

Contents

1	Introduction to Medication Effects on Male Reproduction	1
2	Challenges of Obtaining Evidence-Based Information Regarding Medications and Male Fertility	5
2.1	Experimental Design	5
2.2	Species-Specificity and Reproductive Endpoints	7
2.3	Variation in Effects of Drugs in the Same Class	7
2.4	Few Studies with Live-Birth and Offspring Health as Outcomes	8
2.5	Individual Variation in Response	8
2.6	Illness Can Have Profound Effects on Male Reproductive Function	9
2.7	Mechanism of Toxicity Is Often Obscure	9
2.8	Drug Interactions in Humans Have Not Been Studied	9
3	Male Reproductive Functions Disrupted by Pharmacological Agents	13
3.1	Pre-testicular: The Hypothalamic–Pituitary–Gonadal (HPG) Axis	14
3.1.1	Endocrine Disrupting Chemicals	14
3.1.2	The Hypothalamus–Pituitary–Adrenal Axis and Corticosteroids	14
3.1.3	Sex Hormone Binding Globulin	15
3.1.4	Medications and Prolactin Levels	15
3.1.5	Medications and Thyroid Hormone Levels	17
3.2	Testicular: Spermatogenesis, Spermiogenesis, and Spermiation	18
3.3	Post-testicular: Epididymal Transit	18
3.4	Post-testicular: Ejaculation	19
3.4.1	Emission	20
3.4.2	Expulsion	20
3.4.3	Ejaculatory Dysfunction	21
3.5	Post-ejaculation Sperm Function	22
3.5.1	Sperm Transport in the Female Reproductive Tract	22
3.5.2	Fertilization and Offspring Health	23
3.6	Drug Metabolism	23

4	Exogenous Androgens and Male Reproduction	25
5	Phosphodiesterase Inhibitors (PDE Inhibitors) and Male Reproduction	29
5.1	Methylxanthines	32
5.2	Specific Phosphodiesterase Inhibitors	35
5.2.1	PDE5 and Male Reproduction	35
5.2.2	PDE5 Inhibitor Effects on Tissues In Vitro	36
5.2.3	PDE5 Inhibitor Effects on Testosterone Levels and Semen Quality in Humans	36
5.2.4	PDE5 Inhibitors in Experimental and Companion Species	37
6	Pain Medications and Male Reproduction	39
6.1	Opioids	39
6.1.1	Opioids and Testosterone Levels in Men	45
6.1.2	Opioids and Circulating PRL Levels	47
6.1.3	Pain Management in Men with Hypogonadism Desiring Fertility	48
6.1.4	The Endogenous Opioid System in Normal Male Reproduction	49
6.1.5	Opioids and Human Semen Quality	50
6.1.6	Opioids in Animal Models	50
6.2	Non-steroid Anti-inflammatory Drugs (NSAIDs)	52
6.2.1	NSAIDs and Human Male Reproduction	53
6.2.2	NSAIDs and Male Reproduction in Rodents	54
7	5α-Reductase Inhibitors (5ARIs) and Male Reproduction	59
7.1	5ARIs and Testosterone Levels	60
7.2	5ARIs and Semen Quality	61
8	Psychotropics and Male Reproduction	63
8.1	Antidepressants	64
8.1.1	SSRIs	75
8.1.2	SNRIs, NRIs, NDRIs, Serotonergic and Melatonergic Antidepressants	78
8.1.3	TCAs	79
8.1.4	MAO Inhibitors	81
8.2	GABA _A ergic Anxiolytics	82
8.2.1	Endocrine Effects of GABA _A ergic Medications	83
8.2.2	GABA _A ergic Medications, Spermatogenesis, and Semen	84
8.3	Antipsychotics	85
8.3.1	Antipsychotic Drugs and Increase in Peripheral PRL Levels	85
8.3.2	Antipsychotics and the HPG Axis	92
8.3.3	Antipsychotics and Ejaculatory Dysfunction	93
8.3.4	Antipsychotics and Semen Quality	95

