Contents

1 Explicit-Implicit Methods with Applications to Banach Space Valued Functions in Abstract Fractional Calculus ............. 1
   1.1 Introduction ...................................... 1
   1.2 Semi-local Convergence for Implicit Methods ............. 3
   1.3 Semi-local Convergence for Explicit Methods ............. 9
   1.4 Applications to X-valued Fractional Calculus .............. 12
References ............................................ 19

2 Convergence of Iterative Methods in Abstract Fractional Calculus ............................................. 21
   2.1 Introduction ...................................... 21
   2.2 Semi-local Convergence for Implicit Methods ............. 23
   2.3 Semi-local Convergence for Explicit Methods ............. 27
   2.4 Applications to Abstract Fractional Calculus ............... 29
References ............................................ 39

3 Equations for Banach Space Valued Functions in Fractional Vector Calculi ......................................... 41
   3.1 Introduction ...................................... 41
   3.2 Semi-local Convergence for Implicit Methods ............. 43
   3.3 Semi-local Convergence for Explicit Methods ............. 47
   3.4 Applications to X-valued Fractional and Vector Calculi ... 49
References ............................................ 57

4 Iterative Methods in Abstract Fractional Calculus ............. 59
   4.1 Introduction ...................................... 59
   4.2 Semi-local Convergence for Implicit Methods ............. 61
   4.3 Semi-local Convergence for Explicit Methods ............. 65
   4.4 Applications to X-valued Fractional Calculus .............. 67
References ............................................ 71
