Preface

The IFIP TC6 WG 6.1 Joint International Conference on Formal Techniques for Networked and Distributed Systems, FORTE 2002, was held this year at Rice University, Houston, Texas, on November 11–14. This annual conference provides a forum for researchers and practitioners from universities and industry to meet and advance technologies in areas of specification, testing, and verification of distributed systems and communication protocols. The main topics are:

- FDT-based system and protocol engineering.
- Semantical foundations.
- Extensions of FDTs.
- Formal approaches to concurrent/distributed object-oriented systems.
- Real-time and probability aspects.
- Performance modeling and analysis.
- Quality of service modeling and analysis.
- Verification and validation.
- Relations between informal and formal specification.
- FDT-based protocol implementation.
- Software tools and support environments.
- FDT application to distributed systems.
- Protocol testing, including conformance testing, interoperability testing, and performance testing.
- Test generation, selection, and coverage.
- Practical experience and case studies.
- Corporate strategic and financial consequences of using formal methods.

A total of 61 papers were submitted to FORTE 2002, and reviewed by members of the program committee and additional reviewers. The program committee selected 22 regular papers, two tool papers, and two posters for presentation at the conference. The program also included three tutorials and five invited talks.

FORTE 2002 would like to gratefully acknowledge the financial support received from HP, OFFIS, Microsoft Research, and Verisity. FORTE 2002 could not take place without the effort of the PC members, reviewers, and people participating in the local organization. The editors wish to thank all of them.

Doron A. Peled
Moshe Y. Vardi
Organization

FORTE 2002 was organized by the Department of Computer Science, Rice University, Houston, Texas.

Executive Committee

Program Chairs: Doron A. Peled (University of Warwick, UK) and Moshe Y. Vardi (Rice University)

Program Committee:

R. Alur
D. Bjorner
G. v. Bochmann
T. Bolognesi
E. Brinksma
A. Cavalli
S.T. Chanson
P. Dembinski
H. Garavel
S. Gnesi
G.J. Holzmann
A. Hu
C. Jard
