1 Introduction ................................................................. 1

Part I Historical Overview
and Three-Phase Traffic Theory

2 Spatiotemporal Pattern Formation
in Freeway Traffic ....................................................... 13
  2.1 Introduction ............................................................ 13
  2.2 Traffic and Synergetics .................................................. 14
  2.3 Free and Congested Traffic ............................................. 15
    2.3.1 Local Measurements of Traffic Variables ....................... 15
    2.3.2 Examples of Freeway Infrastructures
         and Detector Arrangements ...................................... 17
    2.3.3 Free Traffic Flow .................................................. 18
    2.3.4 Congested Traffic .................................................. 21
    2.3.5 Empirical Fundamental Diagram ................................. 22
    2.3.6 Complex Local Dynamics of Congested Traffic ............... 24
  2.4 Main Empirical Features of Spatiotemporal
      Congested Patterns .................................................. 27
    2.4.1 Three Traffic Phases .............................................. 27
    2.4.2 Characteristic Parameters of Wide Moving Jams ............. 28
    2.4.3 Spontaneous Breakdown Phenomenon
         (Spontaneous F→S Transition) .................................. 32
    2.4.4 Induced Breakdown Phenomenon ................................ 34
    2.4.5 Synchronized Flow Patterns ...................................... 35
    2.4.6 Catch Effect ....................................................... 37
    2.4.7 Moving Jam Emergence in Synchronized Flow:
           General Pattern ................................................. 41
    2.4.8 Expanded Congested Patterns .................................... 46
    2.4.9 Foreign Wide Moving Jams ....................................... 51
    2.4.10 Reproducible and Predictable Congested Patterns .......... 53
    2.4.11 Methodology for Empirical Congested Pattern Study ........ 57
  2.5 Conclusions, Fundamental Empirical Features
      of Spatiotemporal Congested Patterns ............................. 58
3 Overview of Freeway Traffic Theories and Models: Fundamental Diagram Approach .......... 63

3.1 Introduction: Hypothesis About Theoretical Fundamental Diagram .......... 63

3.2 Achievements of Fundamental Diagram Approach to Traffic Flow Modeling and Theory ................. 64

3.2.1 Conservation of Vehicle Number on Road and Front Velocity ..................... 66

3.2.2 The Lighthill–Whitham–Richards Model and Shock Wave Theory ................. 67

3.2.3 Collective Flow Concept and Probability of Passing ......................... 68

3.2.4 Scenarios for Moving Jam Emergence .................... 69

3.2.5 Wide Moving Jam Characteristics .................. 69

3.2.6 Flow Rate in Wide Moving Jam Outflow, The Line $J$ ................................ 71

3.2.7 Metastable States of Free Flow with Respect to Moving Jam Emergence .......... 73

3.3 Drawbacks of Fundamental Diagram Approach in Describing of Spatiotemporal Congested Freeway Patterns ............................................. 78

