

Table of Contents

Invited Papers

From Knowledge-Based to Skill-Based Systems: Sailing as a Machine Learning Challenge	1
<i>Pieter Adriaans</i>	
Two-Eyed Algorithms and Problems	9
<i>Leo Breiman</i>	
Next Generation Data Mining Tools: Power Laws and Self-similarity for Graphs, Streams and Traditional Data	10
<i>Christos Faloutsos</i>	
Taking Causality Seriously: Propensity Score Methodology Applied to Estimate the Effects of Marketing Interventions	16
<i>Donald B. Rubin</i>	

Contributed Papers

Support Vector Machines with Example Dependent Costs	23
<i>Ulf Brefeld, Peter Geibel, and Fritz Wysotzki</i>	
Abalearn: A Risk-Sensitive Approach to Self-play Learning in Abalone	35
<i>Pedro Campos and Thibault Langlois</i>	
Life Cycle Modeling of News Events Using Aging Theory	47
<i>Chien Chin Chen, Yao-Tsung Chen, Yeali Sun, and Meng Chang Chen</i>	
Unambiguous Automata Inference by Means of State-Merging Methods . . .	60
<i>François Coste and Daniel Fredouille</i>	
Could Active Perception Aid Navigation of Partially Observable Grid Worlds?	72
<i>Paul A. Crook and Gillian Hayes</i>	
Combined Optimization of Feature Selection and Algorithm Parameters in Machine Learning of Language	84
<i>Walter Daelemans, Véronique Hoste, Fien De Meulder, and Bart Naudts</i>	
Iteratively Extending Time Horizon Reinforcement Learning	96
<i>Damien Ernst, Pierre Geurts, and Louis Wehenkel</i>	

Volume under the ROC Surface for Multi-class Problems	108
<i>César Ferri, José Hernández-Orallo, and Miguel Angel Salido</i>	
Improving the AUC of Probabilistic Estimation Trees	121
<i>César Ferri, Peter A. Flach, and José Hernández-Orallo</i>	
Scaled CGEM: A Fast Accelerated EM	133
<i>Jörg Fischer and Kristian Kersting</i>	
Pairwise Preference Learning and Ranking	145
<i>Johannes Fürnkranz and Eyke Hüllermeier</i>	
A New Way to Introduce Knowledge into Reinforcement Learning	157
<i>Pascal Garcia</i>	
Improvement of the State Merging Rule on Noisy Data in Probabilistic Grammatical Inference	169
<i>Amaury Habrard, Marc Bernard, and Marc Sebban</i>	
Collective Intelligence with Sequences of Actions – Coordinating Actions in Multi-agent Systems	181
<i>Pieter Jan 't Hoen and Sander M. Bohte</i>	
Rademacher Penalization over Decision Tree Prunings	193
<i>Matti Kääriäinen and Tapio Elomaa</i>	
Learning Rules to Improve a Machine Translation System	205
<i>David Kauchak and Charles Elkan</i>	
Optimising Performance of Competing Search Engines in Heterogeneous Web Environments	217
<i>Rinat Khossainov and Nicholas Kushmerick</i>	
Robust k -DNF Learning via Inductive Belief Merging	229
<i>Frédéric Koriche and Joël Quinqueton</i>	
Logistic Model Trees	241
<i>Niels Landwehr, Mark Hall, and Eibe Frank</i>	
Color Image Segmentation: Kernel Do the Feature Space	253
<i>Jianguo Lee, Jingdong Wang, and Changshui Zhang</i>	
Evaluation of Topographic Clustering and Its Kernelization	265
<i>Marie-Jeanne Lesot, Florence d'Alché-Buc, and Georges Siolas</i>	
A New Pairwise Ensemble Approach for Text Classification	277
<i>Yan Liu, Jaime Carbonell, and Rong Jin</i>	
Self-evaluated Learning Agent in Multiple State Games	289
<i>Koichi Moriyama and Masayuki Numao</i>	

Classification Approach towards Ranking and Sorting Problems	301
<i>Shyamsundar Rajaram, Ashutosh Garg, Xiang Sean Zhou, and Thomas S. Huang</i>	
Using MDP Characteristics to Guide Exploration in Reinforcement Learning	313
<i>Bohdana Ratitch and Doina Precup</i>	
Experiments with Cost-Sensitive Feature Evaluation	325
<i>Marko Robnik-Šikonja</i>	
A Markov Network Based Factorized Distribution Algorithm for Optimization	337
<i>Roberto Santana</i>	
On Boosting Improvement: Error Reduction and Convergence Speed-Up . .	349
<i>Marc Sebban and Henri-Maxime Suchier</i>	
Improving SVM Text Classification Performance through Threshold Adjustment	361
<i>James G. Shanahan and Norbert Roma</i>	
Backoff Parameter Estimation for the DOP Model	373
<i>Khalil Sima'an and Luciano Buratto</i>	
Improving Numerical Prediction with Qualitative Constraints	385
<i>Dorian Šuc and Ivan Bratko</i>	
A Generative Model for Semantic Role Labeling	397
<i>Cynthia A. Thompson, Roger Levy, and Christopher D. Manning</i>	
Optimizing Local Probability Models for Statistical Parsing	409
<i>Kristina Toutanova, Mark Mitchell, and Christopher D. Manning</i>	
Extended Replicator Dynamics as a Key to Reinforcement Learning in Multi-agent Systems	421
<i>Karl Tuyls, Dries Heytens, Ann Nowe, and Bernard Manderick</i>	
Visualizations for Assessing Convergence and Mixing of MCMC	432
<i>Jarkko Venna, Samuel Kaski, and Jaakko Peltonen</i>	
A Decomposition of Classes via Clustering to Explain and Improve Naive Bayes	444
<i>Ricardo Vilalta and Irina Rish</i>	
Improving Rocchio with Weakly Supervised Clustering	456
<i>Romain Vinot and François Yvon</i>	
A Two-Level Learning Method for Generalized Multi-instance Problems . .	468
<i>Nils Weidmann, Eibe Frank, and Bernhard Pfahringer</i>	

Clustering in Knowledge Embedded Space	480
<i>Yungang Zhang, Changshui Zhang, and Shijun Wang</i>	
Ensembles of Multi-instance Learners	492
<i>Zhi-Hua Zhou and Min-Ling Zhang</i>	
Author Index	503

Machine Learning: ECML 2003

14th European Conference on Machine Learning,
Cavtat-Dubrovnik, Croatia, September 22-26, 2003,
Proceedings

Lavrač, N.; Gamberger, D.; Todorovski, L.; Blockeel, H.
(Eds.)

2003, XVI, 512 p., Softcover

ISBN: 978-3-540-20121-2
