## Contents

1 Introduction .............................................. 1

Part I Historical Overview and Three-Phase Traffic Theory

2 Spatiotemporal Pattern Formation in Freeway Traffic ........................................ 13
   2.1 Introduction .............................................. 13
   2.2 Traffic and Synergetics ................................. 14
   2.3 Free and Congested Traffic ......................... 15
      2.3.1 Local Measurements of Traffic Variables ....... 15
      2.3.2 Examples of Freeway Infrastructures and Detector Arrangements ............. 17
      2.3.3 Free Traffic Flow ................................ 18
      2.3.4 Congested Traffic ................................. 21
      2.3.5 Empirical Fundamental Diagram ................. 22
      2.3.6 Complex Local Dynamics of Congested Traffic ........ 24
   2.4 Main Empirical Features of Spatiotemporal
      Congested Patterns .................................... 27
      2.4.1 Three Traffic Phases .............................. 27
      2.4.2 Characteristic Parameters of Wide Moving Jams ........ 28
      2.4.3 Spontaneous Breakdown Phenomenon
         (Spontaneous F→S Transition) ................. 32
      2.4.4 Induced Breakdown Phenomenon ............... 34
      2.4.5 Synchronized Flow Patterns ...................... 35
      2.4.6 Catch Effect .................................... 37
      2.4.7 Moving Jam Emergence in Synchronized Flow:
         General Pattern .................................... 41
      2.4.8 Expanded Congested Patterns .................... 46
      2.4.9 Foreign Wide Moving Jams ....................... 51
      2.4.10 Reproducible and Predictable Congested Patterns ........ 53
      2.4.11 Methodology for Empirical Congested Pattern Study ........ 57
   2.5 Conclusions, Fundamental Empirical Features
      of Spatiotemporal Congested Patterns ................ 58
3 Overview of Freeway Traffic Theories and Models: Fundamental Diagram Approach .......... 63

3.1 Introduction:
Hypothesis About Theoretical Fundamental Diagram ........ 63

3.2 Achievements of Fundamental Diagram Approach to Traffic Flow Modeling and Theory ............... 64

3.2.1 Conservation of Vehicle Number on Road and Front Velocity ......................... 66
3.2.2 The Lighthill–Whitham–Richards Model and Shock Wave Theory ...................... 67
3.2.3 Collective Flow Concept and Probability of Passing .................. 68
3.2.4 Scenarios for Moving Jam Emergence ..................... 69
3.2.5 Wide Moving Jam Characteristics ...................... 69
3.2.6 Flow Rate in Wide Moving Jam Outflow, The Line $J$ ......................... 71
3.2.7 Metastable States of Free Flow with Respect to Moving Jam Emergence ............. 73

3.3 Drawbacks of Fundamental Diagram Approach in Describing of Spatiotemporal Congested Freeway Patterns ........................................ 78

3.3.1 Shock Wave Theory .................................. 78
3.3.2 Models and Theories of Moving Jam Emergence in Free Flow ......................... 80
3.3.3 Models and Theories with Variety of Vehicle and Driver Characteristics ............. 83
3.3.4 Application of Classical Queuing Theories to Freeway Congested Traffic Patterns ........ 84

3.4 Conclusions ........................................... 85

4 Basis of Three-Phase Traffic Theory ...................... 87

4.1 Introduction and Remarks on Three-Phase Traffic Theory ........................................ 87

4.2 Definition of Traffic Phases in Congested Traffic Based on Empirical Data .................. 88

4.2.1 Objective Criteria for Traffic Phases in Congested Traffic ......................... 88
4.2.2 Explanation of Terms “Synchronized Flow” and “Wide Moving Jam” .................. 90
4.2.3 Mean Vehicle Trajectories ................................ 91
4.2.4 Flow Rate in Synchronized Flow ................................ 91
4.2.5 Empirical Line $J$ .................................. 93
4.2.6 Propagation of Two Wide Moving Jams ...................... 94

4.3 Fundamental Hypothesis of Three-Phase Traffic Theory .................................... 95
4.3.1 Three-Phase Traffic Theory as Driver Behavioral Theory .................. 98
4.3.2 Synchronization Distance and Speed Adaptation
Effect in Synchronized Flow .......................... 100
4.3.3 Random Transformations ("Wandering")
Within Synchronized Flow States .................. 100
4.3.4 Dynamic Synchronized Flow States .................. 101
4.4 Empirical Basis of Three-Phase Traffic Theory .................. 102
4.5 Conclusions .................................. 103

