroll

Cloud Management Systems and Virtual Desktop Infrastructure
Load Balancing Algorithms - A Survey ............................ 300

Micheal Ernest Taylor and Jian Shen

**IoT Applications**

Design and Deployment of Wireless Sensor Networks for Flood Detection in Indonesia .......................................................... 313

Irfan Dwiguna Sumitra, Rongtao Hou, and Sri Supatmi

An Android App Recommendation Approach by Merging Network Traffic Cost .......................................................... 326

Xin Su, Xuchong Liu, Jiuchuan Lin, and Yu Tong

A Virtual Grid-Based Routing Protocol for Mobile Sink-Based WSNs ........ 339

Qi Liu, Weixin Bu, Kai Zhang, Xiaodong Liu, and Nigel Linge

Low-Energy Security-Enhanced Routing Protocol Based on DBSCAN Partition .......................................................... 349

Yating Hou, Feng Xu, and RuiLin Ding

Power Consuming Activity Recognition in Home Environment ............... 361

Xiaodong Liu and Qi Liu

A Pre-partition Based Uneven Clustering Multi-hop Routing Protocol .......... 373

Yating Hou, Feng Xu, Mingming Su, and Kaibo Yu

A Credibility Evaluation Method in Opportunistic Networks .................. 385

Jinxia Dou, Wenbin Yao, and Dongbin Wang

Unsupervised Energy Disaggregation of Home Appliances ................... 398

Kondwani M. Kamoto, Qi Liu, and Xiaodong Liu

Planar-Based Visual Positioning for a Mobile Robot with Monocular Vision .......................................................... 410

Yang Guo, Zheng Xiao, Hui Chen, and Ling Huang

Zichun Wang, Meng Feng, Tiantian Miao, Wei Jiang, and Jian Shen
A Particle Swarm Optimization and Mutation Operator Based Node Deployment Strategy for WSNs
Jin Wang, Chunwei Ju, Huan Ji, Geumran Youn, and Jeong-Uk Kim

A Distributed Sparse Signal Reconstruction Algorithm in Wireless Sensor Network
Zhi Zhao, Peng Pin, and WeiYu Yu

An Energy-Efficiency Routing Scheme Based on Clusters with a Mobile Sink for WSNs
Xiaodong Liu and Qi Liu

Energy-Efficient Power Control and Resource Allocation for D2D Communications in Underlaying Cellular Networks
Xiaoxiao Guan, Xiangping Zhai, Jiabin Yuan, and Hu Liu

Virtual Machine Placement Based on Metaheuristic for IoT Cloud
Shih-Yun Huang, Chen-Chi Liao, Yao-Chung Chang, and Han-Chieh Chao

A Novel Kalman Filter Based NLOS Localization Method for Wireless Sensor Networks
Long Cheng, Yuchao Shao, and Yan Wang

An Improved Localization Algorithm for Anisotropic Sensor Networks
Xiaoyong Yan, Zhong Yang, Yu Liu, Zhong Su, and Huijun Li

Further Results on Finite-Time Stability of Switched Static Neural Networks
Zhihua Diao, Chunying Diao, Xiaoliang Qian, and Yuanyuan Wu

An Improved Artificial Immune Network Based on the Secondary Immune Mechanism for Data Clustering
Yangyang Li, Xiaoju Hou, Licheng Jiao, and Yu Xue

Analysis of User’s Abnormal Behavior Based on Behavior Sequence in Enterprise Network
Haichao Guan, Huakang Li, and Guozi Sun

An Efficient Speeding up Algorithm of Frobenius Based Scalar Multiplication on Koblitz Curves for Cloud Computing
Yunqi Dou, Chuangui Ma, Yanbin Li, and Fushan Wei

Consensus of Multi-agent Systems with State Constraints.
Qingling Wang

Author Index
## Contents – Part II

### Information Security

Practical Privacy-Preserving Outsourcing of Large-Scale Matrix Determinant Computation in the Cloud

Shaojing Fu, Yunpeng Yu, and Ming Xu

Probability-$p$ Order-Preserving Encryption

Ce Yang, Weiming Zhang, Jiachen Ding, and Nenghai Yu

DLPDS: Learning Users’ Information Sharing Behaviors for Privacy Default Setting in Recommender System

Hongchen Wu and Huaxiang Zhang

New Construction of Low-Hit-Zone Frequency Hopping Sequence Sets with Optimal Partial Hamming Correlation

