Contents

Parallel Algorithms

Parallel Numerical Methods Course for Future Scientists and Engineers...... 3
   Iosif Meyerov, Sergey Bastrakov, Konstantin Barkalov,
   Alexander Sysoyev, and Victor Gergel

GPU Acceleration of Dense Matrix and Block Operations for Lanczos
Method for Systems over Large Prime Finite Field ......................... 14
   Nikolai Zamarashkin and Dmitry Zheltkov

Means for Fast Performance of the Distributed Associative Operations
in Supercomputers. .......................................................... 27
   Gennady Stetsyura

Scalability Evaluation of NSLP Algorithm for Solving Non-Stationary
Linear Programming Problems on Cluster Computing Systems ............ 40
   Irina Sokolinskaya and Leonid B. Sokolinsky

Dynamic Optimization of Linear Solver Parameters in Mathematical
Modelling of Unsteady Processes ........................................ 54
   Dmitry Bagaev, Igor Konshin, and Kirill Nikitin

Optimization of Numerical Algorithms for Solving Inverse Problems
of Ultrasonic Tomography on a Supercomputer. ......................... 67
   Sergey Romanov

The Comparison of Large-Scale Graph Processing Algorithms
Implementation Methods for Intel KNL and NVIDIA GPU ................. 80
   Ilya Afanasyev and Vladimir Voevodin

Two Approaches to Speeding Up Dynamics Simulation for a Low
Dimension Mechanical System ............................................. 95
   Stepan Orlov, Alexey Kuzin, and Nikolay Shabrov

Solving Time-Consuming Global Optimization Problems with Globalizer
Software System .......................................................... 108
   Alexander Sysoyev, Konstantin Barkalov, Vladislav Sovrasov,
   Ilya Lebedev, and Victor Gergel

An Approach for Parallel Solving the Multicriterial Optimization
Problems with Non-convex Constraints ................................. 121
   Victor Gergel and Evgeny Kozinov
Increasing Performance of the Quantum Trajectory Method by Grouping Trajectories ............................................. 136

Alexey Liniov, Valentin Volokitin, Iosif Meyerov, Mikhail Ivanchenko, and Sergey Denisov

Tensor Train Global Optimization: Application to Docking in the Configuration Space with a Large Number of Dimensions. .................. 151

A.V. Sulimov, D.A. Zheltkov, I.V. Oferkin, D.C. Kutov, E.V. Katkova, E.E. Tyrtyshnikov, and V.B. Sulimov

On the Parallel Least Square Approaches in the Krylov Subspaces ........... 168

V.P. Il’in

Supercomputer Simulation

Simulation of Seismic Waves Propagation in Multiscale Media: Impact of Cavernous/Fractured Reservoirs ........................................ 183

Vladimir Tcheverda, Victor Kostin, Galina Reshetova, and Vadim Lisitsa

Computational Modeling of Turbulent Structuring of Molecular Clouds Based on High Resolution Calculating Schemes ......................... 194

Boris Rybakin, Valery Goryachev, and Stepan Ageev

The Combinatorial Modelling Approach to Study Sustainable Energy Development of Vietnam .................................................. 207

Aleksey Edelev, Valeriy Zorkaltsev, Sergey Gorsky, Doan Van Binh, and Nguyen Hoai Nam

Ani3D-Extension of Parallel Platform INMOST and Hydrodynamic Applications ........................................ 219

Vasily Kramarenko, Igor Konshin, and Yuri Vassilevski

Numerical Simulation of Light Propagation Through Composite and Anisotropic Media Using Supercomputers ......................... 229

Roman Galev, Alexey Kudryavtsev, and Sergey Trashkeev

The Technology of Nesting a Regional Ocean Model into a Global One Using a Computational Platform for Massively Parallel Computers CMF ...... 241

Alexandr Koromyslov, Rashit Ibrayev, and Maxim Kaurkin

Parallel Heterogeneous Multi-classifier System for Decision Making in Algorithmic Trading ........................................ 251

Yuri Zelenkov

Smoothed-Particle Hydrodynamics Models: Implementation Features on GPUs ........................................ 266

Sergey Khrapov and Alexander Khoperskov