5 Breakdown Phenomenon (F→S Transition)
in Three-Phase Traffic Theory .................. 105
5.1 Introduction .................................. 105
5.2 Breakdown Phenomenon on Homogeneous Road .................. 106
  5.2.1 Speed Breakdown at Limit Point of Free Flow ........ 106
  5.2.2 Critical Local Perturbation for Speed Breakdown .... 108
  5.2.3 Probability for Breakdown Phenomenon ............ 110
  5.2.4 Threshold Flow Rate and Density,
and Speed Adaptation .............................. 111
  5.2.5 Z-Shaped Speed–Density and Passing
  Probability Characteristics .......................... 114
  5.2.6 Physics of Breakdown Phenomenon:
  Competition Between Over-Acceleration
  and Speed Adaptation .............................. 119
  5.2.7 Physics of Threshold Point in Free Flow .......... 120
  5.2.8 Moving Synchronized Flow Pattern .................. 122
5.3 Breakdown Phenomenon at Freeway Bottlenecks ............... 123
  5.3.1 Deterministic Local Perturbation .................. 123
  5.3.2 Deterministic F→S Transition .................. 128
  5.3.3 Physics of Deterministic Speed Breakdown
  at Bottleneck .................................... 133
  5.3.4 Influence of Random Perturbations .................. 133
  5.3.5 Z-Characteristic for Speed Breakdown at Bottleneck 136
  5.3.6 Physics of Speed Breakdown at Bottleneck ......... 139
  5.3.7 Time Delay of Speed Breakdown .................. 140
5.4 Conclusions .................................. 142

6 Moving Jam Emergence in Three-Phase Traffic Theory ....... 145
6.1 Introduction .................................. 145
6.2 Wide Moving Jam Emergence in Free Flow .................. 147
6.3 Wide Moving Jam Emergence in Synchronized Flow .......... 150
  6.3.1 Hypothesis for Moving Jam Emergence
  in Synchronized Flow .............................. 150
  6.3.2 Features of Metastable Synchronized Flow States .... 155
  6.3.3 Stable High Density Synchronized Flow States ....... 156
Contents

6.4 Double Z-Shaped Traffic Flow Characteristics ................. 158
  6.4.1 Z-Characteristic for S→J Transition .................. 158
  6.4.2 Cascade of Two Phase Transitions
           (F→S→J Transitions) ........................... 161
  6.4.3 Wide Moving Jam Emergence
           Within Initial Moving Synchronized Flow Pattern ... 167

6.5 Moving Jam Emergence
  in Synchronized Flow at Bottlenecks ......................... 169
  6.5.1 Why Moving Jams Do not Emerge
           in Free Flow at Bottlenecks ..................... 169
  6.5.2 Z-Characteristic for S→J Transition at Bottlenecks . 171
  6.5.3 Physics of Moving Jam Emergence
           in Synchronized Flow ............................ 172
  6.5.4 Double Z-Characteristic and F→S→J Transitions
           at Bottlenecks ................................ 176

6.6 Conclusions ............................................ 178

7 Congested Patterns at Freeway Bottlenecks
  in Three-Phase Traffic Theory ............................ 179
  7.1 Introduction ........................................ 179
  7.2 Two Main Types
           of Spatiotemporal Congested Patterns .............. 179
  7.3 Simplified Diagram of Congested Patterns
           at Isolated Bottlenecks ........................... 180
  7.4 Synchronized Flow Patterns ............................... 183
           7.4.1 Influence of Fluctuations on Limit Point
                   for Free Flow at Bottlenecks ................. 183
           7.4.2 Moving Synchronized Flow Pattern
                   Emergence at Bottlenecks ................... 185
           7.4.3 Pinning of Downstream Front
                   of Synchronized Flow at Bottlenecks ............ 189
           7.4.4 Transformation Between Widening
                   and Localized Synchronized Flow Patterns ......... 192
  7.5 General Patterns ...................................... 194
           7.5.1 Spatiotemporal Structure of General Patterns ..... 194
           7.5.2 Dissolving General Pattern
                   and Pattern Transformation .................... 198
  7.6 Physics of General Patterns ............................. 200
           7.6.1 Region of Wide Moving Jams ................... 200
           7.6.2 Narrow Moving Jam Emergence in Pinch Region .. 204
           7.6.3 Moving Jam Suppression Effect .................. 209
           7.6.4 Width of Pinch Region ........................ 210
           7.6.5 Wide Moving Jam Propagation Through Bottlenecks 211
  7.7 Conclusions ............................................. 213
10.3 Probability for $F \rightarrow S$ Transition .......................... 274
  10.3.1 Empirical and Theoretical Definitions of Freeway Capacities at Bottlenecks 275
  10.3.2 Pre-Discharge Flow Rate .......................... 278

