Acknowledgments ........................................................................................................ V
Preface: All yours ........................................................................................................ VII

Part I: Heading Towards Customer Centric Enterprises ............................................. 1
An Introduction

1 The Customer Centric Enterprise .......................................................................... 3
An integrative overview on this book
Mitchell M. Tseng and Frank T. Piller

Part II: Mass Customization and Personalization ..................................................... 17
Key Strategies for Customer Centric Enterprises

2 Examination of Mass Customization Through Field Evidence ........................... 19
Bart MacCarthy, Philip G. Brabazon and Johanna Bramham

3 The Many Faces of Personalization ....................................................................... 35
An integrative economic overview of mass customization and personalization
Kai Riemer and Carsten Totz

4 Economic Evaluation of Mini-Plants for Mass Customization .............................. 51
A decentralized setting of customer-centric production units
Ralf Reichwald, Frank T. Piller, Stephan Jaeger and Stefan Zanner

5 Customer Driven Manufacturing Versus Mass Customization ............................ 71
Comparing system design principles for mass customization and customer driven manufacturing
Klaus-Dieter Thoben

6 User Modeling and Personalization ..................................................................... 85
Experiences in German industry and public administration
Thomas Franke and Peter Mertens

7 Art Customization ................................................................................................ 109
Individualization and personalization are characteristics of art
Jochen Gros
Part III: Customer Centric Design and Development .......................... 121
  Developing product families for customization and efficient manufacturing

8 Product Families for Mass Customization ................................. 123
  Understanding the architecture
  Xuehong Du, Mitchell M. Tseng and Jianxin Jiao

9 Common Platform Architecture .............................................. 163
  Identification for a set of similar products
  Zahed Siddique and David W. Rosen

10 Reconfigurable Models and Product Templates ......................... 183
  Means of increasing productivity in the product development process
  Jordan J. Cox, Gregory M. Roach and Shawn S. Teare

11 Case-Based Reasoning ...................................................... 209
  Rapid cost estimation of mass-customized products
  Naken Wongvasu, Sagar V. Kamarthi and Ibrahim Zeid

12 Using TRIZ to Overcome Mass Customization Contradictions .......... 231
  Darrell L. Mann and Ellen Domb

Part IV: Interfacing and Integrating the Customer .......................... 243
  Getting customers involved and optimally informed

13 Web-Based Do-It-Yourself Product Design ............................. 247
  Halimahtun M. Khalid and Martin G. Helander

14 Modeling Consumer Behavior in the Customization Process .......... 267
  Sri Hartati Kurniawan, Mitchell M. Tseng and Richard H. Y. So

15 Usability of Design by Customer Websites .............................. 283
  Oon Yin Bee and Halimahtun M. Khalid

16 Applications of Kansei Engineering to Personalization .......... 301
  Practical ways to include consumer expectations into personalization and customization concepts
  Rosa Porcar, M. Such, E. Alcántara, Ana Cruz Garcia and A. Page

17 Knowledge Based Product Configuration ................................. 315
  A documentation tool for configuration projects
  Lars Hvam and Martin Malis

18 The Customer at the Final Frontier of Mass Customization ......... 329
  Carsten Svensson and Thomas Jensen
Part V: Customer Centric Manufacturing ......................................................... 347
   Process design, production planning and control for achieving near mass production efficiency

19 Flexibility and Reconfigurability for Mass Customization .... 349
   An analytical approach
   Alessandro Urbani, Lorenzo Molinari-Tosatti, Roberto Bosani and Fabrizio Pierpaoli

20 Distributed Demand Flow Customization ............................. 361
   Alexander Tsigkas, Erik de Jongh, Agis Papantoniou and Vassilis Loumos

21 Segmented Adaptive Production Control .......................... 381
   Enabling mass customization manufacturing
   Jens R. Lopitzsch and Hans-Peter Wiendahl

22 Challenges of Mass Customization Manufacturing .......... 395
   Michael Schenk and Ralph Seelmann-Eggebert

23 Modularization in Danish Industry ................................. 411
   Poul Kyvsgaard Hansen, Thomas Jensen and Niels Henrik Mortensen

24 A Framework for Selecting a Best-Fit Mass Customization Strategy ........................................ 429
   The MC Data Acquisition Framework approach
   Claudia Mchunu, Aruna de Alwis and Janet Efstatiou

Part VI: Applying Mass Customization to the Fashion Industry .......... 447
   Building a customer centric value chain for apparel and footwear customization

25 Towards the Extended User Oriented Shoe Enterprise ...... 451
   Enabling information technologies for process management of mass customization using the example of the footwear industry
   Hans-Jörg Bullinger, Frank Wagner, Mehmet Kürümlioglu and Andreas Bröcker

26 Implementing a Mass Customized Clothing Service .......... 465
   A strategy model for implementing a mass customized clothing service in a High Street store
   Celia P. A. Taylor, Ray J. Harwood, Jane L. Wyatt and Michael J. Rouse

27 Individualized Avatars and Personalized Customer Consulting ............................................... 477
   A platform for fashion shopping
   Thorsten Gurski, Henning Hinderer and Uwe Rotter

28 Footwear Fit Categorization ......................................................... 491
   Ameersing Luximon, Ravindra S. Goonetilleke and Kwok-L. Tsui
29 Virtual Reality and CAD/CAM for Customized Shoe Manufacturing .............................................................. 501
How virtual reality and CAD/CAM enable custom shoe manufacturing in mass markets
Marco Sacco, Giampaolo P. Viganò and Ian Paris

Part VII: New Directions ............................................................................................................. 517
Future challenges for building the customer centric enterprise

30 New Directions for Mass Customization ............................................................................. 519
Setting an agenda for future research and practice in mass customization, personalization, and customer integration
Frank T. Piller and Mitchell M. Tseng
The Customer Centric Enterprise
Advances in Mass Customization and Personalization
Tseng, M.M.; Piller, F. (Eds.)
2003, XII, 536 p. 75 illus., Softcover
ISBN: 978-3-540-02492-7
