# Contents

## Keynote Paper

The Computer Science Way of Thinking in Human History and Consequences for the Design of Computer Science Curricula  
*Juraj Hromkovič and Regula Lacher*

## Accessibility, Visualizations and Physical Computing

Adolescent and Adult Student Attitudes Towards Progress Visualizations  
*Onni Aarne, Petrus Peltola, Antti Leinonen, Juho Leinonen, and Arto Hellas*

3D Printing as Medium for Motivation and Creativity in Computer Science Lessons  
*Petra Kastl, Oliver Krisch, and Ralf Romeike*

Teaching Materials in Informatics for Lower Secondary School Blind Students  
*Ludmila Jašková and Mária Stankovičová*

Teachers’ Expectations and Experience in Physical Computing  
*Mareen Przybylla, Finn Henning, Carla Schreiber, and Ralf Romeike*

## Teacher Development and Assessment

Investigating Informatics Teachers’ Initial Pedagogical Content Knowledge on Modeling and Simulation  
*Nataša Grgurina, Erik Barendsen, Cor Suhre, Klaas van Veen, and Bert Zwaneveld*

A Notation for Sets, Sequences and Series: Possible Benefits for Understanding and Use  
*Susanna H. du Plessis and Vreda Pieterse*

## Bebras Tasks

Bebras Task Analysis in Category Little Beavers in Slovakia  
*Lucia Budinská, Karolína Mayerová, and Michaela Veselovská*
Promoting Computational Thinking Skills: Would You Use this Bebras Task? ......................................................... 102

Annalisa Calcagni, Violetta Lonati, Dario Malchiodi, Mattia Monga, and Anna Morpurgo

Country Reports

Introducing Programming and Digital Competence in Swedish K-9 Education ..................................................... 117

Fredrik Heintz, Linda Mannila, Lars-Åke Nordén, Peter Parnes, and Björn Regnell

Preparedness of Japan’s Elementary School Teachers for the Introduction of Computer Programming Education ................................................. 129

Yutaro Ohashi

Baltic and Nordic K-12 Teacher Perspectives on Computational Thinking and Computing ........................................ 141

Arnold Pears, Valentina Dagiene, and Egle Jasute

Computational Thinking/Programming, Computational Abilities

Identifying Students’ Misconceptions on Basic Algorithmic Concepts Through Flowchart Analysis ........................................... 155

Ebrahim Rahimi, Erik Barendsen, and Ineke Henze

A Preliminary Investigation on Computational Abilities in Secondary School ......................................................... 169

Ugo Solitro, Margherita Pasini, Debora De Gradi, and Margherita Brondino

Solving Everyday Challenges in a Computational Way of Thinking ........................................... 180

Bernhard Standl

System Papers

Teaching Basic Elements of OOP in School Informatics During Constructing Virtual Micro-worlds ........................................... 195

Evgeny A. Eremin

Real-Time Data Analyses in Secondary Schools Using a Block-Based Programming Language ........................................... 207

Andreas Grillenberger and Ralf Romeike

XLogoOnline: A Single-Page, Browser-Based Programming Environment for Schools Aiming at Reducing Cognitive Load on Pupils ........................................... 219

Juraj Hromkovič, Giovanni Serafini, and Jacqueline Staub
Introduction to Bebras Challenge Management: Overview and Analyses of Developed Systems .................................. 232
Valentina Dagiene, Gabriele Stupuriene, Lina Vinikiene, and Rimantas Zakauskas

Author Index ................................................................. 245
Informatics in Schools: Focus on Learning Programming
Dagiene, V.; Hellas, A. (Eds.)
2017, XI, 245 p. 69 illus., Softcover
ISBN: 978-3-319-71482-0