Zhengqian Li, Pinhui Ke, and Zhifan Ye

Detecting and Preventing DDoS Attacks in SDN-Based Data Center Networks

Po-Ching Lin, Yu-Ting Hsu, and Ren-Hung Hwang

Bayesian Game Based Pseudo Honeypot Model in Social Networks

Miao Du, Yongzhong Li, Qing Lu, and Kun Wang

Conducting Correlated Laplace Mechanism for Differential Privacy

Hao Wang, Zhengquan Xu, Lizhi Xiong, and Tao Wang

A Symmetric Authenticated Proxy Re-encryption Scheme with Provable Security

Zhiniang Peng, Shaohua Tang, and Linzhi Jiang

Quantum Secret Sharing in Noisy Environment

Ming-Ming Wang, Zhi-Guo Qu, and Mohamed Elhoseny

SimHash-Based Similar Neighbor Finding for Scalable and Privacy-Preserving Service Recommendation

Yanwei Xu and Lianyong Qi

Universally Composable Three-Party Password Authenticated Key Exchange

Qihui Zhang, Xuexian Hu, Jianghong Wei, and Wenfen Liu
A High-Capacity Quantum Secret Sharing Protocol Based on Single D-Level Particles .............................................. 138
Xiang Lin, Juan Xu, Hu Liu, Xuwei Tang, and Maomao Fu

An Inconsistency Detection Method for Security Policy and Firewall Policy Based on CSP Solver .................. 147
Yi Yin, Yuichiro Tateiwa, Yun Wang, Yoshiaki Katayama, and Naohisa Takahashi

Reversible Data Hiding in Encrypted Image Based on Block Classification Scrambling ................................. 162
Fan Chen, Hongjie He, Tinghuai Ma, and Shu Yan

A Mutation Approach of Detecting SQL Injection Vulnerabilities ......... 175
Yanyu Huang, Chuan Fu, Xuan Chen, Hao Guo, Xiaoyu He, Jin Li, and Zheli Liu

A Chaotic Map-Based Authentication and Key Agreement Scheme with User Anonymity for Cloud Computing .................. 189
Fan Wu and Lili Xu

Xin Zhang and Fengtong Wen

Privacy-Preserving Multi-party Aggregate Signcryption for Heterogeneous Systems ........................................ 216
Shufen Niu, Zhenbin Li, and Caifen Wang

An Enhanced Method of Trajectory Privacy Preservation Through Trajectory Reconstruction ..................................... 230
Yan Dai and Jie Shao

Efficient and Short Identity-Based Deniable Authenticated Encryption ...... 244
Chunhua Jin and Jianyang Zhao

Towards Fully Homomorphic Encryption From Gentry-Peikert-Vaikuntanathan Scheme ...................................... 256
Gang Du, Chenguang Ma, Zengpeng Li, and Ding Wang

Privacy-Preserving Medical Information Systems Using Multi-authority Content-Based Encryption in Cloud .......... 268
Rui Guo, Xiong Li, and Dong Zheng

Detect Storage Vulnerability of User-Input Privacy in Android Applications with Static and Dynamic Analysis .................. 280
Li Jiang and Yi Zhuang
Certificateless Cryptography with KGC Trust Level 3 Revisited .......................... 292
Fei Li, Wei Gao, Dongqing Xie, and Chunming Tang

Server-Less Lightweight Authentication Protocol for RFID System .................. 305
Jing Li, Zhiping Zhou, and Ping Wang

Efficient CP-ABE with Non-monotonic Access Structures ........................... 315
Yong Cheng, Huaizhe Zhou, Jun Ma, and Zhiying Wang

Image Authentication Based on Least Significant Bit Hiding and Double Random Phase Encoding Technique ................................................................. 326
Faliu Yi, Yousun Jeoung, Ruili Geng, and Inkyu Moon

On-Line Intrusion Detection Model Based on Approximate Linear Dependent Condition with Linear Latent Feature Extraction ............................ 336
Jian Tang, Meijuan Jia, Jian Zhang, and Meiying Jia

Differential Direction Adaptive Based Reversible Information Hiding ............. 346
Feipeng Lin, Bo Wang, and Yabin Li

Detection of Jitterbug Covert Channel Based on Partial Entropy Test ............. 357
Hao Wang, Guangjie Liu, Weiwei Liu, Jiangtao Zhai, and Yuewei Dai

