# Table of Contents

## Invited Papers

Ten Challenges *Redux*:
Recent Progress in Propositional Reasoning and Search ..................... 1
  *Henry Kautz and Bart Selman*

Automated Mechanism Design:
A New Application Area for Search Algorithms ........................... 19
  *Tuomas Sandholm*

Languages versus Packages for Constraint Problem Solving .............. 37
  *Mark Wallace*

Constraint Patterns ............................................................. 53
  *Toby Walsh*

## Best Paper

Control Abstractions for Local Search ..................................... 65
  *Pascal Van Hentenryck and Laurent Michel*

## Full Papers

Improved Algorithms for Counting Solutions in Constraint Satisfaction Problems .............................. 81
  *Ola Angelsmark and Peter Jonsson*

Boosting Chaff’s Performance by Incorporating CSP Heuristics .......... 96
  *Carlos Ansótegui, Jose Larrubia, and Felip Manyà*

Efficient CNF Encoding of Boolean Cardinality Constraints ........... 108
  *Olivier Bailleux and Yacine Boufkhad*

A Two-Stage Hybrid Algorithm for Pickup and Delivery Vehicle Routing Problems with Time Windows ........................................... 123
  *Russell Bent and Pascal Van Hentenryck*

Solving Finite Domain Constraint Hierarchies by Local Consistency and Tree Search .......................................................... 138
  *Stefano Bistarelli, Philippe Codognet, Kin-Chuen Hui, and Jimmy Ho Man Lee*

</table>
A New Class of Binary CSPs for which Arc-Consistency Is a Decision Procedure ................. 807
   David A. Cohen

Semi-automatic Modeling by Constraint Acquisition ..................... 812
   Remi Coletta, Christian Bessière, Barry O’Sullivan, Eugene C. Freuder, Sarah O’Connell, and Joel Quinqueton

Structured vs. Unstructured Large Neighborhood Search: A Case Study on Job-Shop Scheduling Problems with Earliness and Tardiness Costs .... 817
   Emilie Danna and Laurent Perron

Using the Breakout Algorithm to Identify Hard and Unsolvable Subproblems .................................................. 822
   Carlos Eisenberg and Boi Faltings

Toy(FD): Sketch of Operational Semantics ......................... 827
   Antonio J. Fernández, Teresa Hortalá-González, and Fernando Sáenz-Pérez

Scheduling in the Face of Uncertain Resource Consumption and Utility ... 832
   Jeremy Frank and Richard Dearden

Supertree Construction with Constraint Programming ............. 837
   Ian P. Gent, Patrick Prosser, Barbara M. Smith, and Wu Wei

(In)Effectiveness of Look-Ahead Techniques in a Modern SAT Solver .... 842
   Enrico Giunchiglia, Marco Maratea, and Armando Tacchella

Reduce and Assign: A Constraint Logic Programming and Local Search Integration Framework to Solve Combinatorial Search Problems ........ 847
   Nuno Gomes, Zita Vale, and Carlos Ramos

A Canonicity Test for Configuration ........................................ 853
   Stephane Grandcolas, Laurent Henocque, and Nicolas Prcovic

Improved Algorithms for Max-restricted Path Consistency ........... 858
   Fabrizio Grandoni and Giuseppe F. Italiano

CP-IP Techniques for the Bid Evaluation in Combinatorial Auctions .... 863
   Alessio Guerri and Michela Milano

A Two-Level Search Strategy for Packing Unequal Circles into a Circle Container ............................................. 868
   Wen Qi Huang, Yu Li, Bernard Jurkowiak, Chu Min Li, and Ru Chu Xu

Unrestricted Nogood Recording in CSP Search ......................... 873
   George Katsirelos and Fahiem Bacchus
Table of Contents

Constraints over Ontologies .................................................. 878
   François Laburthe

Using Constraints for Exploring Catalogs ............................. 883
   François Laburthe and Yves Caseau

Intermediate (Learned) Consistencies ................................. 889
   Arnaud Lallouet, Andreei Legtchenko, Thi-Bich-Hanh Dao,
   and AbdelAli Ed-Dbali

Semi-independent Partitioning:
   A Method for Bounding the Solution to COP’s .................. 894
   David Larkin

Boosting as a Metaphor for Algorithm Design ....................... 899
   Kevin Leyton-Brown, Eugene Nudelman, Galen Andrew,
   Jim McFadden, and Yoav Shoham

An Efficient Filtering Algorithm for Disjunction of Constraints ...... 904
   Olivier Lhomme

INCOP: An Open Library for INcomplete Combinatorial OPtimization ... 909
   Bertrand Neveu and Gilles Trombettoni

A Composition Algorithm for Very Hard Graph 3-Colorability Instances .... 914
   Seiichi Nishihara, Kazunori Mizuno, and Kohsuke Nishihara

Efficient Representation of Discrete Sets for Constraint Programming . . 920
   Shuji Ohnishi, Hiroaki Tasaka, and Naoyuki Tamura

Applying Interchangeability Techniques
   to the Distributed Breakout Algorithm .............................. 925
   Adrian Petcu and Boi Faltings

Symmetry Breaking in Graceful Graphs ................................. 930
   Karen E. Petrie and Barbara M. Smith

Tree Local Search .......................................................... 935
   Nicolas Prcovic

