## Part I Modeling Form-Based Systems

---

<b>1</b>	<b>Introduction</b> . . . . .	3
1.1	Enterprise Systems . . . . .	4
1.2	Modeling Enterprise Systems . . . . .	5
1.3	High-Level Transactional Programming . . . . .	6
1.4	A Parsimonious Relational Notation . . . . .	6
1.5	A Descriptive Approach to the Software Development Process . . . . .	7
<b>2</b>	<b>The Form-Based System Paradigm</b> . . . . .	9
2.1	The Submit/Response Style Interface . . . . .	10
2.2	A Message-Based Model of Data Interchange . . . . .	20
<b>3</b>	<b>Exploring the Online Bookshop</b> . . . . .	23
3.1	The Dialogue Model . . . . .	24
3.2	The Persistent Data Model . . . . .	30
3.3	An Exemplary Submit/Response Style System . . . . .	32
<b>4</b>	<b>Form Storyboarding</b> . . . . .	35
4.1	Page Diagrams . . . . .	36
4.2	Form Storyboards . . . . .	41
<b>5</b>	<b>Formcharts and Dialogue Specification</b> . . . . .	49
5.1	Form-Oriented Information System Models . . . . .	49
5.2	The Dialogue Model . . . . .	55
5.3	The Layered Data Model . . . . .	59
5.4	Dialogue Specification . . . . .	66
5.5	The Bookstore Formchart and Data Model . . . . .	74

<b>6</b>	<b>Model Decomposition and Refinement</b> . . . . .	97
6.1	Model Union . . . . .	97
6.2	Formchart Decomposition . . . . .	98
6.3	Formchart Hierarchies . . . . .	100
6.4	A Feature-Driven Approach . . . . .	102
6.5	State Sets and State Specialization . . . . .	104
6.6	Decomposition of Page Diagrams and Form Storyboards . . . . .	107
6.7	Model Refinement . . . . .	107
<b>7</b>	<b>Data Modeling</b> . . . . .	109
7.1	The Parsimonious Data Modeling Language . . . . .	111
7.2	The Data Access Language DAL . . . . .	114
7.3	The Transaction Data Access Language TDAL . . . . .	121
7.4	Constraints . . . . .	125
7.5	Style Formats . . . . .	141
<b>8</b>	<b>Message-Based Modeling of Data Interchange</b> . . . . .	147
8.1	Connectivity of Enterprise Systems . . . . .	147
8.2	The Message-Based System Viewpoint . . . . .	150
8.3	Data Interchange Model . . . . .	152
8.4	Data Interchange Specification . . . . .	156
8.5	The Relation to Data Flow Diagrams . . . . .	160
8.6	The Interplay of Formcharts and Data Interchange Diagrams . . . . .	162
8.7	Topic Bundles . . . . .	164
<b>9</b>	<b>A Descriptive Approach</b> . . . . .	165
9.1	Descriptiveness, Prescriptiveness, and the Software Process . . . . .	168
9.2	Metaphor A Posteriori . . . . .	170
9.3	On Desktop Metaphors . . . . .	172
9.4	On Real-World Modeling . . . . .	173
9.5	Visual Modeling De-emphasized . . . . .	175
9.6	Artifact Orientation . . . . .	176
9.7	The High-Level Programming Viewpoint . . . . .	177
9.8	Advanced Systems Modeling Approaches . . . . .	180

---

**Part II Tool Support**

---

<b>10</b>	<b>Forward Engineering and Reverse Engineering</b> . . . . .	187
10.1	Forward Engineering . . . . .	188
10.2	Reverse Engineering . . . . .	193
10.3	Source-Code-Opaque Reverse Engineering . . . . .	196

<b>11</b>	<b>Typed Server Pages</b> .....	199
11.1	Type-Safe Interplay of Forms and Scripts .....	200
11.2	Functional Decomposition of Server Pages .....	214
11.3	Higher-Order Server Pages .....	221
11.4	A Comparison of Web Technologies .....	224

---

## Part III Semantics

---

<b>12</b>	<b>The Integrated Source Code Paradigm</b> .....	229
12.1	Towards Structured Collaborative Work .....	229
12.2	Structured Artifacts .....	232
12.3	The Syntax Model Approach .....	233
12.4	A Closer Look at Languages .....	235
12.5	The Integrated Source Code Paradigm .....	237
12.6	A Flexible Generic Textual Format for Data .....	241
12.7	Generative Programming .....	244
<b>13</b>	<b>State History Diagrams</b> .....	249
13.1	State History Diagrams and Class Diagrams .....	249
13.2	Discussion of Formchart Semantics .....	258
13.3	Semantics of Dialogue Constraints .....	260
13.4	Path Expressions .....	267
<b>14</b>	<b>Semantics of the Data Model</b> .....	271
14.1	Semantics of the Temporal Model .....	271
14.2	Alternative Fundamental Models .....	274
14.3	Discussion .....	279
<b>15</b>	<b>Semantics of Web Signatures</b> .....	283
15.1	Formal Semantics of Web Signature Recovery .....	283
15.2	Coding Guidelines for Typed Server Pages .....	287
15.3	Formal Definition of the NSP Type System .....	299

---

## Part IV Conclusion

---

<b>16</b>	<b>A Comparison of Modeling Methods</b> .....	325
16.1	User Interface Modeling .....	325
16.2	Web Site Modeling .....	326
16.3	Data Modeling .....	328
16.4	Model-Oriented Specification Languages .....	329
16.5	Structured Analysis .....	331
16.6	Object-Oriented Analysis and Design .....	335
16.7	Model-Driven Architecture .....	338

- 17 Summary** ..... 343
  - 17.1 Contributions to Modeling Form-Based Systems ..... 343
  - 17.2 Contributions to Modeling in General ..... 347
- References** ..... 351
- Index** ..... 367

Form-Oriented Analysis

A New Methodology to Model Form-Based Applications

Draheim, D.; Weber, G.

2005, XVIII, 372 p., Hardcover

ISBN: 978-3-540-20593-7
