Contents

A. D. Soloviev ................................................................. 1
D. B. Gnedenko, S. S. Demidov, A. M. Zubkov, and V. A. Kashtanov

Queueing Models and Stochastic Networks

The Analysis of Cloud Computing System as a Queueing System
with Several Servers and a Single Buffer ........................... 11
Ivan Zaryadov, Andrey Kradenyh, and Anastasiya Gorbunova

Analysis of K-Capacity Queueing System
with Two-Heterogeneous Server ....................................... 23
H. Okan Isguder and Umay Uzunoglu Kocer

Fluid Limit for Closed Queueing Network with Several Multi-servers ... 31
Svetlana Anulova

Stationarity Conditions for the Control Systems that Provide Service
to the Conflicting Batch Poisson Flows .............................. 43
Maria Rachinskaya and Mikhail Fedotkin

Transient Analysis of a Multi-server Queuing Model with Discouraged
Arrivals and Retention of Reneging Customers ...................... 54
Rakesh Kumar and Sapana Sharma

Priority Management in a Semi-Markov Queuing Model ............. 65
O. B. Zaytseva and E. V. Kondrashova

Optimal Antivirus Protection Strategy in Computer Networks ....... 75
Yulia Grishunina and Larisa Manita

Necessary Conditions for the Existence of Stationary Distribution
in the Adaptive Control System of Conflict Flows .................. 83
Mikhail Fedotkin and Evgeniy Kudryavtsev

One Server Queue with Bulk Arrivals .............................. 97
A. D. Soloviev and V. N. Sobolev

Priority Systems with Orientation. Analytical and Numerical Results .... 109
Gheorghe Mishkoy

Discrete Gamma Approximation in Retrial Queue MMPP/M/1
Based on Moments Calculation ...................................... 121
Ekaterina Fedorova, Anatoly Nazarov, and Svetlana Paul
Inventory Management System with On/Off Control of Output
Product Flow ................................................................. 132
Anatoly Nazarov and Valentina Broner

On a Multi-server Priority Queue with Preemption in Crowdsourcing .... 145
A. Krishnamoorthy, Dhanya Shajin, and A. S. Manjunath

MAP/PH/1 Retrial Queueing-Inventory System with Orbital Search
and Reneging of Customers ................................................. 158
A. Krishnamoorthy and Dhanya Shajin

Analysis of a Wireless Sensor Node with Varying Rates of Energy
Harvesting and Consumption ............................................. 172
Alexander Dudin, Sergey Dudin, Olga Dudina,
and Chesoong Kim

Infinite Order Systems of Differential Equations and Large Scale
Random Neural Networks ................................................ 183
Soltan K. Kanzitdinov and Sergey A. Vasilyev

Reliability, Risk, Insurance

On Reliability Function of a Parallel System with Three
Renewable Components .................................................. 199
A. M. Andronov, V. V. Rykov, and V. M. Vishnevsky

Analysis of Renewable Reliability Systems by Markovization Method .... 210
V. V. Rykov and D. V. Kozyrev

New Applied Probability Models and Their Stability ....................... 221
Ekaterina Bulinskaya

Analytic-Numerical Investigations of Singular Problems for Survival
Probability in the Dual Risk Model with Simple Investment Strategies .... 236
T. A. Belkina, N. B. Konyukhova, and B. V. Slavko

Asymptotic Behavior of Reliability Function for Multidimensional
Aggregated Weibull Type Reliability Indices ............................ 251
Julia Farkas, Enkelejd Hashorva, and Vladimir I. Piterbarg

Sensitivity Analysis of Reliability and Performability Measures
for a Multi-server Queueing System with Constant Retrial Rate ........... 265
Dmitry Efrosinin

Bivariate Teissier Distributions ........................................... 279
Nikolai Kolev, Ngo Ngoc, and Yang Ting Ju
## Analytical Methods and Limit Theorems