10.4 Induced Speed Breakdown
  10.4.1 $F \rightarrow S$ Transition Induced by Wide Moving Jam Propagation Through Effectual Bottleneck 282
  10.4.2 Induced Speed Breakdown at Bottlenecks Caused by Synchronized Flow Propagation 282

10.5 Breakdown Phenomenon at Off-Ramp Bottlenecks 285

10.6 Breakdown Phenomenon Away from Bottlenecks 289

10.7 Some Empirical Features of Synchronized Flow
  10.7.1 Complex Behavior in Flow–Density Plane 294
  10.7.2 Three Types of Synchronized Flow 296
  10.7.3 Overlapping States of Free Flow and Synchronized Flow in Density 299
  10.7.4 Analysis of Individual Vehicle Speeds 302

10.8 Conclusions .......................... 302

11 Empirical Features of Wide Moving Jam Propagation .......................... 305
  11.1 Introduction .......................... 305
  11.2 Characteristic Parameters of Wide Moving Jams 305
  11.2.1 Empirical Determination of Line $J$ 306
  11.2.2 Dependence of Characteristic Jam Parameters on Traffic Conditions 310
  11.2.3 Propagation of Wide Moving Jams Through Synchronized Flow 311
  11.2.4 Moving Blanks Within Wide Moving Jams 314

11.3 Features of Foreign Wide Moving Jams 316

11.4 Conclusions .......................... 318

12 Empirical Features of Moving Jam Emergence .......................... 321
  12.1 Introduction .......................... 321
  12.2 Pinch Effect in Synchronized Flow 321
  12.2.1 Narrow Moving Jam Emergence 323
  12.2.2 Wide Moving Jam Emergence ($S \rightarrow J$ Transition) 328
  12.2.3 Correlation of Characteristics for Pinch Region and Wide Moving Jams 332
  12.2.4 Frequency of Narrow Moving Jam Emergence 332
  12.2.5 Saturation and Dynamic Features of Pinch Effect 334
  12.2.6 Spatial Dependence of Speed Correlation Function 335
12.2.7 Effect of Wide Moving Jam Emergence in Pinch Region of General Pattern .................. 337
12.3 Strong and Weak Congestion ......................................................... 337
12.4 Moving Jam Emergence in Synchronized Flow Away from Bottlenecks ......................... 340
12.5 Pattern Formation at Off-Ramp Bottlenecks ........................................ 343
12.6 Induced F→J Transition ............................................................. 344
12.7 Conclusions ........................................................................ 348

13 Empirical Pattern Evolution and Transformation at Isolated Bottlenecks ......................... 349
13.1 Introduction ........................................................................... 349
13.2 Evolution of General Patterns at On-Ramp Bottlenecks ............................................ 350
13.2.1 Transformation of General Pattern into Synchronized Flow Pattern .................... 350
13.2.2 Alternation of Free Flow and Synchronized Flow in Congested Patterns ................ 350
13.2.3 Hysteresis Effects Due to Pattern Formation and Dissolution .............................. 352
13.3 Transformations of Congested Patterns Under Weak Congestion ................................. 354
13.4 Discharge Flow Rate and Capacity Drop .................................................................. 357
13.5 Conclusions ........................................................................ 363