3.3.1 Shock Wave Theory .................... 78

3.3.2 Models and Theories of Moving Jam Emergence in Free Flow .................. 80

3.3.3 Models and Theories with Variety of Vehicle and Driver Characteristics ............. 83

3.3.4 Application of Classical Queuing Theories to Freeway Congested Traffic Patterns .......... 84

3.4 Conclusions ............................................. 85

4 Basis of Three-Phase Traffic Theory ............... 87

4.1 Introduction and Remarks on Three-Phase Traffic Theory ........................................ 87

4.2 Definition of Traffic Phases in Congested Traffic Based on Empirical Data .................. 88

4.2.1 Objective Criteria for Traffic Phases in Congested Traffic .................... 88

4.2.2 Explanation of Terms “Synchronized Flow” and “Wide Moving Jam” .................... 90

4.2.3 Mean Vehicle Trajectories ..................... 91

4.2.4 Flow Rate in Synchronized Flow .................... 91

4.2.5 Empirical Line $J$ .......................... 93

4.2.6 Propagation of Two Wide Moving Jams ................. 94

4.3 Fundamental Hypothesis of Three-Phase Traffic Theory .......................... 95
# Three-Phase Traffic Theory

4.3.1 Three-Phase Traffic Theory as Driver Behavioral Theory ........................................... 98
4.3.2 Synchronization Distance and Speed Adaptation Effect in Synchronized Flow ........................... 100
4.3.3 Random Transformations ("Wandering") Within Synchronized Flow States ...................... 100
4.3.4 Dynamic Synchronized Flow States ............................................................... 101
4.4 Empirical Basis of Three-Phase Traffic Theory ................................. 102
4.5 Conclusions ................................................................. 103

## Breakdown Phenomenon (F→S Transition) in Three-Phase Traffic Theory

5.1 Introduction ................................................................. 105
5.2 Breakdown Phenomenon on Homogeneous Road ........................................... 106
5.2.1 Speed Breakdown at Limit Point of Free Flow ......................... 106
5.2.2 Critical Local Perturbation for Speed Breakdown .................. 108
5.2.3 Probability for Breakdown Phenomenon ................................. 110
5.2.4 Threshold Flow Rate and Density, Metastability, and Nucleation Effects ............... 111
5.2.5 Z-Shaped Speed–Density and Passing Probability Characteristics ...................... 114
5.2.6 Physics of Breakdown Phenomenon: Competition Between Over-Acceleration and Speed Adaptation ........................................................................................................... 119
5.2.7 Physics of Threshold Point in Free Flow ........................................... 120
5.2.8 Moving Synchronized Flow Pattern ............................................... 121
5.3 Breakdown Phenomenon at Freeway Bottlenecks .......................... 123
5.3.1 Deterministic Local Perturbation .............................................. 123
5.3.2 Deterministic F→S Transition ............................................... 128
5.3.3 Physics of Deterministic Speed Breakdown at Bottleneck .............. 133
5.3.4 Influence of Random Perturbations .................................. 133
5.3.5 Z-Characteristic for Speed Breakdown at Bottleneck ............. 136
5.3.6 Physics of Speed Breakdown at Bottleneck ............................. 139
5.3.7 Time Delay of Speed Breakdown ........................................... 140
5.4 Conclusions ........................................................................ 142

6 Moving Jam Emergence in Three-Phase Traffic Theory .......................... 145
6.1 Introduction ...................................................................... 145
6.2 Wide Moving Jam Emergence in Free Flow ............................... 147
6.3 Wide Moving Jam Emergence in Synchronized Flow ................... 150
6.3.1 Hypothesis for Moving Jam Emergence in Synchronized Flow ..................................................................................................................... 150
6.3.2 Features of Metastable Synchronized Flow States ...................... 155
6.3.3 Stable High Density Synchronized Flow States ....................... 156
6.4 Double Z-Shaped Traffic Flow Characteristics
   6.4.1 Z-Characteristic for S→J Transition ................................. 158
   6.4.2 Cascade of Two Phase Transitions
   (F→S→J Transitions) .................................................. 161
   6.4.3 Wide Moving Jam Emergence
   Within Initial Moving Synchronized Flow Pattern .................. 167

6.5 Moving Jam Emergence in Synchronized Flow at Bottlenecks
   6.5.1 Why Moving Jams Do not Emerge in Free Flow at Bottlenecks .... 169
   6.5.2 Z-Characteristic for S→J Transition at Bottlenecks .......... 171
   6.5.3 Physics of Moving Jam Emergence in Synchronized Flow ............ 172
   6.5.4 Double Z-Characteristic and F→S→J Transitions at Bottlenecks . . 176

