## Contents

1 Introduction .............................................. 1

Part I Historical Overview and Three-Phase Traffic Theory

2 Spatiotemporal Pattern Formation in Freeway Traffic ........................................ 13
   2.1 Introduction .................................................. 13
   2.2 Traffic and Synergetics ................................. 14
   2.3 Free and Congested Traffic ............................ 15
      2.3.1 Local Measurements of Traffic Variables .......... 15
      2.3.2 Examples of Freeway Infrastructures and Detector Arrangements .............. 17
      2.3.3 Free Traffic Flow .......................................... 18
      2.3.4 Congested Traffic ......................................... 21
      2.3.5 Empirical Fundamental Diagram ...................... 22
      2.3.6 Complex Local Dynamics of Congested Traffic ...... 24
   2.4 Main Empirical Features of Spatiotemporal Congested Patterns .................. 27
      2.4.1 Three Traffic Phases .................................... 27
      2.4.2 Characteristic Parameters of Wide Moving Jams ........ 28
      2.4.3 Spontaneous Breakdown Phenomenon
         (Spontaneous F→S Transition) ........................... 32
      2.4.4 Induced Breakdown Phenomenon ....................... 34
      2.4.5 Synchronized Flow Patterns ............................ 35
      2.4.6 Catch Effect .............................................. 37
      2.4.7 Moving Jam Emergence in Synchronized Flow:
         General Pattern ........................................... 41
      2.4.8 Expanded Congested Patterns ......................... 46
      2.4.9 Foreign Wide Moving Jams ............................. 51
      2.4.10 Reproducible and Predictable Congested Patterns .... 53
      2.4.11 Methodology for Empirical Congested Pattern Study .............................. 57
   2.5 Conclusions. Fundamental Empirical Features of Spatiotemporal Congested Patterns ........... 58
3 Overview of Freeway Traffic Theories and Models: Fundamental Diagram Approach ........ 63
3.1 Introduction: Hypothesis About Theoretical Fundamental Diagram ........ 63
3.2 Achievements of Fundamental Diagram Approach to Traffic Flow Modeling and Theory ................ 64
3.2.1 Conservation of Vehicle Number on Road and Front Velocity ..................... 66
3.2.2 The Lighthill–Whitham–Richards Model and Shock Wave Theory ................ 67
3.2.3 Collective Flow Concept and Probability of Passing .................... 68
3.2.4 Scenarios for Moving Jam Emergence ........................................ 69
3.2.5 Wide Moving Jam Characteristics ............................................ 69
3.2.6 Flow Rate in Wide Moving Jam Outflow, The Line J ...................... 71
3.2.7 Metastable States of Free Flow with Respect to Moving Jam Emergence ........................................ 73
3.3 Drawbacks of Fundamental Diagram Approach in Describing of Spatiotemporal Congested Freeway Patterns ........................................................................... 78
3.3.1 Shock Wave Theory .................................................................. 78
3.3.2 Models and Theories of Moving Jam Emergence in Free Flow ............... 80
3.3.3 Models and Theories with Variety of Vehicle and Driver Characteristics ........................................ 83
3.3.4 Application of Classical Queuing Theories to Freeway Congested Traffic Patterns ........................................ 84
3.4 Conclusions .............................................................................. 85

4 Basis of Three-Phase Traffic Theory ........................................ 87
4.1 Introduction and Remarks on Three-Phase Traffic Theory ............................. 87
4.2 Definition of Traffic Phases in Congested Traffic Based on Empirical Data ........................................ 88
4.2.1 Objective Criteria for Traffic Phases in Congested Traffic ...................... 88
4.2.2 Explanation of Terms “Synchronized Flow” and “Wide Moving Jam” ............ 90
4.2.3 Mean Vehicle Trajectories ....................................................... 91
4.2.4 Flow Rate in Synchronized Flow .............................................. 91
4.2.5 Empirical Line J .................................................................... 93
4.2.6 Propagation of Two Wide Moving Jams ..................................... 94
4.3 Fundamental Hypothesis of Three-Phase Traffic Theory............................ 95
4.3.1 Three-Phase Traffic Theory as Driver Behavioral Theory .................. 98
4.3.2 Synchronization Distance and Speed Adaptation
    Effect in Synchronized Flow .................................. 100
4.3.3 Random Transformations ("Wandering")
    Within Synchronized Flow States ............................ 100
4.3.4 Dynamic Synchronized Flow States .......................... 101
4.4 Empirical Basis of Three-Phase Traffic Theory ......................... 102
4.5 Conclusions ................................................................ 103

