

# Contents

<b>Foreword and acknowledgements</b> . . . . .	p.	V
<b>1 Introduction</b> . . . . .	»	1
<b>2 Fermi in Italy: his manuscripts</b> . . . . .	»	4
2.1 The “Fermi Archive” at the Domus Galilaeana in Pisa . . . . .	»	4
2.2 A gap in the Archive . . . . .	»	8
2.3 How to proceed . . . . .	»	10
<b>3 The beginning of Nuclear Physics in Rome</b> . . . . .	»	13
3.1 Fermi and Nuclear Physics: the first steps . . . . .	»	13
3.2 The first International Conference on Nuclear Physics: Rome, October 1931 . . . . .	»	17
3.3 Accurate scientific planning . . . . .	»	34
3.4 “Nuclear” electrons and the “neutrino” at the Rome Conferenc . . . . .	»	39
<b>4 Nuclear Physics in Rome after the Rome Conference: 1931-1933</b> . . . . .	»	46
4.1 The discovery of the neutron . . . . .	»	46
4.2 Fermi at the Paris Conference in 1932 . . . . .	»	52
4.3 Orso Mario Corbino and the particle accelerators . . . . .	»	55
4.4 The official beginning of Nuclear Physics in Rome: March 1933 . . . . .	»	59
<b>5 New particles and new theories: 1932-1933</b> . . . . .	»	69
5.1 A new particle: the positron or “anti-electron” . . . . .	»	69
5.2 The positron in the laboratory . . . . .	»	73
5.3 The Heisenberg-Majorana theory of the nucleus . . . . .	»	77
<b>6 The Solvay Conference and Fermi’s theory of beta decay: October-December 1933</b> . . . . .	»	95
6.1 The Seventh Solvay Conference . . . . .	»	95
6.2 Fermi’s theory of beta decay . . . . .	»	101
<b>7 The discovery of alpha-particle–induced radioactivity</b> . . . . .	»	108
7.1 Frédéric Joliot and Irène Curie after the Solvay Conference . . . . .	»	108
7.2 The discovery of alpha-particle–induced radioactivity . . . . .	»	110

7.3 Why alpha-particle-induced radioactivity was discovered only in January . . . . .	»	112
7.4 After the discovery . . . . .	»	114
<b>8 The discovery of neutron-induced radioactivity . . . . .</b>	<b>»</b>	<b>119</b>
8.1 A project set aside . . . . .	»	119
8.2 Gian Carlo Wick's contribution . . . . .	»	121
8.3 An excellent point of departure . . . . .	»	123
8.4 A precedent: fluorine . . . . .	»	124
8.5 The discovery of neutron induced radioactivity and the sign of the charge . . . . .	»	128
8.6 After the discovery . . . . .	»	132
<b>9 Fermi's strategic choices . . . . .</b>	<b>»</b>	<b>141</b>
9.1 Confidence in the neutron . . . . .	»	141
9.2 The choice of source . . . . .	»	142
9.3 The use of "geometry" . . . . .	»	146
<b>10 Fermi at work: chronicle of a discovery . . . . .</b>	<b>»</b>	<b>150</b>
10.1 The Irpinia notebook . . . . .	»	150
10.2 The "upright" side of the notebook . . . . .	»	150
10.3 The counter . . . . .	»	151
10.4 The backwards periodic table . . . . .	»	154
10.5 The moment of the discovery . . . . .	»	156
10.6 From aluminium to fluorine and more . . . . .	»	158
10.7 The study of the periodic table and the beginning of work as a group . . . . .	»	161
10.8 The gamma rays of the source . . . . .	»	162
10.9 First chemical analyses and new nuclear reactions . . . . .	»	165
10.10 The date and time of the discovery . . . . .	»	168
<b>11 Pages from the Irpinia notebook and the loose sheets of paper . . . . .</b>	<b>»</b>	<b>179</b>
<b>12 Further developments and conclusions . . . . .</b>	<b>»</b>	<b>228</b>
<b>Fermi's Publications in his Italian period . . . . .</b>	<b>»</b>	<b>233</b>
<b>Appendix - Letters to Majorana . . . . .</b>	<b>»</b>	<b>245</b>
<b>Bibliographical references . . . . .</b>	<b>»</b>	<b>249</b>
<b>Index of names . . . . .</b>	<b>»</b>	<b>257</b>

The Lost Notebook of ENRICO FERMI  
The True Story of the Discovery of Neutron-Induced  
Radioactivity  
Guerra, F.; Robotti, N.  
2018, X, 261 p. 114 illus., 85 illus. in color., Hardcover  
ISBN: 978-3-319-69253-1