6.6 Conclusions ........................................................................... 178

7 Congested Patterns at Freeway Bottlenecks in Three-Phase Traffic Theory
   7.1 Introduction ................................................................. 179
   7.2 Two Main Types of Spatiotemporal Congested Patterns ............... 179
   7.3 Simplified Diagram of Congested Patterns at Isolated Bottlenecks .......... 180
   7.4 Synchronized Flow Patterns ............................................. 183
   7.4.1 Influence of Fluctuations on Limit Point for Free Flow at Bottlenecks ........ 183
   7.4.2 Moving Synchronized Flow Pattern Emergence at Bottlenecks .......... 185
   7.4.3 Pinning of Downstream Front of Synchronized Flow at Bottlenecks .... 189
   7.4.4 Transformation Between Widening and Localized Synchronized Flow Patterns .... 192
   7.5 General Patterns .......................................................... 194
   7.5.1 Spatiotemporal Structure of General Patterns ..................... 194
   7.5.2 Dissolving General Pattern and Pattern Transformation .......... 198
   7.6 Physics of General Patterns ............................................. 200
   7.6.1 Region of Wide Moving Jams ...................................... 200
   7.6.2 Narrow Moving Jam Emergence in Pinch Region .................. 204
   7.6.3 Moving Jam Suppression Effect ...................................... 209
   7.6.4 Width of Pinch Region .................................................. 210
   7.6.5 Wide Moving Jam Propagation Through Bottlenecks ............... 211
   7.7 Conclusions ......................................................................... 213

and Line \( J \) ............................................ 378
15.2.1 Asymptotic Behavior of Empirical Fundamental Diagrams .................. 378
15.2.2 Influence of Different Vehicle Characteristics on Fundamental Diagrams .......... 383
15.3 Dependence of Empirical Fundamental Diagram on Congested Pattern Type ........ 385
15.4 Explanation of Reversed-\( \lambda \), Inverted-V, and Inverted-U Empirical Fundamental Diagrams ....................... 392
15.5 Conclusions ........................................... 394

Part III Microscopic Three-Phase Traffic Theory

16 Microscopic Traffic Flow Models
for Spatiotemporal Congested Patterns ......................... 399
16.1 Introduction ........................................... 399
16.2 Cellular Automata Approach to Three-Phase Traffic Theory . 401
16.2.1 General Rules of Vehicle Motion ................................ 401
16.2.2 Synchronization Distance ......................... 402
16.2.3 Steady States ........................................ 403
16.2.4 Fluctuations of Acceleration and Deceleration in Cellular Automata Models ...... 405
16.2.5 Boundary Conditions and Model of On-Ramp ...... 407
16.2.6 Summary of Model Equations and Parameters .... 408
16.3 Continuum in Space Model Approach to Three-Phase Traffic Theory .................. 408
16.3.1 Vehicle Motion Rules ................................ 408
16.3.2 Speed Adaptation Effect Within Synchronization Distance ................. 409
16.3.3 Motion State Model for Random Acceleration and Deceleration .......... 411
16.3.4 Safe Speed ........................................ 413
16.3.5 2D Region of Steady States ........... 414
16.3.6 Physics of Driver Time Delays ...................... 415
16.3.7 Over-Acceleration and Over-Deceleration Effects ........... 419
16.3.8 Lane Changing Rules .................................. 420
16.3.9 Boundary Conditions and Models of Bottlenecks ........ 421
16.3.10 Summary of Model Equations and Parameters .................. 425
16.4 Conclusions ........................................... 431

17 Microscopic Theory of Phase Transitions in Freeway Traffic ......................... 433
17.1 Introduction ........................................... 433
17.2 Microscopic Theory of Breakdown Phenomenon
(F→S Transition) ........................................ 434
17.2.1 Homogeneous Road ................................... 434
17.2.2 Breakdown Phenomenon at On-Ramp Bottlenecks ... 438
17.3 Moving Jam Emergence and Double Z-Shaped
Characteristics of Traffic Flow .......................... 442
17.3.1 F→J Transition on Homogeneous Road ............ 442
17.3.2 S→J Transition on Homogeneous Road ............ 443
17.3.3 Moving Jam Emergence in Synchronized
Flow Upstream of Bottlenecks ......................... 445
17.4 Conclusions ............................................. 448