5 Breakdown Phenomenon (F→S Transition) in Three-Phase Traffic Theory ........ 105
5.1 Introduction .......................................................... 105
5.2 Breakdown Phenomenon on Homogeneous Road ............................ 106
  5.2.1 Speed Breakdown at Limit Point of Free Flow .................. 106
  5.2.2 Critical Local Perturbation for Speed Breakdown .......... 108
  5.2.3 Probability for Breakdown Phenomenon ....................... 110
  5.2.4 Threshold Flow Rate and Density,
       Metastability, and Nucleation Effects ..................... 111
  5.2.5 Z-Shaped Speed–Density and Passing
       Probability Characteristics ............................... 114
  5.2.6 Physics of Breakdown Phenomenon:
       Competition Between Over-Acceleration
       and Speed Adaptation ........................................ 119
  5.2.7 Physics of Threshold Point in Free Flow ..................... 120
  5.2.8 Moving Synchronized Flow Pattern ........................... 122
5.3 Breakdown Phenomenon at Freeway Bottlenecks ............................ 123
  5.3.1 Deterministic Local Perturbation ............................ 123
  5.3.2 Deterministic F→S Transition ............................... 128
  5.3.3 Physics of Deterministic Speed Breakdown
       at Bottleneck ................................................. 133
  5.3.4 Influence of Random Perturbations ........................... 133
  5.3.5 Z-Characteristic for Speed Breakdown at Bottleneck ....... 136
  5.3.6 Physics of Speed Breakdown at Bottleneck ................ 139
  5.3.7 Time Delay of Speed Breakdown ............................. 140
5.4 Conclusions ................................................................ 142

6 Moving Jam Emergence in Three-Phase Traffic Theory ....................... 145
6.1 Introduction ................................................................ 145
6.2 Wide Moving Jam Emergence in Free Flow ............................. 147
6.3 Wide Moving Jam Emergence in Synchronized Flow .................... 150
  6.3.1 Hypothesis for Moving Jam Emergence
       in Synchronized Flow ......................................... 150
  6.3.2 Features of Metastable Synchronized Flow States .......... 155
  6.3.3 Stable High Density Synchronized Flow States ............. 156
6.4 Double Z-Shaped Traffic Flow Characteristics .......................... 158
  6.4.1 Z-Characteristic for S→J Transition .............................. 158
  6.4.2 Cascade of Two Phase Transitions
      (F→S→J Transitions) ....................................... 161
  6.4.3 Wide Moving Jam Emergence
      Within Initial Moving Synchronized Flow Pattern ........... 167
6.5 Moving Jam Emergence
      in Synchronized Flow at Bottlenecks ............................. 169
  6.5.1 Why Moving Jams Do not Emerge
      in Free Flow at Bottlenecks .................................. 169
  6.5.2 Z-Characteristic for S→J Transition at Bottlenecks ........... 171
  6.5.3 Physics of Moving Jam Emergence
      in Synchronized Flow ........................................ 172
  6.5.4 Double Z-Characteristic and F→S→J Transitions
      at Bottlenecks .................................................. 176
6.6 Conclusions ......................................................................... 178

7 Congested Patterns at Freeway Bottlenecks
      in Three-Phase Traffic Theory .................................... 179
  7.1 Introduction .................................................................... 179
  7.2 Two Main Types
      of Spatiotemporal Congested Patterns .............................. 179
  7.3 Simplified Diagram of Congested Patterns
      at Isolated Bottlenecks ........................................... 180
  7.4 Synchronized Flow Patterns ............................................ 183
    7.4.1 Influence of Fluctuations on Limit Point
            for Free Flow at Bottlenecks .............................. 183
    7.4.2 Moving Synchronized Flow Pattern
            Emergence at Bottlenecks .................................. 185
    7.4.3 Pinning of Downstream Front
            of Synchronized Flow at Bottlenecks ..................... 189
    7.4.4 Transformation Between Widening
            and Localized Synchronized Flow Patterns ............ 192
  7.5 General Patterns ......................................................... 194
    7.5.1 Spatiotemporal Structure of General Patterns ............ 194
    7.5.2 Dissolving General Pattern
            and Pattern Transformation ................................. 198
  7.6 Physics of General Patterns ........................................... 200
    7.6.1 Region of Wide Moving Jams ................................. 200
    7.6.2 Narrow Moving Jam Emergence in Pinch Region .......... 204
    7.6.3 Moving Jam Suppression Effect ............................... 209
    7.6.4 Width of Pinch Region ....................................... 210
    7.6.5 Wide Moving Jam Propagation Through Bottlenecks .... 211
  7.7 Conclusions ............................................................... 213
8 Freeway Capacity in Three-Phase Traffic Theory .................................. 217
  8.1 Introduction ......................................................... 217
  8.2 Homogeneous Road .................................................. 217
  8.3 Freeway Capacity in Free Flow at Bottlenecks ................. 218
    8.3.1 Definition of Freeway Capacity ......................... 218
    8.3.2 Probability for Speed Breakdown at Bottlenecks .......... 220
    8.3.3 Threshold Boundary for Speed Breakdown .......... 223
    8.3.4 Features of Freeway Capacity at Bottlenecks .......... 226
  8.4 Z-Characteristic and Probability
    for Speed Breakdown ................................................... 228
  8.5 Congested Pattern Capacity at Bottlenecks ...................... 232
  8.6 Main Behavioral Assumptions
    of Three-Phase Traffic Theory .................................... 234
  8.7 Conclusions .......................................................... 237