Multimedia Applications

Frame-Deletion Detection for Static-Background Video Based on Multi-scale Mutual Information .............................................................. 371
Yanjia Zhao, Tianming Pang, Xiaoyun Liang, and Zhaohong Li

Learning Based Fast H.264/AVC to HEVC INTRA Video Transcoding for Cloud Media Computing ......................................................... 385
Yun Zhang, Na Li, and Zongju Peng

A Perceptual Encryption Scheme for HEVC Video with Lossless Compression ................................................................. 396
Juan Chen, Fei Peng, and Min Long

Spatial-Temporal Correlation Based Multi-resolution Hybrid Motion Estimation for Frame Rate Up-Conversion ........................................ 408
Bingyu Ji, Ran Li, and Changan Wu

A Robust Seam Carving Forgery Detection Approach by Three-Element Joint Density of Difference Matrix ................................................. 418
Wenwu Gu, Gaobo Yang, Dengyong Zhang, and Ming Xia
Chinese Remainder Theorem-Based Secret Image Sharing for \((k, n)\) Threshold ................................................................. 433
  Xuehu Yan, Yuliang Lu, Lintao Liu, Song Wan, Wanneng Ding, and Hanlin Liu

Kernel Searching Strategy for Recommender Searching Mechanism .......... 441
  Li Zhou, Weiwei Yuan, Kangya He, Chenliang Li, and Qiang Li

A Robust Quantum Watermark Algorithm Based on Quantum Log-Polar Images ................................................................. 450
  Zhiguo Qu, Zhenwen Cheng, and Mingming Wang

Adaptive Hybrid Wavelet Regularization Method for Compressive Imaging ................................................................. 461
  Lingjun Liu, Weiyu Yu, and Cui Yang

Registration of OCT Fundus Images with Color Fundus Images Based on Invariant Features ................................................................. 471
  Ping Li, Qiang Chen, Wen Fan, and Songtao Yuan

View-Based 3D Model Retrieval Based on Distance Learning ................. 483
  Yang Shi, Nannan Liu, Xingjian Long, and Lei Xu

PCANet for Color Image Classification in Various Color Spaces ............... 494
  Jiasong Wu, Shijie Qiu, Rui Zeng, Lotfi Senhadji, and Huazhong Shu

A Method of Group Behavior Analysis for Enhanced Affinity Propagation ................................................................. 506
  Xinning Li, Zhiping Zhou, and Lele Liu

A Median Filtering Forensics Approach Based on Machine Learning .......... 518
  Bin Yang, Zhenyu Li, Weifeng Hu, and Enguo Cao

Spatiotemporal Radio Tomographic Imaging with Bayesian Compressive Sensing for RSS-Based Indoor Target Localization ................................................................. 528
  Baolin Shang, Jiaju Tan, Xiaobing Hong, Xuemei Guo, Guoli Wang, Gonggui Liu, and Shouren Xue

Detection in SAR Images Based on Histogram and Improved Elitist Genetic Fuzzy Clustering ................................................................. 541
  Ronghua Shang, Weitong Zhang, and Licheng Jiao

Research on Cognitive Radio Spectrum Sensing Method Based on Information Geometry ................................................................. 554
  Qiang Chen, Pin Wan, Yonghua Wang, Jiangfan Li, and Yirui Xiao
Android Malware Detection Using Hybrid Analysis and Machine Learning Technique ........................................... 565
  Fan Yang, Yi Zhuang, and Jun Wang

Workload-Aware Page-Level Flash Translation Layer for NAND Flash-Based Storage Systems ................................. 576
  Huibing Wang, Mingwei Lin, Jinbo Xiong, Li Lin, and Ruliang Xiao

Biclustering Evolutionary Spatiotemporal Community in Global Trading Network ........................................... 589
  Leiming Yan, Zeyu Chen, and Ping Zang

Optimization and Classification

Cost Optimization for Time-Bounded Request Scheduling in Geo-Distributed Datacenters ............................... 601
  Xiaohui Wei, Lanxin Li, Xingwang Wang, and Yuanyuan Liu

The Application of Naive Bayes Classifier in Name Disambiguation ................................................................. 611
  Na Li and Jin Han

Mobility Prediction-Based Service Scheduling Optimization Algorithm in Cloudlets ........................................... 619
  Lei Shi, Xi Fu, and Jing Li

