Table of Contents

Invited Talk
Interactive Proofs for Quantum Computation ........................ 1
   Andrew Chi-Chih Yao

Drawing Plane Graphs ............................................. 2
   Takao Nishizeki

1A Computational Geometry I
Linear Time Algorithm for Approximating a Curve by a
Single-Peaked Curve ............................................. 6
   Jinhee Chun, Kunihiko Sadakane, Takeshi Tokuyama

A Dynamic Dictionary for Priced Information with
Application .......................................................... 16
   Anil Maheshwari, Michiel Smid

Voronoi Diagram in the Flow Field ................................ 26
   Tetsushi Nishida, Kokichi Sugihara

Polygonal Path Approximation: A Query Based Approach .......... 36
   Ovidiu Daescu, Ningfang Mi

1B Graph and Combinatorial Algorithms I
A Vertex Incremental Approach for Dynamically Maintaining
Chordal Graphs ..................................................... 47
   Anne Berry, Pinar Heggernes, Yngve Villanger

Finding the Maximum Common Subgraph of a Partial k-Tree and a
Graph with a Polynomially Bounded Number of Spanning Trees .... 58
   Atsuko Yamaguchi, Hiroshi Mamitsuka

Hotlink Enhancement Algorithms for Web Directories ............ 68
   Ori Gerstel, Shay Kutten, Rachel Matichin, David Peleg

Finding a Length-Constrained Maximum-Density Path in a Tree .... 78
   Rung-Ren Lin, Wen-Hsiung Kuo, Kun-Mao Chao

2A Computational Complexity I
The Intractability of Computing the Hamming Distance .......... 88
   Bodo Manthey, Rüdiger Reischuk
Infinitely-Often Autoreducible Sets .................................. 98
Richard Beigel, Lance Fortnow, Frank Stephan

Limiting Negations in Bounded-Depth Circuits:
An Extension of Markov’s Theorem ............................. 108
Shao Chin Sung, Keisuke Tanaka

Computational Complexity Measures of Multipartite Quantum
Entanglement .......................................................... 117
Tomoyuki Yamakami

2B Graph and Combinatorial Algorithms II

A New Simple Algorithm for the Maximum-Weight Independent Set
Problem on Circle Graphs ............................................ 129
Gabriel Valiente

Polynomial Time 2-Approximation Algorithms for the Minmax
Subtree Cover Problem ................................................ 138
Hiroshi Nagamochi, Kohei Okada

Labeled Search Trees and Amortized Analysis:
Improved Upper Bounds for NP-Hard Problems ............ 148
Jianer Chen, Iyad A. Kanj, Ge Xia

A New Translation from Semi-extended Regular Expressions into
NFAs and Its Application to an Approximate Matching Problem 158
Hiroaki Yamamoto

3A Quantum Computation

The Quantum Query Complexity of 0-1 Knapsack and Associated
Claw Problems .......................................................... 168
V. Arvind, Rainer Schuler

Non-interactive Quantum Perfect and Statistical Zero-Knowledge .... 178
Hirotada Kobayashi

Quantum Merlin-Arthur Proof Systems:
Are Multiple Merlins More Helpful to Arthur? ............. 189
Hirotada Kobayashi, Keiji Matsumoto, Tomoyuki Yamakami

A Faster Lattice Reduction Method Using Quantum Search ....... 199
Christoph Ludwig

3B Graph and Combinatorial Algorithms III

Three Sorting Algorithms Using Priority Queues .................. 209
Amr Elmasry

### 5B Computational Biology

Efficient Algorithms for Descendent Subtrees Comparison of Phylogenetic Trees with Applications to Co-evolutionary Classifications in Bacterial Genome .......................... 339  
*Yaw-Ling Lin, Tsan-Sheng Hsu*

Settling the Intractability of Multiple Alignment ..................... 352  
*Isaac Elias*

Efficient Algorithms for Optimizing Whole Genome Alignment with Noise .......................................................... 364  
*T.W. Lam, N. Lu, H.F. Ting, Prudence W.H. Wong, S.M. Yiu*

### 6A Computational Geometry III

Segmenting Doughnut-Shaped Objects in Medical Images ............ 375  
*Xiaodong Wu*

