# Table of Contents

Preface \hfill vii  
Acknowledgement \hfill xi  
Table of Contents \hfill xiii

## Part I. Geometric Topics

### Chapter 1. Area and Dissection 3
- Section 1. Qualitative and Quantitative Treatments of Area 3
- Section 2. The Bolyai-Gerwin Theorem and Pythagoras’ Theorem 11
- Section 3. Dissection Problems 16

### Chapter 2. Projective Geometry 29
- Section 1. Synthetic Approach 29
- Section 2. Metric Approach 37
- Section 3. Analytic Approach 44

### Chapter 3. Conic Sections 55
- Section 1. Loci 55
- Section 2. The Parabola 60
- Section 3. Ellipses and Hyperbolas 66

### Chapter 4. Inversive Geometry 79
- Section 1. Inversion 79
- Section 2. Applications to Euclidean Geometry 84
- Section 3. Mohr-Mascheroni Constructions 95

### Chapter 5. Convexity 105
- Section 1. Figures 105
- Section 2. Convex Figures 114
- Section 3. Figures of Constant Width 123
# Part II. Other Topics

## Chapter 6. Balancing Problems
- Section 1. Identifying Fake Coins 137
- Section 2. Other Problems 144
- Section 3. Other Balances 151

## Chapter 7. Graph Theory
- Section 1. Basic Concepts 159
- Section 2. Trees 169
- Section 3. Directed Graphs 177

## Chapter 8. Beanstalks
- Section 1. Red and Blue Beanstalks 187
- Section 2. Infinite Beanstalks 193
- Section 3. Beansprouts 197

## Chapter 9. Inequalities
- Section 1. The Rearrangement Inequality 207
- Section 2. The Majorization Inequality 214
- Section 3. Trigonometric Inequalities 222

## Chapter 10. Polynomial Equations
- Section 1. Complex Numbers 233
- Section 2. Cubic Equations 238
- Section 3. Quartic Equations 241