Single Appliance Recognition Using Statistical Features Based k-NN Classification ........................................... 631
  Qi Liu, Hao Wu, Xiaodong Liu, and Nigel Linge

Performance Measurement and Configuration Optimization of Virtual Machines Based on the Bayesian Network ........................................... 641
  Jia Hao, Binbin Zhang, Kun Yue, Juan Wang, and Hao Wu

Image Recapture Detection Through Residual-Based Local Descriptors and Machine Learning ............................. 653
  Jian Li and Guojing Wu

A Method Towards Community Detection Based on Estimation of Distribution Algorithm ........................................... 661
  Yawen Chen, Wenan Tan, and Yibo Pan

Sentiment Analysis with Improved Adaboost and Transfer Learning Based on Gaussian Process ............................... 672
  Yuling Liu, Qi Li, and Guojiang Xin

HL-HAR: Hierarchical Learning Based Human Activity Recognition in Wearable Computing ............................. 684
  Yan Liu, Wentao Zhao, Qiang Liu, Linyuan Yu, and Dongxu Wang
An Improved Quantum-Inspired Evolutionary Algorithm for Knapsack Problems ........................................... 694  
  Sheng Xiang, Yigang He, Liuchen Chang, Kehan Wu, and Chaolong Zhang

Output-Based Sampled Data Control for Linear Systems: A Measurement Error Estimation Approach .................... 709  
  Yuelin Shen and Wenbing Zhang

Adaptive Firefly Algorithm with a Modified Attractiveness Strategy .......................................................... 717  
  Wenjun Wang, Hui Wang, Jia Zhao, and Li Lv

Newton Method for Interval Predictor Model with Sphere Parameter Set ..................................................... 727  
  Xuan Xiao, Peng Wang, and Jian-Hong Wang

A Conjugate Gradient Algorithm with Yuan-Wei-Lu Line Search ............................................................ 738  
  Gonglin Yuan, Wujie Hu, and Zhou Sheng

IU-PMF: Probabilistic Matrix Factorization Model Fused with Item Similarity and User Similarity ..................... 747  
  Yilong Shi, Hong Lin, and Yuqiang Li

New Delay-Dependent Stability for Neutral Systems with Its Application to Partial Circuit Model ..................... 759  
  Tao Li, Ting Wang, Jin Deng, and Li Zhang

A Quantitative Evaluation Method of Surveillance Coverage of UAVs Swarm ................................................. 772  
  Wei Li, Changxin Huang, Kaimin Chen, and Songchen Han

Chaos Prediction of Fast Fading Channel of Multi-rates Digital Modulation Using Support Vector Machines .......... 783  
  Yijing Ren and Ren Ren

Short Paper

System Log-Based Android Root State Detection ................................................................. 793  
  Junjie Jin and Wei Zhang

Quantified Attribute Access Control Model for Cloud Storage Platform ..................................................... 799  
  DongMin Li, Jing Li, Sai Liu, and Chao Wang

Dynamically-Enabled Defense Effectiveness Evaluation in Home Internet Based on Vulnerability Analysis ............. 805  
  Ting Wang, Min Lei, Jingjie Chen, Shiqi Deng, and Yu Yang

The Formal Transformation of AADL Based on Z-CoIA ................................................................. 816  
  Fugao Zhang and Zining Cao
Masking Signature Data Errors of Software-Based Control Flow Checking Techniques Employing Redundancy Signature

Liping Liu, Linlin Ci, and Wei Liu

The Analysis of Key Nodes in Complex Social Networks

Yibo Pan, Wenan Tan, and Yawen Chen

Novel Schemes for Bike-Share Service Authentication Using Aesthetic QR Code and Color Visual Cryptography

Li Li, Lina Li, Shangqing Zhang, Zaorang Yang, Jianfeng Lu, and Chin-Chen Chang

An Improved RFID Search Protocol

Ping Wang and Zhiping Zhou

A Developmental Evolutionary Algorithm for 0-1 Knapsack Problem

Ming Zhong and Bo Xu

WiSmart : Robust Human Access and Identification for Smart Homes Using WiFi Signals

Shangqing Liu, Yanchao Zhao, and Bing Chen

Robust Face Recognition Model with Adaptive Correction Term via Generalized Alternating Direction Method of Multipliers

Can Wu, Yunhai Xiao, and Wen-Jie Liu
