Contents

1 Introduction .................................................. 1

Part I Historical Overview
and Three-Phase Traffic Theory

2 Spatiotemporal Pattern Formation
in Freeway Traffic ........................................... 13
  2.1 Introduction .............................................. 13
  2.2 Traffic and Synergetics ................................. 14
  2.3 Free and Congested Traffic .............................. 15
    2.3.1 Local Measurements of Traffic Variables .......... 15
    2.3.2 Examples of Freeway Infrastructures and Detector Arrangements .................. 17
    2.3.3 Free Traffic Flow .................................. 18
    2.3.4 Congested Traffic ................................. 21
    2.3.5 Empirical Fundamental Diagram .................... 22
    2.3.6 Complex Local Dynamics of Congested Traffic .... 24
  2.4 Main Empirical Features of Spatiotemporal
    Congested Patterns ..................................... 27
    2.4.1 Three Traffic Phases ............................... 27
    2.4.2 Characteristic Parameters of Wide Moving Jams ... 28
    2.4.3 Spontaneous Breakdown Phenomenon
      (Spontaneous F→S Transition) ......................... 32
    2.4.4 Induced Breakdown Phenomenon ................... 34
    2.4.5 Synchronized Flow Patterns ......................... 35
    2.4.6 Catch Effect ..................................... 37
    2.4.7 Moving Jam Emergence in Synchronized Flow:
      General Pattern ..................................... 41
    2.4.8 Expanded Congested Patterns ...................... 46
    2.4.9 Foreign Wide Moving Jams ......................... 51
    2.4.10 Reproducible and Predictable Congested Patterns .. 53
    2.4.11 Methodology for Empirical Congested Pattern Study 57
  2.5 Conclusions, Fundamental Empirical Features
    of Spatiotemporal Congested Patterns ................... 58
3 Overview of Freeway Traffic Theories and Models: Fundamental Diagram Approach ............ 63
3.1 Introduction: Hypothesis About Theoretical Fundamental Diagram ........ 63
3.2 Achievements of Fundamental Diagram Approach to Traffic Flow Modeling and Theory ......................... 64
  3.2.1 Conservation of Vehicle Number on Road and Front Velocity .................. 66
  3.2.2 The Lighthill–Whitham–Richards Model and Shock Wave Theory ............... 67
  3.2.3 Collective Flow Concept and Probability of Passing .................. 68
  3.2.4 Scenarios for Moving Jam Emergence .............................................. 69
  3.2.5 Wide Moving Jam Characteristics .................................................. 69
  3.2.6 Flow Rate in Wide Moving Jam Outflow. The Line \( J \) ............................................. 71
  3.2.7 Metastable States of Free Flow with Respect to Moving Jam Emergence .......... 73
3.3 Drawbacks of Fundamental Diagram Approach in Describing of Spatiotemporal Congested Freeway Patterns ......................................................... 78
  3.3.1 Shock Wave Theory ........................................................................... 78
  3.3.2 Models and Theories of Moving Jam Emergence in Free Flow .................. 80
  3.3.3 Models and Theories with Variety of Vehicle and Driver Characteristics .......... 83
  3.3.4 Application of Classical Queuing Theories to Freeway Congested Traffic Patterns .................................................................................. 84
3.4 Conclusions........................................................................................................ 85
4 Basis of Three-Phase Traffic Theory ................................................................. 87
4.1 Introduction and Remarks on Three-Phase Traffic Theory ...................................... 87
4.2 Definition of Traffic Phases in Congested Traffic Based on Empirical Data .............. 88
  4.2.1 Objective Criteria for Traffic Phases in Congested Traffic ....................... 88
  4.2.2 Explanation of Terms “Synchronized Flow” and “Wide Moving Jam” .......... 90
  4.2.3 Mean Vehicle Trajectories ................................................................... 91
  4.2.4 Flow Rate in Synchronized Flow ......................................................... 91
  4.2.5 Empirical Line \( J \) ............................................................................... 93
  4.2.6 Propagation of Two Wide Moving Jams .............................................. 94
4.3 Fundamental Hypothesis of Three-Phase Traffic Theory ........................................ 95
## Contents

