Preface

It was our great pleasure to organize and host the Second International Workshop on Biologically Motivated Computer Vision (BMCV 2002), which followed the highly successful BMCV 2000 in Seoul. We welcomed biologists, computer scientists, mathematicians, neuroscientists, physicists, and psychologists to share their views of how the brain solves the ill-posed problems of vision. Nature is the best existence proof that there is a solution of the most fundamental vision problems, and we hope to learn from nature the way to build artificial vision systems which can adapt to different environments and tasks as easily and reliably as we do. We enjoyed a lively discussion of vision topics spanning early vision, mid-level vision, attention, recognition, robotics and cognitive vision systems.

Even though the decision to host the workshop in Tübingen came very late (March 2002), and therefore the deadlines were rather tight, we received a total of 97 papers by the end of June. Each of the papers was thoroughly reviewed by at least two members of the program committee and in addition by the local organizing committee. In this context, we especially want to thank the program committee and additional referees for the time and effort that went into the reviews. In the end, 22 papers were accepted for oral presentation and 37 for poster presentation. The selected papers span the whole range of vision from neuronal models of vision to psychophysical investigations of human recognition performance. Correspondingly, the workshop was divided into seven sessions, proceeding (roughly) from topics concerning low-level early vision to high-level cognitive aspects of vision. In addition to these presentations we are very grateful that six distinguished scientists accepted our invitation to give an introduction to these topics and present their work at BMCV 2002.

BMCV 2002 was organized by the Max Planck Institute for Biological Cybernetics in Tübingen and took place in the main lecture hall building (Kupferbau) of the University of Tübingen. We are grateful to the Max Planck Society for financial support and to the Eberhard Karls Universität for local support and for hosting the conference registration webpage.

On behalf of the organizing and program committees we welcomed attendees to BMCV 2002 in Tübingen. We deliberately arranged for ample time outside the lecture hall to meet colleagues during the posters sessions and coffee breaks. The posters were situated right outside the lecture hall and all posters were on display for the whole conference.

Finally, we hope you found the BMCV 2002 workshop a rewarding and memorable experience, and that you had an enjoyable stay in the beautiful old town of Tübingen and other parts of Germany.

September 2002

Heinrich H. Bülthoff, Christian Wallraven
Organization

BMCV 2002 was organized by the Max Planck Institute for Biological Cybernetics (MPI).

Sponsoring Institutions

Max Planck Institute for Biological Cybernetics, Tübingen, Germany
University of Tübingen, Germany
Computer Koch, Tübingen, Germany

Executive Committee

Conference Chair: Heinrich H. Bülthoff (MPI Tübingen, Germany)
Program Chair: Christian Wallraven (MPI Tübingen, Germany)
Co-chair: Seong-Whan Lee (Korea University, Korea)
Co-chair: Tomaso Poggio (MIT, USA)

Program Committee

Andrew Blake Microsoft Research, Cambridge, UK
Volker Blanz University of Freiburg, Germany
Joachim Buhmann University of Bonn, Germany
Hans Burkhardt University of Freiburg, Germany
Henrik I. Christensen Royal Institute of Technology, Sweden
Chun-Sup Chung Yonsei University, Korea
Luciano da F. Costa University of Sao Paulo, Brazil
James Crowley INPG, France
Gustavo Deco Siemens, Germany
Shimon Edelman Cornell University, USA
Jan-Olof Eklundh KTH, Sweden
Dario Floreano EPFL, Switzerland
Pascal Fua EPFL, Switzerland
Kunihiako Fukushima University of Electro-Communications, Japan
Martin Giese University Clinic Tübingen, Germany
Luc van Gool ETH Zürich, Switzerland
Stefan Hahn DaimlerChrysler Research, Germany
Katsushi Ikeuchi University of Tokyo, Japan
Christof Koch Caltech, USA
VIII  Organization

Michael Langer  McGill University, Canada
Choongkil Lee  Seoul National University, Korea
James Little  University of British Columbia, Canada
David Lowe  University of British Columbia, Canada
Hanspeter Mallot  University of Tübingen, Germany
Heiko Neumann  University of Ulm, Germany
Heinrich Niemann  University of Erlangen, Germany
Giulio Sandini  University of Genoa, Italy
Bernt Schiele  ETH Zürich, Switzerland
Bernhard Schölkopf  MPI Tübingen, Germany
Pawan Sinha  MIT, USA
Tienu Tan  Academy of Sciences, China
Shimon Ullman  Weizmann Institute of Science, Israel
Thomas Vetter  University of Freiburg, Germany
Rolf Würtz  Ruhr University of Bochum, Germany
Hezy Yeshurun  Tel-Aviv University, Israel
Steven W. Zucker  Yale University, USA

Additional Referees

P. Bayerl  R. Jiüling  L. Natale
L. Bergen  M. Kagesawa  M. Riesenhuber
O. Bousquet  D. Katsoulas  O. Shahar
D. Cheng  C. Koch  A. Shahrokni
J. Daugman  J. Koenderink  M. Tang
B. Haasdonsk  M. Kouh  D. Walther
T. Hansen  V. Kumar  Y. Wei
B. Heisle  M. Levine  J. Weston
W. Hu  G. Li  F. Wichmann
P. Huggins  J. Lou  S. Zucker
S. Ilic  M. Molkaraie
