## Contents

### Section A: Introduction

1 **Towards Ecological Relevance – Progress and Pitfalls in the Path Towards an Understanding of Mycorrhizal Functions in Nature**

D.J. Read

| 1.1 Summary | 3 |
| 1.2 Introduction | 4 |
| 1.3 The Platform Provided by Reductionist Approaches | 4 |
| 1.4 Approaches to Examination of Mycorrhizal Function at the Community Level | 8 |
| 1.4.1 The Microcosm Approach | 10 |
| 1.4.2 The Field Approach | 21 |
| 1.5 Conclusion | 23 |
| References | 24 |

### Section B: Ecophysiology, Ecosystems Effects and Global Change

2 **Carbon and Nutrient Fluxes Within and Between Mycorrhizal Plants**

S.W. Simard, D. Durall, M. Jones

<p>| 2.1 Summary | 34 |
| 2.2 Introduction | 34 |
| 2.3 Ecto-mycorrhiza and Nutrient Uptake | 35 |
| 2.3.1 Quantitative Effects of Ecto-mycorrhiza on Nutrient Uptake by Plants | 35 |
| 2.3.2 Mechanisms of Increased Nutrient Uptake | 39 |
| 2.3.3 Transport of Nutrients Within the Ecto-mycorrhizal Fungal Mycelium | 43 |
| 2.4 Carbon Flux in Ecto-mycorrhizal Plants | 44 |</p>

7 Diversity of Ecto-mycorrhizal Fungal Communities in Relation to the Abiotic Environment

S. Erland, A.F.S. Taylor

7.1 Summary

7.2 Introduction

7.3 Natural Abiotic Factors Influencing Ecto-mycorrhizal Community Structure

7.3.1 Edaphic Factors

7.3.2 Soil Organic Matter and Spatial Heterogeneity

7.3.3 Moisture

7.3.4 pH

7.3.5 Temperature

7.3.6 Wildfire

7.4 Effects of Pollution and Forest Management Practices on Ecto-mycorrhizal Fungal Communities

7.4.1 Elevated CO₂

7.4.2 Ozone

7.4.3 Heavy Metals

7.4.4 N-Deposition and Fertilisation

7.4.5 Acidification

7.4.6 Liming

7.4.7 Wood Ash Application and Vitality Fertilisation

7.5 Conclusions

7.6 Future Progress

8 Genetic Studies of the Structure and Diversity of Arbuscular Mycorrhizal Fungal Communities

J.P. Clapp, T. Helgason, T.J. Daniell, J.P.W. Young

8.1 Summary

8.2 Introduction

8.2.1 The Importance of Community Structure in Arbuscular Mycorrhizal Fungi

8.2.2 Molecular Identification of Arbuscular Mycorrhizal Fungi

8.3 Strategies for Identifying Arbuscular Mycorrhizal Fungi Using Molecular Markers

8.3.1 Methods Available

8.3.2 Primers Developed for Analysis of Arbuscular Mycorrhizal Fungal Ribosomal Genes: A Short History

8.4 Investigations of Arbuscular Mycorrhizal Fungal Communities

8.4.1 Primers that Target Single Families or Species

8.4.2 Primers Intended to Target all Glomalean Fungi

8.4.3 Alternative Approaches to Molecular Characterisation of Arbuscular Mycorrhizal Fungi

8.5 Comparison of Molecular and Morphological Data

8.5.1 Phylogeny and Taxonomy

8.5.2 Field Data

8.6 The Genetic Organisation of Arbuscular Mycorrhizal Fungi

8.6.1 Heterogeneous Sequences in Spores and Cultures

8.6.2 “Contaminant” Sequences in Spores and Cultures

8.6.3 How Is the Sequence Heterogeneity Organised?

8.6.4 How Is Sequence Heterogeneity Maintained?

8.6.5 How Does This Affect Analysis of Field Sequences?

8.7 Future Prospects

16 Specificity in the Arbuscular Mycorrhizal Symbiosis

I.R. Sanders

16.1 Summary

16.2 Introduction

16.3 Definitions of Specificity

16.4 Why Is Specificity in the Mycorrhizal Symbiosis Ecologically Interesting?

16.5 Theoretical Considerations on the Evolution of Specificity in Mutualistic Symbioses

16.6 Why Do We Not Already Know Whether Specificity Exists?

16.7 Evidence Supporting a Lack of Specificity

16.7.1 Arbuscular Mycorrhizal Fungi Have a Broad Host Range

16.7.2 A Systematic Perspective

16.7.3 Repeatable Patterns of Arbuscular Mycorrhizal Fungal Community Structure

16.7.4 Physiological Evidence

16.8 Evidence Supporting Specificity

16.8.1 Arbuscular Mycorrhizal Fungal Effects on Plant Fitness

16.8.2 Plant Species Effects on Fungal Fitness

16.9 What Information Is Missing and Which Experiments Are Needed?

16.9.1 Arbuscular Mycorrhizal Fungal Benefit from Specific Hosts

16.9.2 Reciprocal Benefit Between Plant Species and Fungal Species

16.9.3 A Genetic Basis for Specificity in Plants

16.9.4 A Genetic Basis for Specificity in Arbuscular Mycorrhizal Fungi

16.9.5 The Importance of the Hyphal Network for Understanding Specificity

16.10 Conclusions