Part II Empirical Spatiotemporal Congested
Traffic Patterns

9 Empirical Congested Patterns at Isolated Bottlenecks ................. 241
  9.1 Introduction .......................................................... 241
  9.2 Effectual Bottlenecks and Effective Locations
    of Bottlenecks ............................................................. 242
      9.2.1 Effectual Bottlenecks on Freeway A5-South .......... 244
      9.2.2 Effectual Bottlenecks on Freeway A5-North .......... 247
      9.2.3 Isolated Effectual Bottleneck ....................... 247
  9.3 Empirical Synchronized Flow Patterns ......................... 250
      9.3.1 Widening Synchronized Flow Pattern ................. 250
      9.3.2 Localized Synchronized Flow Pattern .............. 255
      9.3.3 Moving Synchronized Flow Pattern ............. 256
  9.4 Empirical General Patterns ....................................... 259
      9.4.1 Empirical General Pattern of Type (1) ........... 259
      9.4.2 Empirical General Pattern of Type (2) .......... 262
      9.4.3 Dependence of Effective Location
        of Bottleneck on Time ................................... 264
  9.5 Conclusions ............................................................. 268

10 Empirical Breakdown Phenomenon:
  Phase Transition from Free Flow
to Synchronized Flow ..................................................... 269
  10.1 Introduction .......................................................... 269
  10.2 Spontaneous Breakdown Phenomenon
    (Spontaneous F→S Transition) at On-Ramp Bottlenecks .... 270
10.3 Probability for F→S Transition
10.3.1 Empirical and Theoretical Definitions of Freeway Capacities at Bottlenecks
10.3.2 Pre-Discharge Flow Rate

10.4 Induced Speed Breakdown

10.5 Breakdown Phenomenon at Off-Ramp Bottlenecks

10.7 Some Empirical Features of Synchronized Flow
10.7.1 Complex Behavior in Flow–Density Plane
10.7.2 Three Types of Synchronized Flow
10.7.3 Overlapping States of Free Flow and Synchronized Flow in Density

10.8 Conclusions

11 Empirical Features of Wide Moving Jam Propagation
11.1 Introduction
11.2 Characteristic Parameters of Wide Moving Jams
11.2.1 Empirical Determination of Line J
11.2.2 Dependence of Characteristic Jam Parameters on Traffic Conditions
11.2.3 Propagation of Wide Moving Jams Through Synchronized Flow
11.2.4 Moving Blanks Within Wide Moving Jams

11.3 Features of Foreign Wide Moving Jams

11.4 Conclusions

12 Empirical Features of Moving Jam Emergence
12.1 Introduction
12.2 Pinch Effect in Synchronized Flow
12.2.1 Narrow Moving Jam Emergence
12.2.2 Wide Moving Jam Emergence (S→J Transition)
12.2.3 Correlation of Characteristics for Pinch Region and Wide Moving Jams
12.2.4 Frequency of Narrow Moving Jam Emergence
12.2.5 Saturation and Dynamic Features of Pinch Effect
12.2.6 Spatial Dependence of Speed Correlation Function
12.2.7 Effect of Wide Moving Jam Emergence
in Pinch Region of General Pattern ............... 337
12.3 Strong and Weak Congestion .......................... 337
12.4 Moving Jam Emergence in Synchronized Flow
Away from Bottlenecks .................................. 340
12.5 Pattern Formation at Off-Ramp Bottlenecks .......... 343
12.6 Induced $F \rightarrow J$ Transition ......................... 344
12.7 Conclusions ............................................. 348

