</table>
‘Autistic Robots’ for Embodied Emulation of Behaviors Typically Seen in Children with Different Autism Severities ........................................ 105
Kim Baraka, Francisco S. Melo, and Manuela Veloso

Learning Relationships Between Objects and Places by Multimodal Spatial Concept with Bag of Objects ............................................. 115
Shota Isobe, Akira Taniguchi, Yoshinobu Hagiwara, and Tadahiro Taniguchi

There Once Was a Robot Storyteller: Measuring the Effects of Emotion and Non-verbal Behaviour .............................................. 126
Hendrik Striepe and Birgit Lugrin

Field Testing of the Influence of Assistive Wear on the Physical Fitness of Nursing-Care Workers .................................................. 137
Yumeko Imamura, Takayuki Tanaka, and Kazuki Takizawa

Developing Interaction Scenarios with a Humanoid Robot to Encourage Visual Perspective Taking Skills in Children with Autism – Preliminary Proof of Concept Tests ........................................... 147
Ben Robins, Kerstin Dautenhahn, Luke Wood, and Abolfazl Zaraki

Human-Like Hand Reaching by Motion Prediction Using Long Short-Term Memory ......................................................... 156
Phongtharin Vinayavekhin, Michiaki Tatsubori, Daiki Kimura, Yifan Huang, Giovanni De Magistris, Asim Munawar, and Ryuki Tachibana

User’s Personality and Activity Influence on HRI Comfortable Distances . . . 167
Silvia Rossi, Mariacarla Staffa, Luigi Bove, Roberto Capasso, and Giovanni Ercolano

A Need for Service Robots Among Health Care Professionals in Hospitals and Housing Services ............................................. 178
Kimmo J. Vänni and Sirpa E. Salin

Do You Think I Approve of That? Designing Facial Expressions for a Robot ............................................................. 188
Peter E. McKenna, Mei Yii Lim, Ayan Ghosh, Ruth Aylett, Frank Broz, and Gnanathusharan Rajendran

Robotic Device to Mediate Human-Human Hug-Driven Remote Communication .......................................................... 198
Eleuda Nunez, Masakazu Hirokawa, Hiroya Igarashi, and Kenji Suzuki
RoMa: A Hi-tech Robotic Mannequin for the Fashion Industry
Minoo Alemi, Ali Meghdari, Ehsan Saffari, Ahmad Zibafar, Leila Faryan, Ali Ghorbandaei Pour, Amin RezaSoltani, and Alireza Taheri

Walk the Talk: Gestures in Mobile Interaction
Zeynep Yücel, Francesco Zanlungo, and Masahiro Shiomi

Gaze Behavioral Adaptation Towards Group Members for Providing Effective Recommendations
Silvia Rossi and Pasquale D’Alterio

Subtle Reaction and Response Time Effects in Human-Robot Touch Interaction
Masahiro Shiomi, Takashi Minato, and Hiroshi Ishiguro

Young EFL Learners’ Attitude Towards RALL: An Observational Study Focusing on Motivation, Anxiety, and Interaction
Minoo Alemi, Ali Meghdari, and Nafiseh Sadat Haeri

Design of a Cloud-Based Robotic Platform for Accompanying and Interacting with Humans
Bruno Leme, Chiara Piezzo, Masakazu Hirokawa, and Kenji Suzuki

Influence of Environmental Context on Recognition Rates of Stylized Walking Sequences
Madison Heimerdinger and Amy LaViers

Creating Lively Behaviors in Social Robots
Inés Jara-Rivera, Álvaro Castro-González, José Carlos Castillo, Fernando Alonso-Martín, Maria Malfaz, and Miguel A. Salichs

What Went Wrong and Why? Diagnosing Situated Interaction Failures in the Wild
Sean Andrist, Dan Bohus, Ece Kamar, and Eric Horvitz

Toward 3D Printed Prosthetic Hands that Can Satisfy Psychosocial Needs: Grasping Force Comparisons Between a Prosthetic Hand and Human Hands
Ahmad Yaser Alhaddad, Sami Emad AlKhatib, Rahib Ahmed Khan, Salman Mohammad Ismail, Al-Sendibad Said Shehadeh, Abdellatif Mohammad Sadeq, and John-John Cabibihan

