Table of Contents

Section I: Fundamentals of Agent Communication

Conventional Signalling Acts and Conversation .......................... 1
   Andrew J.I. Jones and Xavier Parent

An Empirical Model of Communication in Multiagent Systems .......... 18
   Michael Rovatsos, Matthias Nickles, and Gerhard Weiss

An Exploration in Using Cognitive Coherence Theory
to Automate BDI Agents’ Communicational Behavior .................... 37
   Philippe Pasquier, Nicolas Andrillon, Marc-André Labrie,
   and Brahim Chaib-draa

A Performative Type Hierarchy and Other Interesting Considerations
in the Design of the CASA Agent Architecture ......................... 59
   Rob Kremer, Roberto Flores, and Chad La Fournie

Model Checking for ACL Compliance Verification ........................ 75
   Marc-Philippe Huget and Michael Wooldridge

Logic-Based Agent Communication Protocols ............................. 91
   Ulle Endriss, Nicolas Maudet, Fariba Sadri, and Francesca Toni

Section II: Agent Communication and Commitments

Protocol Specification Using a Commitment Based ACL ................. 108
   Nicoletta Fornara and Marco Colombetti

A Logical Model of Social Commitment for Agent Communication .... 128
   Mario Verdicchio and Marco Colombetti

Commitment and Argument Network:
A New Formalism for Agent Communication ............................. 146
   Jamal Bentahar, Bernard Moulin, and Brahim Chaib-draa

Resolving Commitments among Autonomous Agents ........................ 166
   Ashok U. Mallya, Pınar Yolum, and Munindar P. Singh

Nonmonotonic Commitment Machines ................................. 183
   Amit Chopra and Munindar P. Singh
Table of Contents

Section III: Communication within Groups of Agents

Issues in Multiparty Dialogues .................................................. 201
   David Traum

Towards a Testbed for Multi-party Dialogues .............................. 212
   Frank P.M. Dignum and Gerard A.W. Vreeswijk

Intra-role Coordination Using Group Communication:
   A Preliminary Report .......................................................... 231
   Paolo Busetta, Mattia Merzi, Silvia Rossi, and François Legras

LOTTO: Group Formation by Overhearing in Large Teams ............... 254
   François Legras and Catherine Tessier

Proactive Communications in Agent Teamwork ............................. 271
   John Yen, Xiaocong Fan, and Richard A. Volz

Section IV: Dialogues

Modularity in Interaction Protocols ........................................ 291
   Benjamin Vitteau and Marc-Philippe Huget

Concepts of Optimal Utterance in Dialogue: Selection and Complexity .... 310
   Paul E. Dunne and Peter McBurney

The Mechanics of Some Formal Inter-agent Dialogues ..................... 329
   Simon Parsons, Peter McBurney, and Michael Wooldridge

A Cooperative Dialogue Game for Resolving Ontological Discrepancies ... 349
   Robbert-Jan Beun and Rogier M. van Eijk

The Posit Spaces Protocol for Multi-agent Negotiation .................. 364
   Peter McBurney and Simon Parsons

On Interest-Based Negotiation .................................................. 383
   Iyad Rahwan, Liz Sonenberg, and Frank P.M. Dignum

Author Index ............................................................................. 403