14 Empirical Complex Pattern Formation Caused by Peculiarities of Freeway Infrastructure .... 365
14.1 Introduction ........................................................................... 365
14.2 Expanded Congested Pattern ........................................................................ 366
14.2.1 Common Features ........................................................................ 366
14.2.2 Example of Expanded Congested Pattern ..................................................... 367
14.3 Dissolution of Moving Jams at Bottlenecks ......................................................... 369
14.3.1 Dynamics of Wide Moving Jam Outflow ....................................................... 369
14.3.2 Localized Synchronized Flow Patterns Resulting from Moving Jam Dissolution .... 371
14.4 Conclusions ........................................................................ 372

15 Dependence of Empirical Fundamental Diagram on Congested Pattern Features ............... 373
15.1 Introduction ........................................................................... 373
15.1.1 Empirical Fundamental Diagram and Steady State Model Solutions .................... 373
15.1.2 Two Branches of Empirical Fundamental Diagram ........................................... 374
15.1.3 Line J and Wide Moving Jam Outflow ......................................................... 375
15.2 Empirical Fundamental Diagram and Line $J$ ........................................ 378
  15.2.1 Asymptotic Behavior of Empirical Fundamental Diagrams .................. 378
  15.2.2 Influence of Different Vehicle Characteristics on Fundamental Diagrams ........ 383
15.3 Dependence of Empirical Fundamental Diagram on Congested Pattern Type ................. 385
15.4 Explanation of Reversed-$\lambda$, Inverted-V, and Inverted-U Empirical Fundamental Diagrams .......... 392
15.5 Conclusions ........................................ 394

Part III Microscopic Three-Phase Traffic Theory

16 Microscopic Traffic Flow Models for Spatiotemporal Congested Patterns .................. 399
  16.1 Introduction ........................................ 399
  16.2 Cellular Automata Approach to Three-Phase Traffic Theory ............. 401
    16.2.1 General Rules of Vehicle Motion ........................................ 401
    16.2.2 Synchronization Distance ........................................ 402
    16.2.3 Steady States ........................................ 403
    16.2.4 Fluctuations of Acceleration and Deceleration in Cellular Automata Models ........ 405
    16.2.5 Boundary Conditions and Model of On-Ramp ......................... 407
    16.2.6 Summary of Model Equations and Parameters ....................... 408
  16.3 Continuum in Space Model Approach to Three-Phase Traffic Theory ................. 408
    16.3.1 Vehicle Motion Rules ........................................ 408
    16.3.2 Speed Adaptation Effect Within Synchronization Distance ............. 409
    16.3.3 Motion State Model for Random Acceleration and Deceleration ............. 411
    16.3.4 Safe Speed ........................................ 413
    16.3.5 2D Region of Steady States ........................................ 414
    16.3.6 Physics of Driver Time Delays ........................................ 415
    16.3.7 Over-Acceleration and Over-Deceleration Effects ..................... 419
    16.3.8 Lane Changing Rules ........................................ 420
    16.3.9 Boundary Conditions and Models of Bottlenecks ..................... 421
    16.3.10 Summary of Model Equations and Parameters .................... 425
  16.4 Conclusions ........................................ 431

17 Microscopic Theory of Phase Transitions in Freeway Traffic .................. 433
  17.1 Introduction ........................................ 433
17.2 Microscopic Theory of Breakdown Phenomenon
    (F→S Transition) ................................................. 434
    17.2.1 Homogeneous Road ........................................... 434
    17.2.2 Breakdown Phenomenon at On-Ramp Bottlenecks ... 438
17.3 Moving Jam Emergence and Double Z-Shaped
    Characteristics of Traffic Flow ............................... 442
    17.3.1 F→J Transition on Homogeneous Road ................. 442
    17.3.2 S→J Transition on Homogeneous Road ............. 443
    17.3.3 Moving Jam Emergence in Synchronized
    Flow Upstream of Bottlenecks ............................. 445
17.4 Conclusions ......................................................... 448