A SAT-Based Approach to Multiple Sequence Alignment ............ 940
   Steven Prestwich, Des Higgins, and Orla O’Sullivan

Maintaining Dominance Consistency .................................. 945
   Igor Razgon and Amnon Meisels

Terminating Decision Algorithms Optimally .......................... 950
   Tuomas Sandholm
Scene Reconstruction Based on Constraints: Details on the Equation System Decomposition .................. 956
   Gilles Trombettoni and Marta Wilczkowiak

**Doctoral Abstracts**

A New Approach to Solving SAT-Encoded Binary CSPs ................. 962
   Carlos Ansótegui

FeReRA: A Multi-agent Approach to Constraint Satisfaction ............ 963
   Muhammed Basharu

Semantic Decomposition for Solving Distance Constraints ............ 964
   Heikel Batnini and Michel Rueher

Using Constraint Programming and Simulation for Execution Monitoring and On-Line Rescheduling with Uncertainty .......... 966
   Julien Bidot

On the Enhancement of the Informed Backtracking Algorithm ............. 967
   Jlifi Boutheina and Khaled Ghédira

Extending CLP with Metaheuristics ........................................ 968
   Ole Boysen

Self Configuring Constraint Programming Systems ....................... 969
   Tom Carchrae

Interactive Tradeoff Generation .......................................... 970
   Moyra Duggan, Barry O’Sullivan, and Eugene C. Freuder

Introducing esra, a Relational Language for Modelling Combinatorial Problems ........................................ 971
   Pierre Flener, Justin Pearson, and Magnus ˚Agren

Abstracting Constraints Using Constraints .................................. 972
   James Gibbons

Sensitivity Analysis in CSPs ............................................. 973
   Diarmuid Glynn

Solution Stability in Constraint Satisfaction Problems .................. 974
   Emmanuel Hebrard

distn: An Euclidean Distance Global Constraint ......................... 975
   Michael Heusch

Algorithmic Mechanism Design and Constraints ............................ 976
   Alan Holland and Barry O’Sullivan
Preference Constraints: New Global Soft Constraints Dedicated to Preference Binary Relations ........................................ 977
  Rémy-Robert Joseph, Peter Chan, Michael Hiroux, and Georges Weil

Optimising the Representation and Evaluation of Semiring Combination Constraints ........................................ 978
  Jerome Kelleher and Barry O’Sullivan

Symmetry Breaking Ordering Constraints ........................................ 979
  Zeynep Kiziltan

Observation of Constraint Programs ........................................... 980
  Ludovic Langevine

Search Programming .......................................................... 981
  Wojciech Legierski

Exploiting Microstructure in CSPs ............................................ 982
  Chavalit Likitvivatanavong

Using Case-Based Reasoning to Write Constraint Programs ................. 983
  James Little, Cormac Gebruers, Derek Bridge, and Eugene C. Freuder

Reformulation Techniques for a Class of Permutation Problems ............... 984
  Toni Mancini

NuSBDS: An Easy to Use Symmetry Breaking System ................................ 985
  Iain McDonald

Interactivity in Constraint Programming ...................................... 986
  Tomáš Müller

Identifying Inconsistent CSPs by Relaxation ..................................... 987
  Tomas Nordlander, Ken Brown, and Derek Sleeman

Useful Explanations .......................................................... 988
  Barry O’Callaghan, Eugene C. Freuder, and Barry O’Sullivan

Teacher and Learner Profiles for Constraint Acquisition ....................... 989
  Sarah O’Connell, Barry O’Sullivan, and Eugene C. Freuder

Comparison of Symmetry Breaking Methods .................................... 990
  Karen E. Petrie

Improved Branch and Bound Algorithms for Max-2-SAT and Weighted Max-2-SAT ........................................ 991
  Jordi Planes

Search for Mathematical Objects ................................................ 992
  Colin Quirke
Explanations for Global Constraints ........................................... 993
  Guillaume Rochart

Watching Clauses in Quantified Boolean Formulae .......................... 994
  Andrew G.D. Rowley

Distributed Constraint-Based Railway Simulation .......................... 995
  Hans Schlenker

Dynamic Step Size Adjustment in Iterative Deepening Search ............. 996
  Daniel Sheridan

Learning Good Variable Orderings ............................................ 997
  Paula Sturdy

An Adaptive Controller for Real-Time Resolution
of the Vehicle Routing Problem .................................................. 998
  Ann Tighe, Finlay Smith, and Gerard Lyons

α-Dynamic Controllability of Simple Temporal Problems
with Preferences and Uncertainty ................................................. 999
  Kristen Brent Venable

Computing Explanations for Global Scheduling Constraints .......... 1000
  Petr Vilím

Restart Strategies: Analysis and Simulation ............................... 1001
  Huayue Wu and Peter van Beek

OpenSolver: A Coordination-Enabled Abstract Branch-and-Prune
Tree Search Engine .............................................................. 1002
  Peter Zoeteweij

Author Index ................................................................. 1003
Principles and Practice of Constraint Programming - CP 2003
9th International Conference, CP 2003, Kinsale, Ireland,
September 29 - October 3, 2003, Proceedings
Rossi, F. (Ed.)
2003, XXXVIII, 1008 p., Softcover
ISBN: 978-3-540-20202-8