6.4 Double Z-Shaped Traffic Flow Characteristics .......................... 158
   6.4.1 Z-Characteristic for S→J Transition .......................... 158
   6.4.2 Cascade of Two Phase Transitions
       (F→S→J Transitions) ........................................ 161
   6.4.3 Wide Moving Jam Emergence
       Within Initial Moving Synchronized Flow Pattern ................ 167

6.5 Moving Jam Emergence
   in Synchronized Flow at Bottlenecks ............................... 169
   6.5.1 Why Moving Jams Do not Emerge
       in Free Flow at Bottlenecks ................................ 169
   6.5.2 Z-Characteristic for S→J Transition at Bottlenecks ...... 171
   6.5.3 Physics of Moving Jam Emergence
       in Synchronized Flow ........................................ 172
   6.5.4 Double Z-Characteristic and F→S→J Transitions
       at Bottlenecks .............................................. 176

6.6 Conclusions .................................................. 178

7 Congested Patterns at Freeway Bottlenecks
   in Three-Phase Traffic Theory .................................... 179
   7.1 Introduction ................................................ 179
   7.2 Two Main Types
       of Spatiotemporal Congested Patterns ........................ 179
   7.3 Simplified Diagram of Congested Patterns
       at Isolated Bottlenecks ...................................... 180
   7.4 Synchronized Flow Patterns .................................... 183
       7.4.1 Influence of Fluctuations on Limit Point
           for Free Flow at Bottlenecks ............................ 183
       7.4.2 Moving Synchronized Flow Pattern
           Emergence at Bottlenecks ................................. 185
       7.4.3 Pinning of Downstream Front
           of Synchronized Flow at Bottlenecks .................... 189
       7.4.4 Transformation Between Widening
           and Localized Synchronized Flow Patterns .............. 192
   7.5 General Patterns ............................................ 194
       7.5.1 Spatiotemporal Structure of General Patterns ...... 194
       7.5.2 Dissolving General Pattern
           and Pattern Transformation ............................... 198
   7.6 Physics of General Patterns ................................... 200
       7.6.1 Region of Wide Moving Jams ............................. 200
       7.6.2 Narrow Moving Jam Emergence in Pinch Region ...... 204
       7.6.3 Moving Jam Suppression Effect ......................... 209
       7.6.4 Width of Pinch Region ................................. 210
       7.6.5 Wide Moving Jam Propagation Through Bottlenecks 211
   7.7 Conclusions .................................................. 213
8 Freeway Capacity in Three-Phase Traffic Theory .................................. 217
  8.1 Introduction ................................................................................. 217
  8.2 Homogeneous Road ..................................................................... 217
  8.3 Freeway Capacity in Free Flow at Bottlenecks ......................... 218
      8.3.1 Definition of Freeway Capacity ...................................... 218
      8.3.2 Probability for Speed Breakdown at Bottlenecks .......... 220
      8.3.3 Threshold Boundary for Speed Breakdown ................. 223
      8.3.4 Features of Freeway Capacity at Bottlenecks ......... 226
  8.4 Z-Characteristic and Probability for Speed Breakdown ........... 228
  8.5 Congested Pattern Capacity at Bottlenecks ............................. 232
  8.6 Main Behavioral Assumptions of Three-Phase Traffic Theory .. 234
  8.7 Conclusions .............................................................................. 237

Part II Empirical Spatiotemporal Congested Traffic Patterns

9 Empirical Congested Patterns
  at Isolated Bottlenecks .............................................................. 241
  9.1 Introduction ............................................................................. 241
  9.2 Effectual Bottlenecks and Effective Locations
      of Bottlenecks ........................................................................ 242
      9.2.1 Effectual Bottlenecks on Freeway A5-South ............. 244
      9.2.2 Effectual Bottlenecks on Freeway A5-North .......... 247
      9.2.3 Isolated Effectual Bottleneck ........................................ 247
  9.3 Empirical Synchronized Flow Patterns ..................................... 250
      9.3.1 Widening Synchronized Flow Pattern ..................... 250
      9.3.2 Localized Synchronized Flow Pattern ..................... 255
      9.3.3 Moving Synchronized Flow Pattern ..................... 256
  9.4 Empirical General Patterns ...................................................... 259
      9.4.1 Empirical General Pattern of Type (1) .................. 259
      9.4.2 Empirical General Pattern of Type (2) .............. 262
      9.4.3 Dependence of Effective Location
            of Bottleneck on Time ................................................. 264
  9.5 Conclusions ............................................................................. 268