Integrating a Humanoid Robot into ECHONET-Based Smart Home Environments
Ha-Duong Bui, Cu Pham, Yuto Lim, Yasuo Tan, and Nak Young Chong
A Robot that Encourages Self-disclosure by Hug .......................... 324
   Masahiro Shiomi, Aya Nakata, Masayuki Kanbara, and Norihiro Hagita

Hand Gestures and Verbal Acknowledgments Improve
Human-Robot Rapport .......................................................... 334
   Jason R. Wilson, Nah Young Lee, Annie Saechao, Sharon Hershenson,
   Matthias Schuetz, and Linda Tickle-Degnen

Do Audio-Visual Stimuli Change Hug Impressions? ....................... 345
   Masahiro Shiomi and Norihiro Hagita

Impact of Tutoring Strategies in Grounded Lexicon Learning .......... 355
   Jens Nevens and Michael Spranger

Yes, of Course? An Investigation on Obedience and Feelings
of Shame Towards a Robot .................................................. 365
   Isabelle M. Menne

Dance with Me! Child-Robot Interaction in the Wild ...................... 375
   Gentiane Venture, Bipin Indurkhya, and Takamune Izui

Rethinking the Why of Socially Assistive Robotics Through Design ...... 383
   Ioana Ocnarescu and Isabelle Cossin

Role-Oriented Designing: A Methodology to Designing for Appearance
and Interaction Ways of Customized Professional Social Robots .......... 394
   Yang Su and Shuzhi Sam Ge

Exploring Users’ Reactions Towards Tangible Implicit Probes
for Measuring Human-Robot Engagement .................................. 402
   Mohammad Obaid, Yuan Gao, Wolmet Barendregt, and Ginevra Castellano

Gaze-Based Hints During Child-Robot Gameplay .......................... 413
   Eunice Mwangi, Emilia I. Barakova, Marta Diaz,
   Andreu Catalá Mallofre, and Matthias Rauterberg

Gender Difference in Expectations for Domestic Robots:
A Survey in Japan ............................................................... 423
   Tatsuya Nomura and Tsuyoshi Nakazawa

Motor Actions Prediction and Control for the Nao Robot Playing
Hand Clapping Games .......................................................... 432
   Yang Yi, Jishen Chu, and Ryad Chellali

The Importance of Mutual Gaze in Human-Robot Interaction .......... 443
   Kyveli Kompatsiari, Vadim Tikhanoff, Francesca Ciardo,
   Giorgio Metta, and Agnieszka Wykowska
About Decisions During Human-Robot Shared Plan Achievement: Who Should Act and How? ................................................................. 453
   Sandra Devin, Aurélie Clodic, and Rachid Alami

Improving User’s Performance by Motivation: Matching Robot Interaction Strategy with User’s Regulatory State ................................. 464
   Arturo Cruz-Mayá, Roxana Agrigoroaei, and Adriana Tapus

Social Group Motion in Robots .......................................................... 474
   Francesco Zanlungo, Zeynep Yücel, Florent Ferreri, Jani Even, Luis Yoichi Morales Saiki, and Takayuki Kanda

Shopping Mall Robots – Opportunities and Constraints from the Retailer and Manager Perspective ......................................................... 485
   Marketta Niemelä, Päivi Heikkilä, Hanna Lammi, and Virpi Oksman

Dynamic Gesture Recognition for Social Robots .................................. 495
   José Carlos Castillo, David Cáceres-Domínguez, Fernando Alonso-Martín, Álvaro Castro-González, and Miguel Ángel Salichs

Embodiment, Privacy and Social Robots: May I Remember You? .......... 506
   Meg Tonkin, Jonathan Vitale, Suman Ojha, Jesse Clark, Sammy Pfeiffer, William Judge, Xun Wang, and Mary-Anne Williams

A TV Chat Robot with Time-Shifting Function for Daily-Use Communication ................................................................. 516
   Shogo Nishimura, Hiromichi Kawanami, Masayuki Kanbara, and Norihiro Hagita

Naturalistic Conversational Gaze Control for Humanoid Robots - A First Step ................................................................. 526
   Hagen Lehmann, Ingo Keller, Reza Ahmadzadeh, and Frank Broz

   Sheng Zhang, Ho Seok Ahn, Jong Yoon Lim, Min Ho Lee, and Bruce A. MacDonald

Dialogue Design for a Robot-Based Face-Mirroring Game to Engage Autistic Children with Emotional Expressions .......................... 546
   Pauline Chevalier, Jamy J. Li, Eloise Ainger, Alyssa M. Alcorn, Snezana Babovic, Vicky Charisi, Suncica Petrovic, Bob R. Schadenberg, Elizabeth Pellicano, and Vanessa Evers

