

Preface to the Fifth Corrected Printing of the Sixth Edition

The biggest change in this printing is in Theorem 10.1.9, where the proof of part b) has been corrected and rewritten. I am indebted to *Yang Ge* for pointing out the gap in the previous proof and for other helpful suggestions. In addition some other corrections and improvements here and there have been carried out, mainly based on useful comments from (in alphabetical order), *Nikolai Chernov*, *Giulia Di Nunno*, *Ulrik Skre Fjordheim*, *Sindre Froyn*, *Helge Holden*, *Gautam Iyer*, *Torstein Nilssen*, *Steffen Sjursen*, *Jan Ubøe*, *Zhiguo Yan* and *Yan Zhu*. I thank them all for their help.

I am also grateful to Dina Haraldsson for once again offering her valuable typing assistance.