10 Empirical Breakdown Phenomenon:
    Phase Transition from Free Flow to Synchronized Flow ............... 269
  10.1 Introduction ............................................................................. 269
  10.2 Spontaneous Breakdown Phenomenon
      (Spontaneous F→S Transition) at On-Ramp Bottlenecks .... 270
XII Contents

10.3 Probability for F→S Transition .......................... 274
  10.3.1 Empirical and Theoretical Definitions
       of Freeway Capacities at Bottlenecks ................. 275
  10.3.2 Pre-Discharge Flow Rate ............................ 278

10.4 Induced Speed Breakdown
       at On-Ramp Bottlenecks ............................... 281
  10.4.1 F→S Transition Induced by Wide Moving Jam
       Propagation Through Effectual Bottleneck .......... 282
  10.4.2 Induced Speed Breakdown at Bottlenecks
       Caused by Synchronized Flow Propagation ........... 282

10.5 Breakdown Phenomenon at Off-Ramp Bottlenecks .......... 285

10.6 Breakdown Phenomenon Away from Bottlenecks ............ 289

10.7 Some Empirical Features of Synchronized Flow .......... 294
  10.7.1 Complex Behavior in Flow–Density Plane .......... 294
  10.7.2 Three Types of Synchronized Flow .................. 296
  10.7.3 Overlapping States of Free Flow
       and Synchronized Flow in Density ................. 299
  10.7.4 Analysis of Individual Vehicle Speeds ............. 302

10.8 Conclusions ........................................... 302

11 Empirical Features
    of Wide Moving Jam Propagation ......................... 305
  11.1 Introduction ......................................... 305
  11.2 Characteristic Parameters of Wide Moving Jams ........ 305
    11.2.1 Empirical Determination of Line J ............... 306
    11.2.2 Dependence of Characteristic Jam Parameters
       on Traffic Conditions ............................... 310
    11.2.3 Propagation of Wide Moving Jams
       Through Synchronized Flow .......................... 311
    11.2.4 Moving Blanks Within Wide Moving Jams .......... 314

  11.3 Features of Foreign Wide Moving Jams .................. 316
  11.4 Conclusions ......................................... 318

12 Empirical Features
    of Moving Jam Emergence ............................... 321
  12.1 Introduction ......................................... 321
  12.2 Pinch Effect in Synchronized Flow ..................... 321
    12.2.1 Narrow Moving Jam Emergence ...................... 323
    12.2.2 Wide Moving Jam Emergence (S→J Transition) .... 328
    12.2.3 Correlation of Characteristics for Pinch Region
       and Wide Moving Jams ............................... 332
    12.2.4 Frequency of Narrow Moving Jam Emergence ........ 332
    12.2.5 Saturation and Dynamic Features of Pinch Effect .. 334
    12.2.6 Spatial Dependence of Speed Correlation Function . 335
12.2.7 Effect of Wide Moving Jam Emergence in Pinch Region of General Pattern .......... 337
12.3 Strong and Weak Congestion ........................................ 337
12.4 Moving Jam Emergence in Synchronized Flow Away from Bottlenecks ................. 340
12.5 Pattern Formation at Off-Ramp Bottlenecks .................................. 343
12.6 Induced F→J Transition ................................................. 344
12.7 Conclusions .............................................................. 348

13 Empirical Pattern Evolution and Transformation at Isolated Bottlenecks ...................... 349
13.1 Introduction .............................................................. 349
13.2 Evolution of General Patterns at On-Ramp Bottlenecks .................................. 350
13.2.1 Transformation of General Pattern into Synchronized Flow Pattern ................. 350
13.2.2 Alternation of Free Flow and Synchronized Flow in Congested Patterns ............ 350
13.2.3 Hysteresis Effects Due to Pattern Formation and Dissolution ....................... 352
13.3 Transformations of Congested Patterns Under Weak Congestion .......................... 354
13.4 Discharge Flow Rate and Capacity Drop ....................................... 357
13.5 Conclusions .............................................................. 363

