

Content overview

1. Leveraging information technology for science	1
1.1. Motivation.....	1
1.2. Analytical focus	5
1.3. Objectives	7
1.4. Approach.....	7
2. Characteristics of scientific knowledge infrastructures	9
2.1. Theoretical analysis.....	10
2.2. Empirical analysis: Emerging knowledge infrastructures	34
2.3. Visions of scientific knowledge infrastructures	55
2.4. Synthesis	57
3. Structure of scientific knowledge	83
3.1. Objectives	83
3.2. Theoretical foundations.....	87
3.3. Object-oriented model of scientific knowledge	102
3.4. Elements of scientific knowledge	124
4. Implications.....	187
4.1. Feasibility: IS Cybrarium.....	187
4.2. Conclusion	196

Contents

Preface	V
Content overview	VII
Contents	IX
List of abbreviations	XIII
Index of tables	XV
Index of figures	XVII
1. Leveraging information technology for science	1
1.1. Motivation	1
1.1.1. Impact of previous IT revolutions on science	2
1.1.2. Potential changes to scientific knowledge	4
1.2. Analytical focus	5
1.3. Objectives	7
1.4. Approach	7
2. Characteristics of scientific knowledge infrastructures	9
2.1. Theoretical analysis	10
2.1.1. Traditional infrastructures: scientific journals	10
2.1.1.1. Process perspective	11
2.1.1.2. Object perspective	12
2.1.1.3. Organization perspective	14
2.1.1.4. Validation	16
2.1.2. Impact of information technology	18
2.1.2.1. Object perspective	19
2.1.2.2. Process perspective	25
2.1.2.3. Organization perspective	32
2.1.2.3.1. Stakeholders	32
2.1.2.3.2. Objectives	33
2.2. Empirical analysis: Emerging knowledge infrastructures	34
2.2.1. Electronic journal	36
2.2.1.1. Hybrid electronic journals	37
2.2.1.2. Originally electronic journal	38
2.2.1.2.1. Journal of Artificial Intelligence Research	38
2.2.1.2.2. MISQ Discovery	39

2.2.1.3. Pre-print archive.....	40
2.2.2. Digital library	41
2.2.2.1. JSTOR.....	42
2.2.3. Encyclopedia	42
2.2.3.1. Free Online Dictionary of Computing	43
2.2.3.2. Internet Encyclopedia of Philosophy (IEP).....	44
2.2.3.3. GenBank	44
2.2.4. Collaboratory.....	45
2.2.4.1. Space Physics & Aeronomics Collaboratory	46
2.2.4.2. Principia Cybernetica Web	46
2.2.4.3. Information Systems Cybrarium	48
2.2.4.4. ISWorldNet.....	48
2.2.5. Bulletin board.....	49
2.2.6. Logic server.....	50
2.2.6.1. Ontolingua server.....	50
2.2.6.2. CYC	51
2.2.6.3. Toronto Virtual Enterprise (TOVE).....	52
2.3. Visions of scientific knowledge infrastructures	55
2.3.1. Hypertext-based visions	55
2.3.2. Seminar.....	57
2.3.3. Eco-museum.....	57
2.4. Synthesis	57
2.4.1. Mode of interaction	60
2.4.1.1. Type of interaction.....	61
2.4.1.2. Electronic submission	62
2.4.1.3. Time of publishing	63
2.4.1.4. Updating contributions.....	63
2.4.1.5. Notification	63
2.4.2. Structure of knowledge.....	64
2.4.2.1. Structuring criteria	64
2.4.2.2. Types of content.....	65
2.4.2.3. Link directionality.....	65
2.4.2.4. Relationship types.....	66
2.4.2.5. Maintenance of consistency	66
2.4.2.6. Identification of missing knowledge.....	66
2.4.2.7. Scope.....	66
2.4.2.8. Versioning.....	67
2.4.3. Presentation	67
2.4.3.1. Visualization aids.....	67
2.4.3.2. Navigation aids	68
2.4.3.3. Filtering mechanisms	68
2.4.3.4. Internationalization	68
2.4.3.5. Customization	69
2.4.3.6. Separation of knowledge and presentation	69
2.4.3.7. Client configuration	70
2.4.3.8. Document format	70