18 Congested Patterns at Isolated Bottlenecks ............... 449
18.1 Introduction ......................................................... 449
18.2 Diagram of Congested Patterns
    at Isolated On-Ramp Bottlenecks ............................ 450
    18.2.1 Synchronized Flow Patterns ............................. 450
    18.2.2 Single Vehicle Characteristics in Synchronized Flow 454
    18.2.3 Maximum Freeway Capacities
    and Limit Point in Diagram ................................... 458
    18.2.4 Pinch Effect in General Patterns ...................... 458
    18.2.5 Peculiarities of General Patterns ...................... 462
18.3 Weak and Strong Congestion
    in General Patterns ............................................. 464
    18.3.1 Criteria for Strong and Weak Congestion ........... 464
    18.3.2 Strong Congestion Features ............................. 467
18.4 Evolution of Congested Patterns
    at On-Ramp Bottlenecks ......................................... 469
18.5 Hysteresis and Nucleation Effects by Pattern
    Formation at On-Ramp Bottlenecks ............................ 471
    18.5.1 Threshold Boundary for Synchronized Flow Patterns 471
    18.5.2 Threshold Boundary for General Patterns ............ 475
    18.5.3 Overlap of Different Metastable Regions
    and Multiple Pattern Excitation .......................... 476
18.6 Strong Congestion at Merge Bottlenecks .................... 477
    18.6.1 Comparison of General Patterns at Merge Bottleneck
    and at On-Ramp Bottleneck .................................. 477
    18.6.2 Diagram of Congested Patterns ......................... 478
18.7 Weak Congestion at Off-Ramp Bottlenecks ................ 480
    18.7.1 Diagram of Congested Patterns ......................... 480
    18.7.2 Comparison of Pattern Features
    at Various Bottlenecks .................................. 480
18.8 Congested Pattern Capacity
    at On-Ramp Bottlenecks ...................................... 483
18.8.1 Transformations of Congested Patterns at On-Ramp Bottlenecks ........................................... 483
18.8.2 Temporal Evolution of Discharge Flow Rate .............. 486
18.8.3 Dependence of Congested Pattern Capacity on On-Ramp Inflow ............................................. 490
18.9 Conclusions ................................................. 492

19 Complex Congested Pattern Interaction and Transformation ................................................. 495
19.1 Introduction ................................................. 495
19.2 Catch Effect and Induced Congested Pattern Formation ............................................... 496
19.2.1 Induced Pattern Emergence ............................................. 496
19.3 Complex Congested Patterns and Pattern Interaction ..................................................... 498
19.3.1 Foreign Wide Moving Jams ............................................. 498
19.3.2 Expanded Congested Patterns ............................................. 501
19.4 Intensification of Downstream Congestion Due to Upstream Congestion ............................................. 504
19.5 Conclusions ................................................. 507

20 Spatiotemporal Patterns in Heterogeneous Traffic Flow ................................................. 509
20.1 Introduction ................................................. 509
20.2 Microscopic Two-Lane Model for Heterogeneous Traffic Flow with Various Driver Behavioral Characteristics and Vehicle Parameters ............................................. 510
20.2.1 Single-Lane Model ............................................. 510
20.2.2 Two-Lane Model ............................................. 512
20.2.3 Boundary, Initial Conditions, and Model of Bottleneck ............................................. 514
20.2.4 Simulation Parameters ............................................. 515
20.3 Patterns in Heterogeneous Traffic Flow with Different Driver Behavioral Characteristics ............................................. 515
20.3.1 Vehicle Separation Effect in Free Flow ............................................. 515
20.3.2 Onset of Congestion in Free Flow on Homogeneous Road ............................................. 516
20.3.3 Lane Asymmetric Emergence of Moving Synchronized Flow Patterns ............................................. 519
20.3.4 Congested Patterns at On-Ramp Bottlenecks ............................................. 519
20.3.5 Wide Moving Jam Propagation ............................................. 525
20.4 Patterns in Heterogeneous Traffic Flow with Different Vehicle Parameters ............................................. 528
20.4.1 Peculiarity of Wide Moving Jam Propagation ............................................. 530
20.4.2 Partial Destroying of Speed Synchronization ............................................. 533
20.4.3 Extension of Free Flow Recovering and Vehicle Separation 533
20.5 Weak Heterogeneous Flow 535
  20.5.1 Spontaneous Onset of Congestion Away from Bottlenecks 535
  20.5.2 Lane Asymmetric Free Flow Distributions 537
20.6 Characteristics of Congested Pattern Propagation in Heterogeneous Traffic Flow 538
  20.6.1 Velocity of Downstream Jam Front 538
  20.6.2 Flow Rate in Jam Outflow 540
  20.6.3 Velocity of Downstream Front of Moving Synchronized Flow Patterns 541
20.7 Conclusions 542