Look but Don’t Stare: Mutual Gaze Interaction in Social Robots .......... 556
   Yanxia Zhang, Jonas Beskow, and Hedvig Kjellström
Recognition of Gestural Behaviors Expressed by Humanoid Robotic Platforms for Teaching Affect Recognition to Children - A Healthy Subjects Pilot Study ........................................ 567
    Britney A. English, Alexis Coates, and Ayanna Howard

A Visual Environment for Reactive Robot Programming of Macro-level Behaviors ........................................ 577
    Floris Erich, Masakazu Hirokawa, and Kenji Suzuki

Hand in Hand with Robots: Differences Between Experienced and Naive Users in Human-Robot Handover Scenarios .......... 587
    Sebastian Meyer zu Borgsen, Jasmin Bernotat, and Sven Wachsmuth

Subjective Stress in Hybrid Collaboration ........................................ 597
    Sarah L. Müller, Sebastian Stiehm, Sabina Jeschke, and Anja Richert

Development of Control Mechanism for Safety Enhancement in Bilateral Control Robot Applications .......................... 607
    R.M. Maheshi Ruwanthika and Seiichiro Katsura

Understanding Anthropomorphism: Anthropomorphism is not a Reverse Process of Dehumanization .......................... 618
    Jakub Złotowski, Hidenobu Sumioka, Christoph Bartneck, Shuichi Nishio, and Hiroshi Ishiguro

An Evaluation Tool of the Effect of Robots in Eldercare on the Sense of Safety and Security .................................. 628
    Neziha Akalin, Andrey Kiselev, Annica Kristoffersson, and Amy Loutfi

Becoming Real: An Anthropological Approach to Evaluating Robots in the Real World ..................................... 638
    Louise Veling

Human Perceptions of the Severity of Domestic Robot Errors ................................................................. 647
    Alessandra Rossi, Kerstin Dautenhahn, Kheng Lee Koay, and Michael L. Walters

What Can We Learn from the Long-Term Users of a Social Robot? ......................................................... 657
    Csaba Kertész and Markku Turunen

Adaptive Emotional Chatting Behavior to Increase the Sociability of Robots ................................................... 666
    Igor Rodríguez, José María Martínez-Otzeta, Elena Lazkano, and Txelo Ruiz
Measuring Children’s Perceptions of Robots’ Social Competence: Design and Validation ................................................................. 676
   Vicky Charisi, Daniel P. Davison, Frances M. Wijnen, Dennis Reidsma, and Vanessa Evers

Rule Extraction Method Considering Reliability for Synchronized Behavior of Group Robots in Multi-party Conversations .............. 687
   Kazuki Sakai, Yuichiro Yoshikawa, and Hiroshi Ishiguro

Omnidirectional Traveling Instruction for Behavior Navigation ............ 697
   Yuuya Suzuki, Naoji Shiroma, Arvin Agah, and Eimei Oyama

News Application Adaptation Based on User Sensory Profile ............... 708
   Roxana Agrigoroaie, Stefan Dan Ciocirlan, and Adriana Tapus

Robot Compliant Behaviour with Mixed-Initiative Interaction in an Obstacle Avoidance Scenario ..................................................... 718
   Chiara Piezzo, Bruno Leme, Masakazu Hirokawa, and Kenji Suzuki

“Xylotism”: A Tablet-Based Application to Teach Music to Children with Autism ............................................................... 728
   Maryam Tavakol Elahi, Amin Habibnejad Korayem, Azadeh Shariati, Ali Meghdari, Minoo Alemi, Ehsan Ahmadi, Alireza Taheri, and Rozita Heidari

Starting a Conversation by Multi-robot Cooperative Behavior ............. 739
   Takamasa Iio, Yuichiro Yoshikawa, and Hiroshi Ishiguro

Adaptive Strategies for Multi-party Interactions with Robots in Public Spaces ................................................................. 749
   Saida Mussakhoyeva, Nazerke Kalidolda, and Anara Sandygulova

Author Index ........................................................................... 759
Social Robotics
9th International Conference, ICSR 2017, Tsukuba, Japan, November 22-24, 2017, Proceedings
2017, XV, 761 p. 307 illus., Softcover
