## Contents

### Invited Papers

Properties and Exact Solution Approaches for the Minimum Cost Dominating Tree Problem .......................... 3  
*André Rossi, Alok Singh, and Shyam Sundar*

Review of Approaches for Linked Data Ontology Enrichment ........ 27  
*S. Subhashree, Rajeev Irny, and P. Sreenivasa Kumar*

Formal Verification of Optimizing Compilers .......................... 50  
*Yiji Zhang and Lenore D. Zuck*

### Security and Privacy

Security Analysis of EMV Protocol and Approaches for Strengthening It. 69  
*Khedkar Shrikrishna, N. V. Narendra Kumar, and R. K. Shyamasundar*

Secure Synthesis of IoT via Readers-Writers Flow Model ............... 86  
*Shashank Khobragade, N. V. Narendra Kumar, and R. K. Shyamasundar*

Auditing Access to Private Data on Android Platform .................. 105  
*Vishal Maral, Nachiket Trivedi, and Manik Lal Das*

Privacy Preserving Data Utility Mining Using Perturbation ............ 112  
*Joseph Jisna and A. Salim*

BDI Based Performance Enhancement in DNSSEC ........................ 121  
*Kollapalli Ramesh Babu and Vineet Padmanabh*

A Layered Approach to Fraud Analytics for NFC-Enabled Mobile Payment System ........................................... 127  
*Pinki Prakash Vishwakarma, Amiya Kumar Tripathy, and Srikanth Vemuru*

### Distributed and Multiprocessing Approaches

Time-Triggered Scheduling for Multiprocessor Mixed-Criticality Systems ........................................ 135  
*Lalatendu Behera and Purandar Bhaduri*
Effect of Live Migration on Virtual Hadoop Cluster ................................. 152
   Garima Singh and Anil Kumar Singh

Performance Analysis of Parallel K-Means with Optimization
Algorithms for Clustering on Spark ................................................... 158
   V. Santhi and Rini Jose

Hashing Supported Iterative MapReduce Based Scalable SBE
Reduct Computation ................................................................. 163
   U. Venkata Divya and P. S. V. S. Sai Prasad

Networks Protocols and Applications

Reliable Condition Monitoring of Telecommunication Services
with Time-Varying Load Characteristic ................................... 173
   Günter Fahrnberger

Fast and Secure Handoffs for V2I Communication in Smart City
Wi-Fi Deployment ................................................................. 189
   Pranav Kumar Singh, Subhredhu Chattopadhyay,
   Pradeepkumar Bhale, and Sukumar Nandi

Ego Based Community Detection in Online Social Network ........ 205
   Paramita Dey, Sarbani Roy, and Sanjit Roy

A Gateway Virtual Network Function for InfiniBand
and Ethernet Networks ......................................................... 211
   Utkal Sinha, Ratnakar Dash, and Nandish Jayaram Kopri

GMP2P: Mobile P2P over GSM for Efficient File Sharing ......... 217
   Sumit Kumar Tetarave, Somanath Tripathy, and R. K. Ghosh

Simulation of Network Growth Using Community Discovery
in Biological Networks ............................................................ 232
   Y. Divya Brahmani, T. Sobha Rani, and S. Durga Bhavani

A Style Sheets Based Approach for Semantic Transformation
of Web Pages ................................................................. 240
   Gollapudi V. R. J. Sai Prasad, Venkatesh Choppella,
   and Sridhar Chimalakonda

Efficient Anomaly Detection Methodology for Power Saving in Massive
IoT Architecture ................................................................. 256
   Palani Kumar, Meenakshi D’Souza, and Debabrata Das
Databases, Algorithms, Data Processing and Applications

Approximation Algorithms for Permanent Dominating Set Problem on Dynamic Networks .............................................. 265
Subhrangsu Mandal and Arobinda Gupta

Lightweight Verifiable Auditing for Outsourced Database in Cloud Computing .................................................. 280
Mayank Kumar and Syam Kumar Pasupuleti

A One Phase Priority Inheritance Commit Protocol .................. 288
Sarvesh Pandey and Udai Shanker

Issues and Challenges in Big Data: A Survey ...................... 295
Ripon Patgiri

Generate Optimal Distributed Query Plans Using Clonal Selection Process .................................................. 301
Ruby Rani

CapAct: A Wordnet-Based Summarizer for Real-World Events from Microblogs ........................................... 306
Surender Singh Samant, N. L. Bhanu Murthy, and Aruna Malapati

ARMM: Adaptive Resource Management Model for Workflow Execution in Clouds ....................................... 315
Harshpreet Singh and Rajneesh Randhawa

A New Priority Heuristic Suitable in Mobile Distributed Real Time Database System ........................................ 330
Prakash Kumar Singh and Udai Shanker

Efficient Algorithms for Local Density Based Anomaly Detection ........ 336
Ankita Sinha and Prasanta K. Jana

Author Index ......................................................... 343
Distributed Computing and Internet Technology
14th International Conference, ICDCIT 2018,
Bhubaneswar, India, January 11–13, 2018, Proceedings
Negi, A.; Bhatnagar, R.; Parida, L. (Eds.)
2018, XI, 343 p. 99 illus., Softcover
ISBN: 978-3-319-72343-3