18 Congested Patterns at Isolated Bottlenecks .......... 449
18.1 Introduction ............................................. 449
18.2 Diagram of Congested Patterns
at Isolated On-Ramp Bottlenecks ....................... 450
18.2.1 Synchronized Flow Patterns ......................... 450
18.2.2 Single Vehicle Characteristics in Synchronized Flow . 454
18.2.3 Maximum Freeway Capacities
and Limit Point in Diagram .............................. 458
18.2.4 Pinch Effect in General Patterns ................... 458
18.2.5 Peculiarities of General Patterns .................... 462
18.3 Weak and Strong Congestion
in General Patterns ....................................... 464
18.3.1 Criteria for Strong and Weak Congestion .......... 464
18.3.2 Strong Congestion Features ......................... 467
18.4 Evolution of Congested Patterns
at On-Ramp Bottlenecks ................................... 469
18.5 Hysteresis and Nucleation Effects by Pattern
Formation at On-Ramp Bottlenecks ....................... 471
18.5.1 Threshold Boundary for Synchronized Flow Patterns 471
18.5.2 Threshold Boundary for General Patterns ........... 475
18.5.3 Overlap of Different Metastable Regions
and Multiple Pattern Excitation ......................... 476
18.6 Strong Congestion at Merge Bottlenecks ............... 477
18.6.1 Comparison of General Patterns at Merge Bottleneck
and at On-Ramp Bottleneck ............................... 477
18.6.2 Diagram of Congested Patterns ....................... 478
18.7 Weak Congestion at Off-Ramp Bottlenecks ............. 480
18.7.1 Diagram of Congested Patterns ....................... 480
18.7.2 Comparison of Pattern Features
at Various Bottlenecks ................................. 480
18.8 Congested Pattern Capacity
at On-Ramp Bottlenecks ................................... 483
XVI Contents

18.8.1 Transformations of Congested Patterns at On-Ramp Bottlenecks 483
18.8.2 Temporal Evolution of Discharge Flow Rate 486
18.8.3 Dependence of Congested Pattern Capacity on On-Ramp Inflow 490
18.9 Conclusions 492

19 Complex Congested Pattern Interaction and Transformation 495
19.1 Introduction 495
19.2 Catch Effect and Induced Congested Pattern Formation 496
19.2.1 Induced Pattern Emergence 496
19.3 Complex Congested Patterns and Pattern Interaction 498
19.3.1 Foreign Wide Moving Jams 498
19.3.2 Expanded Congested Patterns 501
19.4 Intensification of Downstream Congestion Due to Upstream Congestion 504
19.5 Conclusions 507

20 Spatiotemporal Patterns in Heterogeneous Traffic Flow 509
20.1 Introduction 509
20.2 Microscopic Two-Lane Model for Heterogeneous Traffic Flow with Various Driver Behavioral Characteristics and Vehicle Parameters 510
20.2.1 Single-Lane Model 510
20.2.2 Two-Lane Model 512
20.2.3 Boundary, Initial Conditions, and Model of Bottleneck 514
20.2.4 Simulation Parameters 515
20.3 Patterns in Heterogeneous Traffic Flow with Different Driver Behavioral Characteristics 515
20.3.1 Vehicle Separation Effect in Free Flow 515
20.3.2 Onset of Congestion in Free Flow on Homogeneous Road 516
20.3.3 Lane Asymmetric Emergence of Moving Synchronized Flow Patterns 519
20.3.4 Congested Patterns at On-Ramp Bottlenecks 519
20.3.5 Wide Moving Jam Propagation 525
20.4 Patterns in Heterogeneous Traffic Flow with Different Vehicle Parameters 528
20.4.1 Peculiarity of Wide Moving Jam Propagation 530
20.4.2 Partial Destroying of Speed Synchronization 533
20.4.3 Extension of Free Flow Recovering and Vehicle Separation ................. 533
20.5 Weak Heterogeneous Flow .................................................. 535
  20.5.1 Spontaneous Onset of Congestion Away from Bottlenecks .................. 535
  20.5.2 Lane Asymmetric Free Flow Distributions ............................. 537
20.6 Characteristics of Congested Pattern Propagation in Heterogeneous Traffic Flow ......................... 538
  20.6.1 Velocity of Downstream Jam Front .................................... 538
  20.6.2 Flow Rate in Jam Outflow ............................................. 540
  20.6.3 Velocity of Downstream Front of Moving Synchronized Flow Patterns .... 541
20.7 Conclusions ........................................................................... 542