14 Empirical Complex Pattern Formation Caused by Peculiarities of Freeway Infrastructure .......... 365
14.1 Introduction .............................................................. 365
14.2 Expanded Congested Pattern ........................................... 366
14.2.1 Common Features .................................................... 366
14.2.2 Example of Expanded Congested Pattern ................................ 367
14.3 Dissolution of Moving Jams at Bottlenecks ......................................... 369
14.3.1 Dynamics of Wide Moving Jam Outflow .................................. 369
14.3.2 Localized Synchronized Flow Patterns Resulting from Moving Jam Dissolution ...... 371
14.4 Conclusions .............................................................. 372

15 Dependence of Empirical Fundamental Diagram on Congested Pattern Features ............ 373
15.1 Introduction .............................................................. 373
15.1.1 Empirical Fundamental Diagram and Steady State Model Solutions ............... 373
15.1.2 Two Branches of Empirical Fundamental Diagram ................................ 374
15.1.3 Line J and Wide Moving Jam Outflow ................................... 375
15.2 Empirical Fundamental Diagram
and Line $J$ ................................. 378
15.2.1 Asymptotic Behavior of Empirical
Fundamental Diagrams .................. 378
15.2.2 Influence of Different Vehicle Characteristics
on Fundamental Diagrams ............... 383
15.3 Dependence of Empirical Fundamental Diagram
on Congested Pattern Type ............... 385
15.4 Explanation of Reversed-$\lambda$, Inverted-V,
and Inverted-U Empirical Fundamental Diagrams ....... 392
15.5 Conclusions ............................ 394

Part III Microscopic Three-Phase Traffic Theory

16 Microscopic Traffic Flow Models
for Spatiotemporal Congested Patterns .... 399
16.1 Introduction .............................. 399
16.2 Cellular Automata Approach to Three-Phase Traffic Theory . 401
16.2.1 General Rules of Vehicle Motion .......... 401
16.2.2 Synchronization Distance ................. 402
16.2.3 Steady States .......................... 403
16.2.4 Fluctuations of Acceleration and Deceleration
in Cellular Automata Models ............... 405
16.2.5 Boundary Conditions and Model of On-Ramp ...... 407
16.2.6 Summary of Model Equations and Parameters ...... 408
16.3 Continuum in Space Model Approach
to Three-Phase Traffic Theory .......... 408
16.3.1 Vehicle Motion Rules .................... 408
16.3.2 Speed Adaptation Effect Within Synchronization
Distance ................................. 409
16.3.3 Motion State Model for Random Acceleration
and Deceleration ........................... 411
16.3.4 Safe Speed ............................ 413
16.3.5 2D Region of Steady States .............. 414
16.3.6 Physics of Driver Time Delays ............. 415
16.3.7 Over-Acceleration and Over-Deceleration Effects ...... 419
16.3.8 Lane Changing Rules .................... 420
16.3.9 Boundary Conditions and Models of Bottlenecks .... 421
16.3.10 Summary of Model Equations and Parameters ...... 425
16.4 Conclusions .............................. 431

17 Microscopic Theory of Phase Transitions
in Freeway Traffic ......................... 433
17.1 Introduction .............................. 433
17.2 Microscopic Theory of Breakdown Phenomenon  
(F→S Transition) ........................................... 434  
17.2.1 Homogeneous Road ................................ 434  
17.2.2 Breakdown Phenomenon at On-Ramp Bottlenecks . . . . 438  
17.3 Moving Jam Emergence and Double Z-Shaped  
Characteristics of Traffic Flow ........................... 442  
17.3.1 F→J Transition on Homogeneous Road .......... 442  
17.3.2 S→J Transition on Homogeneous Road .......... 443  
17.3.3 Moving Jam Emergence in Synchronized  
Flow Upstream of Bottlenecks ........................... 445  
17.4 Conclusions ............................................. 448 