2.4.3.9. Print version	71
2.4.4. Governance.....	71
2.4.4.1. Selectivity	71
2.4.4.2. Authentication.....	71
2.4.4.3. Authentication mechanisms	72
2.4.4.4. Anonymous contributions	72
2.4.4.5. Revenue model.....	72
2.4.5. Technology.....	76
2.4.5.1. Server types.....	76
2.4.5.2. Search technology.....	76
2.4.5.3. Standards.....	80
2.4.5.4. Document authentication	81
2.4.5.5. Duration of record-keeping	81
2.4.5.6. Support for sessions	81
3. Structure of scientific knowledge	83
3.1. Objectives	83
3.1.1. Information systems development.....	84
3.1.2. Epistemological adequacy	84
3.1.3. Standardization.....	87
3.2. Theoretical foundations.....	87
3.2.1. Concept of scientific knowledge	87
3.2.1.1. Knowledge-that.....	88
3.2.1.2. Knowledge-how.....	89
3.2.1.3. Knowledge by acquaintance	90
3.2.2. Problems related to knowledge.....	90
3.2.2.1. Existence of absolute truth.....	91
3.2.2.2. Hermeneutics – the problem of meaning	91
3.2.2.3. Cumulative nature of knowledge	92
3.2.2.4. Demarcation of scientific knowledge.....	93
3.2.2.5. Structure of categories	94
3.2.2.6. Complexity.....	96
3.2.2.7. Nonmonotonic reasoning	97
3.2.2.8. Modal reasoning.....	97
3.2.3. Relationship with paradigms of science	98
3.3. Object-oriented model of scientific knowledge	102
3.3.1. Approach	103
3.3.2. Meta model.....	105
3.3.2.1. Generic attributes	106
3.3.2.2. Knowledge-related activities.....	107
3.3.3. Analysis of epistemologies.....	113
3.3.3.1. Popper: Logic of scientific discovery.....	114
3.3.3.2. Nagel: Structure of science	115
3.3.3.3. Dubin: Theory building.....	116
3.3.3.4. Bunge: Philosophy of science	117
3.3.3.5. Babbie, Emory: Epistemologies in scientific practice.....	118

3.3.3.6. Synthesis	120
3.4. Elements of scientific knowledge	124
3.4.1. Concept.....	124
3.4.1.1. Attributes and relationships	126
3.4.1.2. Subtypes.....	137
3.4.1.3. Activities.....	141
3.4.2. Statement.....	144
3.4.2.1. Attributes and relationships	145
3.4.2.2. Subtypes of 'statement'.....	151
3.4.2.3. Activities.....	153
3.4.3. Theory	155
3.4.3.1. Attributes and relationships	156
3.4.3.2. Activities.....	165
3.4.4. Problem	169
3.4.4.1. Attributes and relationships	170
3.4.4.2. Activities.....	172
3.4.5. Framework	173
3.4.5.1. Attributes and relationships	173
3.4.5.2. Activities.....	175
3.4.6. Data	175
3.4.6.1. Attributes and relationships	176
3.4.6.2. Activities.....	178
3.4.7. Method	178
3.4.7.1. Attributes and relationships	179
3.4.7.2. Activities.....	181
3.4.8. Project.....	182
3.4.8.1. Attributes and relationships	182
3.4.8.2. Activities.....	184
4. Implications.....	187
4.1. Feasibility: IS Cybrarium.....	187
4.1.1. Cybrarium architecture	188
4.1.2. Meta structure.....	191
4.1.3. Open architecture	191
4.1.4. Meta journal	192
4.1.5. Collaborative filtering	192
4.1.6. Annotation.....	193
4.1.7. Notification.....	194
4.1.8. Instant publishing	194
4.1.9. Competitive contributions	195
4.1.10. Identification of promising research problems	196
4.2. Conclusion	196