8.3.5	Antipsychotic Medications in Experimental Animal Models	95
8.3.6	Lithium	97
8.4	Anticonvulsants	98
8.4.1	Anticonvulsants and the HPG Axis	98
8.4.2	Anticonvulsants and Semen Quality	99
8.4.3	Anticonvulsant Medications in Experimental Animal Models	100
9	Cardiovascular/Pulmonary Medications and Male Reproduction	103
9.1	Adrenergic Drugs	110
9.2	α -Adrenergic Agonists	110
9.2.1	α -Adrenergic Agonists and In Vitro Studies of Male Reproductive Tract Tissue	111
9.2.2	α -Adrenergic Agonists and the HPG Axis	111
9.2.3	α -Adrenergic Agonists and Ejaculatory Dysfunction	112
9.3	α -Adrenergic Antagonists (α -Blockers)	113
9.3.1	α -Adrenergic Antagonists and In Vitro Studies of Male Reproductive Tract Tissue	113
9.3.2	α -Adrenergic Antagonists and the HPG Axis	114
9.3.3	α -Adrenergic Antagonists and Human Ejaculatory Dysfunction	114
9.3.4	α -Adrenergic Antagonists and Ejaculation in Other Species	116
9.3.5	α -Adrenergic Antagonists and Semen Quality	117
9.3.6	α -Adrenergic Antagonists and Fertility	118
9.4	β -Adrenergic Agonists	118
9.5	β -Adrenergic Antagonists (β -Blockers)	119
9.6	Calcium Channel Blockers	121
9.6.1	Calcium Channel Blockers and Human Male Reproduction	121
9.6.2	Calcium Channel Blockers and Male Rat Reproduction	123
9.7	Angiotensin Converting Enzyme (ACE) Inhibitors	124
9.8	Diuretics	126
9.8.1	Spironolactone	126
9.8.2	Thiazide Diuretics	129
9.9	Digoxin	129
9.10	Hydralazine	130
10	Antimicrobials and Male Reproduction	131
10.1	Anti-parasitics	142
10.2	Antifungals	144
10.3	Antibacterials	148
10.3.1	Aminoglycosides	149
10.3.2	Amphenicols	150
10.3.3	Cephalosporin Beta-Lactams	150

10.3.4	Macrolides	151
10.3.5	Nitrofurans	152
10.3.6	Penicillin Beta-Lactams	153
10.3.7	Polypeptides	153
10.3.8	Fluoroquinolones	153
10.3.9	Sulfonamides	155
10.3.10	Tetracyclines	156
10.4	Mixed Antimicrobials	158
11	Antivirals and Male Reproduction	163
11.1	HIV Infection Effects on Semen Quality	169
11.2	Combination Antiretroviral Therapy (cART) Effect on Semen Quality	171
11.3	Mitochondrial Inhibition with HIV Medications	172
11.4	HIV Medication and the HPG Axis	173
11.5	HIV Medication and Spermatogenesis/Semen Quality	175
11.6	Purine Nucleoside Analogs	176
11.7	Other Antivirals	177
12	Immunosuppressants and Male Reproduction	179
12.1	Corticosteroids	186
12.1.1	Treatment of Antisperm Antibodies	186
12.1.2	Treatment of Inflammatory Diseases	187
12.1.3	Antirejection Treatment After Organ Transplant	188
12.1.4	Studies in Healthy Men	189
12.1.5	Studies in Non-human Primates	190
12.1.6	Endocrine Studies in Rodents	190
12.1.7	Spermatogenesis Studies in Rodents	191
12.1.8	Studies in Domestic Species	191
12.2	Cytostatics	193
12.2.1	Azathioprine and 6-Mercaptopurine	193
12.2.2	Methotrexate	195
12.2.3	Chlorambucil	197
12.2.4	Cyclophosphamide	198
12.2.5	Melphalan	201
12.3	Immunophilin Modulators	201
12.3.1	Calcineurin Inhibitor Effects on the HPG Axis	202
12.3.2	mTOR Inhibitor Effects on the HPG Axis	203
12.3.3	Immunophilin Modulators in Male Rodents	203
12.4	TNF- α Inhibitors	206
12.5	Sulfasalazine	206
13	Miscellaneous Drugs and Male Reproduction	211
13.1	Cimetidine	211
13.2	Colchicine	217
13.3	Ergotamine	218

13.4 Gastrokinetic Agents	219
13.5 Hydroxyurea	220
13.6 Metformin	222
13.7 Mifepristone	223
13.8 Propylthiouracil, Methimazole, Levothyroxine, Liothyronine ..	224
13.9 Retinoids	224
13.10 Statins	225