18 Congested Patterns at Isolated Bottlenecks ............ 449  
18.1 Introduction ............................................. 449  
18.2 Diagram of Congested Patterns  
at Isolated On-Ramp Bottlenecks .......................... 450  
18.2.1 Synchronized Flow Patterns ....................... 450  
18.2.2 Single Vehicle Characteristics in Synchronized Flow 454  
18.2.3 Maximum Freeway Capacities  
and Limit Point in Diagram ............................... 458  
18.2.4 Pinch Effect in General Patterns ................. 458  
18.2.5 Peculiarities of General Patterns .................. 462  
18.3 Weak and Strong Congestion  
in General Patterns ....................................... 464  
18.3.1 Criteria for Strong and Weak Congestion ........ 464  
18.3.2 Strong Congestion Features ....................... 467  
18.4 Evolution of Congested Patterns  
at On-Ramp Bottlenecks ................................... 469  
18.5 Hysteresis and Nucleation Effects by Pattern  
Formation at On-Ramp Bottlenecks ....................... 471  
18.5.1 Threshold Boundary for Synchronized Flow Patterns 471  
18.5.2 Threshold Boundary for General Patterns .......... 475  
18.5.3 Overlap of Different Metastable Regions  
and Multiple Pattern Excitation ......................... 476  
18.6 Strong Congestion at Merge Bottlenecks .............. 477  
18.6.1 Comparison of General Patterns at Merge Bottleneck and at On-Ramp Bottleneck ................. 477  
18.6.2 Diagram of Congested Patterns .................... 478  
18.7 Weak Congestion at Off-Ramp Bottlenecks ............ 480  
18.7.1 Diagram of Congested Patterns .................... 480  
18.7.2 Comparison of Pattern Features  
at Various Bottlenecks ................................... 480  
18.8 Congested Pattern Capacity  
at On-Ramp Bottlenecks ................................... 483
XVI Contents

18.8.1 Transformations of Congested Patterns at On-Ramp Bottlenecks ........................................ 483
18.8.2 Temporal Evolution of Discharge Flow Rate ................. 486
18.8.3 Dependence of Congested Pattern Capacity on On-Ramp Inflow ........................................ 490
18.9 Conclusions ........................................................................ 492

19 Complex Congested Pattern Interaction and Transformation .................................................... 495
19.1 Introduction ........................................................................ 495
19.2 Catch Effect and Induced Congested Pattern Formation ....................................................... 496
19.2.1 Induced Pattern Emergence ........................................ 496
19.3 Complex Congested Patterns and Pattern Interaction ......................................................... 498
19.3.1 Foreign Wide Moving Jams ....................................... 498
19.3.2 Expanded Congested Patterns ................................. 501
19.4 Intensification of Downstream Congestion Due to Upstream Congestion ......................... 504
19.5 Conclusions ........................................................................ 507

20 Spatiotemporal Patterns in Heterogeneous Traffic Flow ................................................................. 509
20.1 Introduction ........................................................................ 509
20.2 Microscopic Two-Lane Model for Heterogeneous Traffic Flow with Various Driver Behavioral Characteristics and Vehicle Parameters .............................................. 510
20.2.1 Single-Lane Model ..................................................... 510
20.2.2 Two-Lane Model ....................................................... 512
20.2.3 Boundary, Initial Conditions, and Model of Bottleneck .................................................... 514
20.2.4 Simulation Parameters ............................................. 515
20.3 Patterns in Heterogeneous Traffic Flow with Different Driver Behavioral Characteristics ............................................. 515
20.3.1 Vehicle Separation Effect in Free Flow ............................................. 515
20.3.2 Onset of Congestion in Free Flow on Homogeneous Road .............................................. 516
20.3.3 Lane Asymmetric Emergence of Moving Synchronized Flow Patterns .............................................. 519
20.3.4 Congested Patterns at On-Ramp Bottlenecks ............................................. 519
20.3.5 Wide Moving Jam Propagation ............................................. 525
20.4 Patterns in Heterogeneous Traffic Flow with Different Vehicle Parameters ............................................. 528
20.4.1 Peculiarity of Wide Moving Jam Propagation ............................................. 530
20.4.2 Partial Destroying of Speed Synchronization ............................................. 533
## Contents