Part IV Engineering Applications

21 ASDA and FOTO Models of Spatiotemporal Pattern Dynamics based on Local Traffic Flow Measurements 547
  21.1 Introduction 547
  21.2 Identification of Traffic Phases 548
  21.3 Determination of Traffic Phases with FOTO Model 550
    21.3.1 Fuzzy Rules for FOTO Model 551
  21.4 Tracking Moving Jams with ASDA:
    Simplified Discussion 554
    21.4.1 Tracking Synchronized Flow with FOTO Model 557
    21.4.2 ASDA-Like Approach to Tracking Synchronized Flow 559
    21.4.3 Cumulative Flow Rate Approach to Tracking Synchronized Flow 560
  21.5 Conclusions 561

22 Spatiotemporal Pattern Recognition, Tracking, and Prediction 563
  22.1 Introduction 563
  22.2 FOTO and ASDA Application for Congested Pattern Recognition and Tracking 563
    22.2.1 Validation of FOTO and ASDA Models at Traffic Control Center of German Federal State of Hessen 563
    22.2.2 Application of FOTO and ASDA Models on Other Freeways in Germany and USA 565
  22.3 Spatiotemporal Pattern Prediction 568
    22.3.1 Historical Time Series 568
22.3.2 Database of Reproducible and Predictable Spatiotemporal Pattern Features ........................................ 575
22.3.3 Vehicle Onboard Autonomous Spatiotemporal Congested Pattern Prediction ........................................... 580
22.4 Traffic Analysis and Prediction in Urban Areas .................. 582
  22.4.1 Model for Traffic Prediction in City Networks ............... 582
22.5 Conclusions ......................................................... 589

23 Control of Spatiotemporal Congested Patterns .................... 591
  23.1 Introduction ....................................................... 591
  23.2 Scenarios for Traffic Management and Control ................. 592
  23.3 Spatiotemporal Pattern Control
      Through Ramp Metering ........................................... 593
      23.3.1 Free Flow Control Approach ............................. 595
      23.3.2 Congested Pattern Control Approach .................... 606
      23.3.3 Comparison of Free Flow and Congested Pattern Control Approaches .... 610
      23.3.4 Comparison of Different Control Rules in Congested Pattern Control Approach .... 614
  23.4 Dissolution of Congested Patterns ............................... 617
  23.5 Prevention of Induced Congestion ................................ 620
  23.6 Influence of Automatic Cruise Control
      on Congested Patterns ........................................... 624
      23.6.1 Model of Automatic Cruise Control ....................... 624
      23.6.2 Automatic Cruise Control with Quick Dynamic Adaptation ............. 626
      23.6.3 Automatic Cruise Control with Slow Dynamic Adaptation ............... 628
  23.7 Conclusions ......................................................... 629

24 Conclusion .......................................................... 631

A Terms and Definitions ............................................... 633
  A.1 Traffic States, Parameters, and Variables ...................... 633
  A.2 Traffic Phases ..................................................... 633
  A.3 Phase Transitions ................................................ 634
  A.4 Bottleneck Characteristics ....................................... 635
  A.5 Congested Patterns at Bottlenecks ............................... 636
  A.6 Local Perturbations ............................................... 637
  A.7 Critical and Threshold Traffic Variables ........................ 637
  A.8 Some Features of Phase Transitions and Traffic State Stability ......................... 638
B ASDA and FOTO Models for Practical Applications .......................... 641
   B.1 ASDA Model for Several Road Detectors ......................... 641
   B.1.1 Extensions of ASDA for On-Ramps, Off-Ramps,
       and Changing of Number of Freeway Lanes
       Upstream of Moving Jam .................................. 643
   B.1.2 Extensions of ASDA for On-Ramps, Off-Ramps,
       and Changing of Number of Freeway Lanes
       Downstream of Moving Jam .............................. 645
   B.1.3 FOTO Model for Several Road Detectors ................... 646
   B.1.4 Extended Rules for FOTO Model ............................ 646
   B.2 Statistical Evaluation of Different
       Reduced Detector Configurations .......................... 651