13 Empirical Pattern Evolution and Transformation
at Isolated Bottlenecks ................................ 349
13.1 Introduction ............................................. 349
13.2 Evolution of General Patterns
at On-Ramp Bottlenecks ................................. 350
  13.2.1 Transformation of General Pattern
into Synchronized Flow Pattern ......................... 350
  13.2.2 Alternation of Free Flow and Synchronized Flow
in Congested Patterns ................................. 350
  13.2.3 Hysteresis Effects Due to Pattern Formation
and Dissolution ......................................... 352
13.3 Transformations of Congested Patterns
Under Weak Congestion ................................. 354
13.4 Discharge Flow Rate and Capacity Drop ............... 357
13.5 Conclusions ............................................. 363

14 Empirical Complex Pattern Formation Caused
by Peculiarities of Freeway Infrastructure .............. 365
14.1 Introduction ............................................. 365
14.2 Expanded Congested Pattern ............................ 366
  14.2.1 Common Features .................................. 366
  14.2.2 Example of Expanded Congested Pattern ............ 367
14.3 Dissolution of Moving Jams at Bottlenecks ............ 369
  14.3.1 Dynamics of Wide Moving Jam Outflow ............... 369
  14.3.2 Localized Synchronized Flow Patterns
Resulting from Moving Jam Dissolution ............... 371
14.4 Conclusions ............................................. 372

15 Dependence of Empirical Fundamental
Diagram on Congested Pattern Features .................. 373
15.1 Introduction ............................................. 373
  15.1.1 Empirical Fundamental Diagram
and Steady State Model Solutions ....................... 373
  15.1.2 Two Branches of Empirical Fundamental Diagram ...... 374
  15.1.3 Line $J$ and Wide Moving Jam Outflow ............... 375
15.2 Empirical Fundamental Diagram
and Line \( J \) ............................................ 378
15.2.1 Asymptotic Behavior of Empirical
Fundamental Diagrams .......................... 378
15.2.2 Influence of Different Vehicle Characteristics
on Fundamental Diagrams ..................... 383
15.3 Dependence of Empirical Fundamental Diagram
on Congested Pattern Type ..................... 385
15.4 Explanation of Reversed-\( \lambda \), Inverted-V,
and Inverted-U Empirical Fundamental Diagrams ...... 392
15.5 Conclusions ........................................ 394

Part III Microscopic Three-Phase Traffic Theory

16 Microscopic Traffic Flow Models
for Spatiotemporal Congested Patterns ................. 399
16.1 Introduction ........................................ 399
16.2 Cellular Automata Approach to Three-Phase Traffic Theory . 401
  16.2.1 General Rules of Vehicle Motion ............. 401
  16.2.2 Synchronization Distance ..................... 402
  16.2.3 Steady States ................................. 403
  16.2.4 Fluctuations of Acceleration and Deceleration
      in Cellular Automata Models .................... 405
  16.2.5 Boundary Conditions and Model of On-Ramp ...... 407
  16.2.6 Summary of Model Equations and Parameters ... 408
16.3 Continuum in Space Model Approach
to Three-Phase Traffic Theory ..................... 408
  16.3.1 Vehicle Motion Rules ......................... 408
  16.3.2 Speed Adaptation Effect Within Synchronization
      Distance ........................................... 409
  16.3.3 Motion State Model for Random Acceleration
      and Deceleration ................................. 411
  16.3.4 Safe Speed ..................................... 413
  16.3.5 2D Region of Steady States .................... 414
  16.3.6 Physics of Driver Time Delays ................... 415
  16.3.7 Over-Acceleration and Over-Deceleration Effects ... 419
  16.3.8 Lane Changing Rules ............................ 420
  16.3.9 Boundary Conditions and Models of Bottlenecks ... 421
  16.3.10 Summary of Model Equations and Parameters .... 425
16.4 Conclusions ........................................ 431

17 Microscopic Theory of Phase Transitions
in Freeway Traffic .................................. 433
17.1 Introduction ........................................ 433
17.2 Microscopic Theory of Breakdown Phenomenon
(F→S Transition) ................................................. 434
17.2.1 Homogeneous Road ........................................ 434
17.2.2 Breakdown Phenomenon at On-Ramp Bottlenecks ... 438