20.4.3 Extension of Free Flow Recovering and Vehicle Separation .................. 533
20.5 Weak Heterogeneous Flow ........................................ 535
  20.5.1 Spontaneous Onset of Congestion Away from Bottlenecks ................. 535
  20.5.2 Lane Asymmetric Free Flow Distributions .................. 537
20.6 Characteristics of Congested Pattern Propagation in Heterogeneous Traffic Flow .................. 538
  20.6.1 Velocity of Downstream Jam Front .......................... 538
  20.6.2 Flow Rate in Jam Outflow .................................. 540
  20.6.3 Velocity of Downstream Front of Moving Synchronized Flow Patterns ........ 541
20.7 Conclusions .......................................................... 542

### Part IV Engineering Applications

21 ASDA and FOTO Models of Spatiotemporal Pattern Dynamics based on Local Traffic Flow Measurements ............ 547
  21.1 Introduction ...................................................... 547
  21.2 Identification of Traffic Phases ................................ 548
  21.3 Determination of Traffic Phases with FOTO Model .......... 550
    21.3.1 Fuzzy Rules for FOTO Model .......................... 551
  21.4 Tracking Moving Jams with ASDA: Simplified Discussion .................. 554
    21.4.1 Tracking Synchronized Flow with FOTO Model ...... 557
    21.4.2 ASDA-Like Approach to Tracking Synchronized Flow .......... 559
    21.4.3 Cumulative Flow Rate Approach to Tracking Synchronized Flow .......... 560
  21.5 Conclusions ...................................................... 561

22 Spatiotemporal Pattern Recognition, Tracking, and Prediction ........................................ 563
  22.1 Introduction ...................................................... 563
  22.2 FOTO and ASDA Application for Congested Pattern Recognition and Tracking .......... 563
    22.2.1 Validation of FOTO and ASDA Models at Traffic Control Center of German Federal State of Hessen .................. 563
    22.2.2 Application of FOTO and ASDA Models on Other Freeways in Germany and USA .......... 565
  22.3 Spatiotemporal Pattern Prediction .............................. 568
    22.3.1 Historical Time Series .................................. 568
23 Control of Spatiotemporal Congested Patterns

23.1 Introduction

23.2 Scenarios for Traffic Management and Control

23.3 Spatiotemporal Pattern Control
   Through Ramp Metering
   23.3.1 Free Flow Control Approach
   23.3.2 Congested Pattern Control Approach
   23.3.3 Comparison of Free Flow and Congested Pattern Control Approaches
   23.3.4 Comparison of Different Control Rules in Congested Pattern Control Approach

23.4 Dissolution of Congested Patterns

23.5 Prevention of Induced Congestion

23.6 Influence of Automatic Cruise Control
   on Congested Patterns
   23.6.1 Model of Automatic Cruise Control
   23.6.2 Automatic Cruise Control with Quick Dynamic Adaptation
   23.6.3 Automatic Cruise Control with Slow Dynamic Adaptation

23.7 Conclusions

24 Conclusion

A Terms and Definitions
   A.1 Traffic States, Parameters, and Variables
   A.2 Traffic Phases
   A.3 Phase Transitions
   A.4 Bottleneck Characteristics
   A.5 Congested Patterns at Bottlenecks
   A.6 Local Perturbations
   A.7 Critical and Threshold Traffic Variables
   A.8 Some Features of Phase Transitions and Traffic State Stability
Contents  XIX

B  ASDA and FOTO Models
   for Practical Applications ..................................... 641
   B.1  ASDA Model for Several Road Detectors ..................... 641
       B.1.1  Extensions of ASDA for On-Ramps, Off-Ramps,
              and Changing of Number of Freeway Lanes
              Upstream of Moving Jam ............................... 643
       B.1.2  Extensions of ASDA for On-Ramps, Off-Ramps,
              and Changing of Number of Freeway Lanes
              Downstream of Moving Jam ............................ 645
       B.1.3  FOTO Model for Several Road Detectors ................. 646
       B.1.4  Extended Rules for FOTO Model ......................... 646
   B.2  Statistical Evaluation of Different
   Reducer Detector Configurations ............................... 651
