Preface vii

1 Introduction 1
Michel Beuthe, Veli Himanen, Aura Reggiani and Luca Zamparini

PART A: Technological Developments in Transport

2 The Political Economy of Transport Innovations 11
Eran Feitelson and Ilan Salomon

2.1 Introduction 11
2.2 Factors That Affect Adopting of Innovations: A Brief Review 12
2.3 A Political Economy Framework for Analyzing Transport Innovation Adoption 14
2.4 The Experience of Three Innovations: Road Pricing, Rail and Telecommuting Centres 17
2.5 Discussion: The Sources of Support or Opposition 20
2.6 Conclusions 23

3 ICTs and Accessibility: An Action Space Perspective on the Impact of New Information and Communication Technologies 27
Martin Dijkstra

3.1 Introduction 27
3.2 Accessibility Dimensions and Action Spaces 28
3.3 Spatio-temporal Perspective on New ICTs 31
3.4 Perpetual Perspective on New ICTs 37
3.5 Conclusions and Future Research 40
4  E-commerce and the Container Shipping Industry  47
   Hans van Ham and Bart Kuipers

   4.1 Introduction  47
   4.2 The Container Shipping Industry  48
   4.3 E-commerce and E-business  53
   4.4 Container Shipping and E-commerce  61
   4.5 Conclusions  65

5  In Search of Urban Futures in the E-economy  69
   Marina van Geenhuizen and Peter Nijkamp

   5.1 Setting the Scene  69
   5.2 Limited Access to Global Grids  71
   5.3 Limits of Electronic Communication  72
   5.4 Value Chain Adjustment and Urban Functions  75
   5.5 Urban Futures and Uncertainty  80

PART B:  New Forms of Travel Behaviour

6  Inertia of Travel Behaviour: A Stated Preference Analysis of Commuting  87
   Job van Exel and Piet Rietveld

   6.1 Introduction  87
   6.2 Method  88
   6.3 Past and Current Commuting Behaviour  91
   6.4 Stated Preference Experiment  97
   6.5 The Model  103
   6.6 Conclusions  110

7  The Same Procedure as Last Weekend: Routines and Leisure Mobility  123
   Martin Lanzendorf

   7.1 Introduction  123
   7.2 Theoretical Background: A Rational Choice Model  124
   7.3 Data and Methodology  127
   7.4 Comparing Workday Travel with Weekend Leisure Travel  129
   7.5 Decision Making and Routines for Leisure Travel  133
   7.6 The Impact of Neighbourhood, Car Ownership and Mobility Style on the Decision Making Process  139
7.7 Conclusions 141

8 Parking Policy Measures and Their Effects on Shopping and Work Trips 147
Jari Kurri

8.1 Introduction 147
8.2 Data and Methods 148
8.3 Results 155
8.4 Discussion 165

9 Acceptability of Marginal Cost-based Pricing in Urban Transport 169
Jens Schade

9.1 Introduction 169
9.2 Previous Research 170
9.3 Theoretical Background 171
9.4 Method 175
9.5 Results 177
9.6 Summary and Discussion 183

PART C: Freight Transport Innovations

10 Transport and Logistics as Network Competencies in a Localized Industrial Cluster 191
Leif Gjesing Hansen

10.1 Introduction 191
10.2 Freight Transport as a Residual of Firms' Location and Trading Links 193
10.3 Transport Systems as a Resource for Production Systems 194
10.4 The Interactions between Systems of Production and Transportation: A Network Framework 197
10.5 The Furniture Industry of Salling: An Example of Regional Transport Networks and Capabilities 199
10.6 Conclusions 206
xii  Contents

11  A Methodology to Evaluate Potential Locations for Intermodal Barge Terminals: A Policy Decision Support Tool  
    Cathy Macharis  
    211

11.1 Introduction  
11.2 Overview of the Literature  
11.3 Overview of the Methodology Adopted  
11.4 Network Model  
11.5 Result of the Analysis  
11.6 Multi-criteria Analysis  
11.7 Conclusion  
    211  
    212  
    213  
    215  
    216  
    221  
    232

12  Rail-rail Hub-terminals as an Alternative for Shunting: An Explorative Comparative Case Study  
    Yvonne Bontekoning and Jan Jacob Trip  
    235

12.1 Introduction  
12.2 Layout and Operations: Shunting Versus Hub-operations  
12.3 Research Approach  
12.4 Results of the Performance Comparison  
12.5 Discussion  
12.6 Conclusions  
    235  
    237  
    240  
    242  
    247  
    249

PART D: Scenario Perspectives

13  Light Rail: Backbone of European Urban Regions  
    Hugo Priemus  
    255

13.1 Introduction  
13.2 Light Rail: Definitions and Typology  
13.3 Successful Light Rail in Some French and German Cities  
13.4 Japanese Cities: Synergy between Public Transport and Real Estate Development  
13.5 Promotion of Economic Vitality and Accessibility of Central Cities in the Netherlands  
13.6 Lessons from International Experiences  
13.7 Feeder and Interconnecting Public Transport  
13.8 Conclusions  
    255  
    257  
    260  
    261  
    263  
    265  
    268  
    270
14 Scenario Building for the Future of the Tel Aviv Metropolitan Area and Its Transportation System Using the Delphi Method
Yoram Shiftan, Sigal Kaplan and Shalom Hakkert

14.1 Introduction 275
14.2 Background 276
14.3 Sustainable Development and Transportation 278
14.4 Methodology 280
14.5 Results and Discussion 283
14.6 Conclusions 289

15 Assessing Spatial Planning Policy with Accessibility Indicators: The Case of Lille’s Metropolis Scenario
Alain L’Hostis, Philippe Menerault and Christophe Decoupygn

15.1 Introduction 293
15.2 The Scenarios 294
15.3 Comparison of the Scenarios with the Regional Council and State Orientations 298
15.4 Method Principles 299
15.5 Is the ‘Hegemonic Metropolis’ a Reality? 301
15.6 Intermodality for Reinforcing the Internal Coherence of the Metropolis 306
15.7 Conclusion 310

16 European Innovations in Multi-modal Assessment: How Will They Support and Enhance the Public Policy Process?
John Nellthorp

16.1 Background 313
16.2 Multi-modal Transport Appraisal 313
16.3 Spatial Output and Employment Effects 316
16.4 Refinements in Theory and Practice of Multi-modal Appraisal 320
16.5 Participation by Stakeholders 323
16.6 Shift in Governments’ Perspectives on Appraisal 324
16.7 Links and Conclusions 327
