# Table of Contents

Editors' Introduction ............................................. 1  
*Nicolò Cesa-Bianchi, Masayuki Numao, Rüdiger Reischuk*

## INVITED PAPERS

Mathematics Based on Learning ..................................... 7  
*Susumu Hayashi*

Data Mining with Graphical Models ............................... 22  
*Rudolf Kruse, Christian Borgelt*

On the Eigenspectrum of the Gram Matrix and Its Relationship to the Operator Eigenspectrum .......................... 23  
*John Shawe-Taylor, Chris Williams, Nello Cristianini, Jaz Kandola*

In Search of the Horowitz Factor: Interim Report on a Musical Discovery Project ........................................... 41  
*Gerhard Widmer*

Learning Structure from Sequences, with Applications in a Digital Library .................................................. 42  
*Ian H. Witten*

## REGULAR CONTRIBUTIONS

### Learning Boolean Functions

On Learning Monotone Boolean Functions under the Uniform Distribution ...................................................... 57  
*Kazuyuki Amano, Akira Maruoka*

On Learning Embedded Midbit Functions ........................ 69  
*Rocco A. Servedio*

Maximizing Agreements and CoAgnostic Learning ................ 83  
*Nader H. Bshouty, Lynn Burroughs*

### Boosting and Margin-Based Learning

Optimally-Smooth Adaptive Boosting and Application to Agnostic Learning ..................................................... 98  
*Dmitry Gavinsky*

Large Margin Classification for Moving Targets .................. 113  
*Jyrki Kivinen, Alex J. Smola, Robert C. Williamson*
On the Smallest Possible Dimension and the Largest Possible Margin of Linear Arrangements Representing Given Concept Classes
Uniform Distribution .......................................................... 128
Jürgen Forster, Hans Ulrich Simon

Learning with Queries
A General Dimension for Approximately Learning Boolean Functions .......................................................... 139
Johannes Köbler, Wolfgang Lindner

The Complexity of Learning Concept Classes with Polynomial General Dimension .......................................................... 149
Johannes Köbler, Wolfgang Lindner

On the Absence of Predictive Complexity for Some Games ............... 164
Yuri Kalnishkan, Michael V. Vyugin

Learning and Information Extraction
Consistency Queries in Information Extraction ......................... 173
Gunter Grieser, Klaus P. Jantke, Steffen Lange

Ordered Term Tree Languages which Are Polynomial Time
Inductively Inferable from Positive Data ...................................... 188
Yusuke Suzuki, Takayoshi Shoudai, Tomoyuki Uchida, Tetsuhiro Miyahara

Inductive Inference
Reflective Inductive Inference of Recursive Functions .................. 203
Gunter Grieser

Classes with Easily Learnable Subclasses ................................... 218
Sanjay Jain, Wolfram Menzel, Frank Stephan

On the Learnability of Vector Spaces ........................................ 233
Valentina S. Harizanov, Frank Stephan

Learning, Logic, and Topology in a Common Framework ............... 248
Eric Martin, Arun Sharma, Frank Stephan

Inductive Logic Programming
A Pathology of Bottom-Up Hill-Climbing in Inductive Rule Learning ...... 263
Johannes Färnkranz

Minimised Residue Hypotheses in Relevant Logic ......................... 278
Bertram Fronhöfer, Akihiro Yamamoto
Language Learning

Compactness and Learning of Classes of Unions of Erasing Regular Pattern Languages ....................................................... 293
   Jin Uemura, Masako Sato
A Negative Result on Inductive Inference of Extended Pattern Languages ................................................................. 308
   Daniel Reidenbach

Statistical Learning

RBF Neural Networks and Descartes’ Rule of Signs ......................... 321
   Michael Schmitt
Asymptotic Optimality of Transductive Confidence Machine ............. 336
   Vladimir Vovk
An Efficient PAC Algorithm for Reconstructing a Mixture of Lines ...... 351
   Sanjoy Dasgupta, Elan Pavlov, Yoram Singer
Constraint Classification: A New Approach to Multiclass Classification ................................................................. 365
   Sariel Har-Peled, Dan Roth, Dave Zimak
How to Achieve Minimax Expected Kullback-Leibler Distance from an Unknown Finite Distribution ......................... 380
   Dietrich Braess, J"urgen Forster, Tomas Sauer, Hans U. Simon

Applications and Heuristics

Classification with Intersecting Rules ....................................... 395
   Tony Lindgren, Henrik Bostr"om
Feedforward Neural Networks in Reinforcement Learning Applied to High-Dimensional Motor Control ......................... 403
   R"emi Coulom

Author Index ............................................................................. 415
Algorithmic Learning Theory
13th International Conference, ALT 2002, Lübeck, Germany, November 24-26, 2002, Proceedings
Cesa-Bianchi, N.; Numao, M.; Reischuk, R. (Eds.)
2002, XII, 420 p., Softcover
ISBN: 978-3-540-00170-6
