

Contents

Long Papers

An Importance Sampling Approach to the Estimation of Algorithm Performance in Automated Algorithm Design	3
<i>Steven Adriaensen, Filip Moons, and Ann Nowé</i>	
Test Problems for Parallel Algorithms of Constrained Global Optimization. . .	18
<i>Konstantin Barkalov and Roman Strongin</i>	
Automatic Configuration of Kernel-Based Clustering: An Optimization Approach.	34
<i>Antonio Candelieri, Ilaria Giordani, and Francesco Archetti</i>	
Solution of the Convergecast Scheduling Problem on a Square Unit Grid When the Transmission Range is 2.	50
<i>Adil Erzin</i>	
A GRASP for the Minimum Cost SAT Problem.	64
<i>Giovanni Felici, Daniele Ferone, Paola Festa, Antonio Napoletano, and Tommaso Pastore</i>	
A New Local Search for the p -Center Problem Based on the Critical Vertex Concept.	79
<i>Daniele Ferone, Paola Festa, Antonio Napoletano, and Mauricio G.C. Resende</i>	
An Iterated Local Search Framework with Adaptive Operator Selection for Nurse Rostering.	93
<i>Angeliki Gretsista and Edmund K. Burke</i>	
Learning a Reactive Restart Strategy to Improve Stochastic Search	109
<i>Serdar Kadioglu, Meinolf Sellmann, and Markus Wagner</i>	
Efficient Adaptive Implementation of the Serial Schedule Generation Scheme Using Preprocessing and Bloom Filters	124
<i>Daniel Karapetyan and Alexei Vernitski</i>	
Interior Point and Newton Methods in Solving High Dimensional Flow Distribution Problems for Pipe Networks	139
<i>Oleg O. Khamisov and Valery A. Stennikov</i>	

Hierarchical Clustering and Multilevel Refinement for the Bike-Sharing Station Planning Problem	150
<i>Christian Kloimüller and Günther R. Raidl</i>	
Decomposition Descent Method for Limit Optimization Problems	166
<i>Igor Konnov</i>	
RAMBO: Resource-Aware Model-Based Optimization with Scheduling for Heterogeneous Runtimes and a Comparison with Asynchronous Model-Based Optimization	180
<i>Helena Kotthaus, Jakob Richter, Andreas Lang, Janek Thomas, Bernd Bischl, Peter Marwedel, Jörg Rahnenführer, and Michel Lang</i>	
A New Constructive Heuristic for the No-Wait Flowshop Scheduling Problem.	196
<i>Lucien Mousin, Marie-Éléonore Kessaci, and Clarisse Dhaenens</i>	
Sharp Penalty Mappings for Variational Inequality Problems	210
<i>Evgeni Nurminski</i>	
A Nonconvex Optimization Approach to Quadratic Bilevel Problems	222
<i>Andrei Orlov</i>	
An Experimental Study of Adaptive Capping in <i>irace</i>	235
<i>Leslie Pérez Cáceres, Manuel López-Ibáñez, Holger Hoos, and Thomas Stützle</i>	
Duality Gap Analysis of Weak Relaxed Greedy Algorithms	251
<i>Sergei P. Sidorov and Sergei V. Mironov</i>	
Controlling Some Statistical Properties of Business Rules Programs	263
<i>Olivier Wang and Leo Liberti</i>	
GENOPT Paper	
Hybridization and Discretization Techniques to Speed Up Genetic Algorithm and Solve GENOPT Problems.	279
<i>Francesco Romito</i>	
Short Papers	
Identification of Discontinuous Thermal Conductivity Coefficient Using Fast Automatic Differentiation.	295
<i>Alla F. Albu, Yury G. Evtushenko, and Vladimir I. Zubov</i>	
Comparing Two Approaches for Solving Constrained Global Optimization Problems.	301
<i>Konstantin Barkalov and Ilya Lebedev</i>	

Towards a Universal Modeller of Chaotic Systems 307
Erik Berglund

An Approach for Generating Test Problems of Constrained
Global Optimization 314
Victor Gergel

Global Optimization Using Numerical Approximations of Derivatives 320
Victor Gergel and Alexey Goryachih

Global Optimization Challenges in Structured Low Rank Approximation 326
Jonathan Gillard and Anatoly Zhigljavsky

A D.C. Programming Approach to Fractional Problems 331
Tatiana Gruzdeva and Alexander Strekalovsky

Objective Function Decomposition in Global Optimization. 338
Oleg V. Khamisov

Projection Approach Versus Gradient Descent for Network’s Flows
Assignment Problem 345
Alexander Yu. Krylatov and Anastasiya P. Shirokolobova

An Approximation Algorithm for Preemptive Speed Scaling Scheduling
of Parallel Jobs with Migration 351
Alexander Kononov and Yulia Kovalenko

Learning and Intelligent Optimization for Material Design Innovation 358
Amir Mosavi and Timon Rabczuk

Statistical Estimation in Global Random Search Algorithms
in Case of Large Dimensions 364
Andrey Pepelyshev, Vladimir Kornikov, and Anatoly Zhigljavsky

A Model of FPGA Massively Parallel Calculations
for Hard Problem of Scheduling in Transportation Systems 370
Mikhail Reznikov and Yuri Fedosenko

Accelerating Gradient Descent with Projective Response
Surface Methodology. 376
Alexander Senov

Emmental-Type GKLS-Based Multiextremal Smooth Test Problems
with Non-linear Constraints 383
Ya.D. Sergeyev, D.E. Kvasov, and M.S. Mukhametzhanov

Author Index 389

Learning and Intelligent Optimization
11th International Conference, LION 11, Nizhny
Novgorod, Russia, June 19-21, 2017, Revised Selected
Papers

Battiti, R.; Kvasov, D.E.; Sergeyev, Y.D. (Eds.)

2017, XIII, 390 p. 92 illus., Softcover

ISBN: 978-3-319-69403-0