17.3 Moving Jam Emergence and Double Z-Shaped
Characteristics of Traffic Flow .............................. 442
17.3.1 F→J Transition on Homogeneous Road ............ 442
17.3.2 S→J Transition on Homogeneous Road ............ 443
17.3.3 Moving Jam Emergence in Synchronized
Flow Upstream of Bottlenecks ............................. 445

17.4 Conclusions .................................................. 448

18 Congested Patterns at Isolated Bottlenecks ............ 449
18.1 Introduction .................................................. 449
18.2 Diagram of Congested Patterns
at Isolated On-Ramp Bottlenecks ............................ 450
18.2.1 Synchronized Flow Patterns ............................ 450
18.2.2 Single Vehicle Characteristics in Synchronized Flow 454
18.2.3 Maximum Freeway Capacities
and Limit Point in Diagram ................................. 458
18.2.4 Pinch Effect in General Patterns ...................... 458
18.2.5 Peculiarities of General Patterns ...................... 462
18.3 Weak and Strong Congestion in General Patterns
18.3.1 Criteria for Strong and Weak Congestion ......... 464
18.3.2 Strong Congestion Features ............................. 467
18.4 Evolution of Congested Patterns
at On-Ramp Bottlenecks ....................................... 469
18.5 Hysteresis and Nucleation Effects by Pattern
Formation at On-Ramp Bottlenecks ......................... 471
18.5.1 Threshold Boundary for Synchronized Flow Patterns 471
18.5.2 Threshold Boundary for General Patterns .......... 475
18.5.3 Overlap of Different Metastable Regions
and Multiple Pattern Excitation ............................ 476
18.6 Strong Congestion at Merge Bottlenecks .............. 477
18.6.1 Comparison of General Patterns at Merge Bottleneck and at On-Ramp Bottleneck .................... 477
18.6.2 Diagram of Congested Patterns ....................... 478
18.7 Weak Congestion at Off-Ramp Bottlenecks ........... 480
18.7.1 Diagram of Congested Patterns ....................... 480
18.7.2 Comparison of Pattern Features
at Various Bottlenecks .................................. 480
18.8 Congested Pattern Capacity
at On-Ramp Bottlenecks .................................... 483
Contents

18.8.1 Transformations of Congested Patterns at On-Ramp Bottlenecks 483
18.8.2 Temporal Evolution of Discharge Flow Rate 486
18.8.3 Dependence of Congested Pattern Capacity on On-Ramp Inflow 490
18.9 Conclusions 492

19 Complex Congested Pattern Interaction and Transformation 495
19.1 Introduction 495
19.2 Catch Effect and Induced Congested Pattern Formation 496
19.2.1 Induced Pattern Emergence 496
19.3 Complex Congested Patterns and Pattern Interaction 498
19.3.1 Foreign Wide Moving Jams 498
19.3.2 Expanded Congested Patterns 501
19.4 Intensification of Downstream Congestion Due to Upstream Congestion 504
19.5 Conclusions 507

20 Spatiotemporal Patterns in Heterogeneous Traffic Flow 509
20.1 Introduction 509
20.2 Microscopic Two-Lane Model for Heterogeneous Traffic Flow with Various Driver Behavioral Characteristics and Vehicle Parameters 510
20.2.1 Single-Lane Model 510
20.2.2 Two-Lane Model 512
20.2.3 Boundary, Initial Conditions, and Model of Bottleneck 514
20.2.4 Simulation Parameters 515
20.3 Patterns in Heterogeneous Traffic Flow with Different Driver Behavioral Characteristics 515
20.3.1 Vehicle Separation Effect in Free Flow 515
20.3.2 Onset of Congestion in Free Flow on Homogeneous Road 516
20.3.3 Lane Asymmetric Emergence of Moving Synchronized Flow Patterns 519
20.3.4 Congested Patterns at On-Ramp Bottlenecks 519
20.3.5 Wide Moving Jam Propagation 525
20.4 Patterns in Heterogeneous Traffic Flow with Different Vehicle Parameters 528
20.4.1 Peculiarity of Wide Moving Jam Propagation 530
20.4.2 Partial Destroying of Speed Synchronization 533
20.4.3 Extension of Free Flow Recovering and Vehicle Separation 533

20.5 Weak Heterogeneous Flow 535
  20.5.1 Spontaneous Onset of Congestion Away from Bottlenecks 535
  20.5.2 Lane Asymmetric Free Flow Distributions 537