Part IV Engineering Applications

21 ASDA and FOTO Models of Spatiotemporal Pattern Dynamics based on Local Traffic Flow Measurements ................. 547
  21.1 Introduction ................................................................. 547
  21.2 Identification of Traffic Phases .......................................... 548
  21.3 Determination of Traffic Phases with FOTO Model ................. 550
    21.3.1 Fuzzy Rules for FOTO Model ...................................... 551
  21.4 Tracking Moving Jams with ASDA: Simplified Discussion .................. 554
    21.4.1 Tracking Synchronized Flow with FOTO Model ............... 557
    21.4.2 ASDA-Like Approach to Tracking Synchronized Flow .......... 559
    21.4.3 Cumulative Flow Rate Approach to Tracking Synchronized Flow .... 560
  21.5 Conclusions ........................................................................ 561

22 Spatiotemporal Pattern Recognition, Tracking, and Prediction ......................... 563
  22.1 Introduction ................................................................. 563
  22.2 FOTO and ASDA Application for Congested Pattern Recognition and Tracking .......... 563
    22.2.1 Validation of FOTO and ASDA Models at Traffic Control Center of German Federal State of Hessen ......................... 563
    22.2.2 Application of FOTO and ASDA Models on Other Freeways in Germany and USA .......... 565
  22.3 Spatiotemporal Pattern Prediction ........................................ 568
    22.3.1 Historical Time Series ................................................. 568
22.3.2 Database of Reproducible and Predictable Spatiotemporal Pattern Features 575
22.3.3 Vehicle Onboard Autonomous Spatiotemporal Congested Pattern Prediction 580

22.4 Traffic Analysis and Prediction in Urban Areas 582
22.4.1 Model for Traffic Prediction in City Networks 582
22.5 Conclusions 589

23 Control of Spatiotemporal Congested Patterns 591
23.1 Introduction 591
23.2 Scenarios for Traffic Management and Control 592
23.3 Spatiotemporal Pattern Control
   Through Ramp Metering 593
   23.3.1 Free Flow Control Approach 595
   23.3.2 Congested Pattern Control Approach 606
   23.3.3 Comparison of Free Flow and Congested Pattern Control Approaches 610
   23.3.4 Comparison of Different Control Rules in Congested Pattern Control Approach 614
23.4 Dissolution of Congested Patterns 617
23.5 Prevention of Induced Congestion 620
23.6 Influence of Automatic Cruise Control
   on Congested Patterns 624
   23.6.1 Model of Automatic Cruise Control 624
   23.6.2 Automatic Cruise Control with Quick Dynamic Adaptation 626
   23.6.3 Automatic Cruise Control with Slow Dynamic Adaptation 628
23.7 Conclusions 629

24 Conclusion 631

A Terms and Definitions 633
A.1 Traffic States, Parameters, and Variables 633
A.2 Traffic Phases 633
A.3 Phase Transitions 634
A.4 Bottleneck Characteristics 635
A.5 Congested Patterns at Bottlenecks 636
A.6 Local Perturbations 637
A.7 Critical and Threshold Traffic Variables 637
A.8 Some Features of Phase Transitions and Traffic State Stability 638