On the Locality Properties of Space-Filling Curves ..................... 385  
*H.K. Dai, H.C. Su*

Geometric Restrictions on Producible Polygonal Protein Chains ........ 395  
*Erik D. Demaine, Stefan Langerman, Joseph O’Rourke*

Symmetric Layout of Disconnected Graphs .............................. 405  
*Seok-Hee Hong, Peter Eades*

### 6B Graph and Combinatorial Algorithms IV

Approximation Hardness of Minimum Edge Dominating Set and Minimum Maximal Matching ........................................ 415  
*Miroslav Chlebík, Janka Chlebíková*

Enumerating Global Roundings of an Outerplanar Graph ............. 425  
*Nadia Takki-Chebihi, Takeshi Tokuyama*

Augmenting Forests to Meet Odd Diameter Requirements ............. 434  
*Toshimasa Ishii, Shigeyuki Yamamoto, Hiroshi Nagamochi*

On the Existence and Determination of Satisfactory Partitions in a Graph ......................................................... 444  
*Cristina Bazgan, Zsolt Tuza, Daniel Vanderpooten*

### 7A Distributed and Parallel Algorithms

A Turn Function Scheme Realized in the Asynchronous Single-Writer/Multi-reader Shared Memory Model .......................... 454  
*Tom Altman, Yoshihide Igarashi, Michiko Omori*

## 9A Combinatorial and Network Optimization

Energy-Efficient Wireless Network Design .................................. 585  
Ioannis Caragiannis, Christos Kaklamanis, Panagiotis Kanellopoulos

Wavelength Conversion in Shortest-Path All-Optical Networks .......... 595  
Thomas Erlebach, Stamatis Stefanakos

A Heuristic for the Stacker Crane Problem on Trees which Is  
Almost Surely Exact .................................................. 605  
Amin Coja-Oghlan, Sven O. Krumke, Till Nierhoff

Flexible Train Rostering ............................................. 615  
Stephan Eidenbenz, Aris Pagourtzis, Peter Widmayer

## 9B Computational Complexity and Cryptography

Counting Complexity Classes over the Reals I: The Additive Case ....... 625  
Peter Bürgisser, Felipe Cucker

Some Properties of One-Pebble Turing Machines with  
Sublogarithmic Space ............................................... 635  
Atsuyuki Inoue, Akira Ito, Katsushi Inoue, Tokio Okazaki

Hypergraph Decomposition and Secret Sharing .......................... 645  
Giovanni Di Crescenzo, Clemente Galdi

A Promising Key Agreement Protocol ................................. 655  
Eun-Kyung Ryu, Kee-Won Kim, Kee-Young Yoo

## 10A Game Theory and Randomized Algorithm

Rapid Mixing of Several Markov Chains for a Hard-Core Model ........ 663  
Ravi Kannan, Michael W. Mahoney, Ravi Montenegro

Polynomial Time Approximate Sampler for Discretized Dirichlet  
Distribution .......................................................... 676  
Tomomi Matsui, Mitsuo Motoki, Naoyuki Kamatani

Fair Cost Allocations under Conflicts  
— A Game-Theoretic Point of View — .............................. 686  
Yoshio Okamoto

Equilibria for Networks with Malicious Users .......................... 696  
George Karakostas, Anastasios Viglas
10B Algebraic and Arithmetic Computation

Quasi-optimal Arithmetic for Quaternion Polynomials ............... 705
   Martin Ziegler

Upper Bounds on the Complexity of Some Galois Theory Problems .... 716
   V. Arvind, Piyush P Kurur

Unfolded Modular Multiplication ..................................... 726
   Wieland Fischer, Jean-Pierre Seifert

Gauss Period, Sparse Polynomial, Redundant Basis, and Efficient
Exponentiation for a Class of Finite Fields with Small Characteristic ... 736
   Soonhak Kwon, Chang Hoon Kim, Chun Pyo Hong

Author Index .......................................................... 747
Algorithms and Computation
14th International Symposium, ISAAC 2003, Kyoto, Japan, December 15-17, 2003, Proceedings
Ibaraki, T.; Katoh, N.; Ono, H. (Eds.)