20.6 Characteristics of Congested Pattern Propagation in Heterogeneous Traffic Flow 538
  20.6.1 Velocity of Downstream Jam Front 538
  20.6.2 Flow Rate in Jam Outflow 540
  20.6.3 Velocity of Downstream Front of Moving Synchronized Flow Patterns 541

20.7 Conclusions 542

Part IV Engineering Applications

21 ASDA and FOTO Models of Spatiotemporal Pattern Dynamics based on Local Traffic Flow Measurements 547
  21.1 Introduction 547
  21.2 Identification of Traffic Phases 548
  21.3 Determination of Traffic Phases with FOTO Model 550
    21.3.1 Fuzzy Rules for FOTO Model 551
  21.4 Tracking Moving Jams with ASDA:
    Simplified Discussion 554
    21.4.1 Tracking Synchronized Flow with FOTO Model 557
    21.4.2 ASDA-Like Approach to Tracking Synchronized Flow 559
    21.4.3 Cumulative Flow Rate Approach to Tracking Synchronized Flow 560
  21.5 Conclusions 561

22 Spatiotemporal Pattern Recognition, Tracking, and Prediction 563
  22.1 Introduction 563
  22.2 FOTO and ASDA Application for Congested Pattern Recognition and Tracking 563
    22.2.1 Validation of FOTO and ASDA Models at Traffic Control Center of German Federal State of Hessen 563
    22.2.2 Application of FOTO and ASDA Models on Other Freeways in Germany and USA 565
  22.3 Spatiotemporal Pattern Prediction 568
    22.3.1 Historical Time Series 568
22.3.2 Database of Reproducible and Predictable Spatiotemporal Pattern Features .......................... 575
22.3.3 Vehicle Onboard Autonomous Spatiotemporal Congested Pattern Prediction ...................... 580
22.4 Traffic Analysis and Prediction in Urban Areas ..................................................... 582
  22.4.1 Model for Traffic Prediction in City Networks ................. 582
22.5 Conclusions ........................................................................................................ 589

23 Control of Spatiotemporal Congested Patterns ......................................................................... 591
  23.1 Introduction ......................................................................................................... 591
  23.2 Scenarios for Traffic Management and Control .................................................. 592
  23.3 Spatiotemporal Pattern Control Through Ramp Metering ........................................... 593
      23.3.1 Free Flow Control Approach ................................................................. 595
      23.3.2 Congested Pattern Control Approach .................................................... 606
      23.3.3 Comparison of Free Flow and Congested Pattern Control Approaches .. 610
      23.3.4 Comparison of Different Control Rules in Congested Pattern Control Approach 614
  23.4 Dissolution of Congested Patterns .......................................................................... 617
  23.5 Prevention of Induced Congestion ........................................................................... 620
  23.6 Influence of Automatic Cruise Control on Congested Patterns .................................... 624
      23.6.1 Model of Automatic Cruise Control ....................................................... 624
      23.6.2 Automatic Cruise Control with Quick Dynamic Adaptation ...................... 626
      23.6.3 Automatic Cruise Control with Slow Dynamic Adaptation ..................... 628
  23.7 Conclusions ........................................................................................................ 629

24 Conclusion ...................................................................................................................... 631

A Terms and Definitions ...................................................................................................... 633
  A.1 Traffic States, Parameters, and Variables ............................................................ 633
  A.2 Traffic Phases ........................................................................................................ 633
  A.3 Phase Transitions .................................................................................................. 634
  A.4 Bottleneck Characteristics .................................................................................... 635
  A.5 Congested Patterns at Bottlenecks ...................................................................... 636
  A.6 Local Perturbations .............................................................................................. 637
  A.7 Critical and Threshold Traffic Variables ............................................................ 637
  A.8 Some Features of Phase Transitions and Traffic State Stability .............................. 638
B   ASDA and FOTO Models
   for Practical Applications............................... 641
   B.1   ASDA Model for Several Road Detectors ............... 641
         B.1.1 Extensions of ASDA for On-Ramps, Off-Ramps,
              and Changing of Number of Freeway Lanes
              Upstream of Moving Jam.............................. 643
         B.1.2 Extensions of ASDA for On-Ramps, Off-Ramps,
              and Changing of Number of Freeway Lanes
              Downstream of Moving Jam.......................... 645
         B.1.3 FOTO Model for Several Road Detectors ............ 646
         B.1.4 Extended Rules for FOTO Model ................... 646
   B.2   Statistical Evaluation of Different
         Reduced Detector Configurations ...................... 651
